Awareness Raising

Problem Definition

Identification of Options

Evaluation

Implementation

Policy Selection

Sector programmes
- Agriculture and forestry 2011
- Environment 2008, 2011
- Transport 2009

SYKE

Key mechanisms for mainstreaming (1/3)

NAS and sectoral adaptation programmes

Evaluations

Horizontal coordination

Key mechanisms for mainstreaming (2/3)

European funding instruments (Life, ERDF) for local projects

Key mechanisms for mainstreaming (3/3)

Development of tools: flood protection, climate projections/scenarios with national & local application

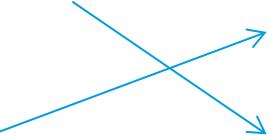

Ivalo flood risk map (1/1000a)

Barriers and some solutions
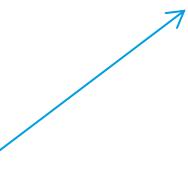

Lack of uptake by "all" sectors ⟶ Evaluation - Self reflection among sectoral policy makers

Poor recognition of cross-sector effects ⟶ "Bridging the resource gap" - Practical tools for policy implementation (e.g. flood centre, www.climateguide.fi)

Limited diffusion to local level (but at the same time autonomous local initiatives) ⟶ Overcoming the limits of top-down NAS through support for local action

+ Elements in the revised NAS

Outlook in 2014

- **Climate Act**
  (reporting and evaluation of adaptation)

- **2014 NAS** implementation

- **2015** First reporting on adaptation according to the EU Monitoring Mechanism Regulation
