## **Questions for discussion**

### **Panel 1: Underlying assumptions and methodologies, sectors and gases covered, GWPs values used and estimated mitigation outcomes**

- What assumptions should be considered while preparing a NAMA?
- What are the main methodological challenges that need to be addressed for the preparation and implementation of NAMAs?
- What are the main gaps of information on NAMAs communicated to the UNFCCC and what could the UNFCCC do to address them?

### **Panel 2: Support needs**

- What support has already been provided for the preparation and implementation of NAMAs? What is lacking in terms of provision of support and what could the UNFCCC do to make it available?
- What are the main obstacles that need to be addressed so that available sources of support could effectively be channeled to support the preparation and implementation of NAMAs?
