

Input by Care International and ICCAD on Action Area 3(a)

6. Target beneficiaries

Please indicate the target beneficiaries of your work on slow onset events, and, to the extent possible, reflect how it benefits particularly vulnerable developing countries, segments of the population that are already vulnerable owing to geography, socioeconomic status, livelihoods, gender, age, indigenous or minority status or disability, and the ecosystems that they depend on.

7. Non-economic losses

[I think this section could benefit from a footnote referencing examples of types of non-economic losses]

10. Detailed description of efforts on slow onset events and identified, instruments priorities and challenges

Please provide information on the work, efforts and concrete activities/projects of your organization to address slow onset events, identified instruments (incl. financial instruments), priorities and challenges ahead to address loss and damage from slow-onset events, as appropriate.

[this is to generate, if possible, more outcome and forward-looking oriented information, in addition to just assessing the work that is undertaken]
