

Input by Party observer Turkey

Dear ExCom Members,

Please kindly find the view of Turkey below as an observer.

Due to the time constraints, prioritization of actions may be the key to submit an effective report to COP.

Giving priority to financial activities (Action Area 7), and the problems becoming heavier like migration (Action Area 6), ExCom first may set sub-groups, working groups, technical expert groups etc. to implement the work plan by asking them to prepare feedback reports.

That GCF and Adaptation Fund are great success of the Parties is a fact, ExCom may search to find ways to direct the budgets for compensation. If those funds are to be used for the compensation of losses and damages, ExCom may assign a sub-group to make it more understandable and explicit regarding how those funds will be allocated. It would be fit the purpose of the ExCom, which is diffusion of information related to financial instruments.

Yours Sincerely,

Mehmet Askiner
(Turkey)
