

TASK FORCE ON DISPLACEMENT (TF)

Aspects/ areas that a working group can achieve common understanding on at Excom 3?

- List of activities should be **an indicative one**, similarly to the NELs ToR in the Annex.
- **Simplification of the activities:**
 - Keep chapeaus of the activities (general description of possible activity), specific details to be left to the task force;
 - Avoid listing specific initiatives, platforms, use Annex as discussed two days ago.
 - Avoid repetitions with the main part of the ToR (e.g. do not repeat scope of work as an activity, activity should be more concrete);
 - Different levels e.g. national, regional/ supra-national/ cross-border to be considered in the context of the developing recommendations, as related to more than one activity – scope of work;
 - Guiding principles for the work of the task force refereeing to three functions of the WIM;
 - Activity (d) 3rd bullet + (e): on guidance/recommendations on how to integrate averting, minimizing and addressing displacement associated with climate change into existing policies/ development planning/ risk management strategies/NAP, as appropriate (correct language to be developed);
 - Timeframe to be developed by the task force – deleted from the ToR;
 - Ama to come back with activities related strengthening cooperation.
- **Size and composition of the task force:**
 - Additional experts (language from NELs)
 - Number: not possible to identify at the moment, put xxx

Issues/areas that may not be suitable for a working group setting at Excom3?

- Relationship with the ExCom, and – as a consequence – with the workplan (AA6 will provide a lot of information from the mapping exercise, issue of the sequencing, do not link it to one programme or another);
- Number: not possible to identify at the moment, put xxx;
- Finalization of the ToR – intersessionally
