- 19:15–20:05 Interactive discussion:
- What constitutes good practice (i.e. what are the key characteristics or elements that need to be provided in information on adaptation planning and practices to be considered a good practice) and lessons learned?
 - What are the key regional and thematic contexts?
 - What are the most efficient ways of recording and sharing good practices and lessons learned that can be promoted through the NWP to support greater action towards adaptation?

From words to action: a new working group to pick up the baton

20:05–20:20 Next steps (Facilitated group discussion)

20:20–20:30 Closing (*Ms. Lidia Wojtal, Chair of the SBSTA*)

¹A review group constituting members of the Adaptation Committee (AC), the Least Developed Countries Expert Group (LEG), and thematic experts from NWP partner organizations, undertook the preparatory exercise in reviewing and selecting the case studies for presentation at the Forum.

²Five case studies were selected for consideration out of 170 case studies contributed by the Parties and the NWP partner organizations, in response to the invitation by the secretariat, on good practices and lessons learned addressing the four issues of ecosystems, human settlements, water resources and health; and processes and structures for linking national and local adaptation planning. These five case studies with strong evidence of good practice were selected to provide contextual inputs for the discussion at the Forum.
