

Key points from Session 3: Planning and practices of EbA in adaptation policies and programmes

Knowledge management

- Guidance on **developing indicators**, including ecosystem functioning and resilience as well as adaptive capacity
- Compilation of **lessons learnt** – good and bad
- Process for **harmonizing goals** and indicators related to the three Rio Conventions
- Review of Nairobi Work Programme in light of **Cancun Adaptation Framework**, esp. para 12 on principles and para 14 on activities by Parties
- Review **LDC Expert Group document** and processes relating to NAPs for inclusion of NWP tools

Stakeholder engagement

- Guidelines on early and inclusive **stakeholder engagement** in project design phase
- Application of existing tools guiding the process of obtaining **Free, Prior and Informed Consent (FPIC)** from communities, e.g. new REDD+ guidelines
- Guidelines for integration of **local and traditional knowledge**, relationship with others forms of knowledge and processes of validation
- Facilitation of **South-South cooperation** through learning exchange visits and sharing of information
