Supplementary materials to document FCCC/SBI/2015/INF.11 (footnote 19) on Financial and technical support provided and received by Parties relevant to the process to formulate and implement NAPs, based on recent national reports submitted by Parties to the UNFCCC											
Country	Year	Source	Support category	Detailed support	Target	Summary	Amount	Currency	Comments	Date recorded	Document
Australia		BR1CTF	Technical	Capacity building	Viet Nam, Timor-Leste, the Philippines, Papua New Guinea, Solomon Islands, Vanuatu, Kiribati, Republic of Marshall Islands, Tonga, and Fiji	Community based Climate Change Action Grants scheme is a program supporting NGOs to work with local communities to build their capacity and resilience to climate change, focussing on disaster risk reduction, food and water security, agricultural productivity and ecosystem-based adaptation.			Australia's Communitybased Climate Change Action Grants scheme is a new program supporting non-government organisations to work with local communities to build their capacity and resilience to climate change, focussing on disaster risk reduction, food and water security, agricultural productivity and ecosystem-based adaptation.	October 2014	FCCC/SBI/2014/INF.25
Australia	2011	BR1CTF	Technical/ financial	Capacity building	Pacific	Pacific Australia Climate Change Science and Adaptation Planning Program (PACCSAP)	32,000,000	USD	1) improving scientific understanding of climate change; 2) better communicating climate science and adaptation knowledge to decision makers; and 3) improving adaptation planning in key development sectors. These programs have worked with Pacific island country scientists, decision-makers and planners to better understand past and future climate change, and to apply the information and tools to adaptation responses.	October 2014	FCCC/SBI/2014/INF.25
Australia		BR1CTF	Technical	Capacity building	Asia Pacific	Research for Development Alliance				October 2014	FCCC/SBI/2014/INF.25
Australia		BR1CTF	Technical	Capacity building	Viet Nam	Viet Nam Climate Change and Coastal Ecosystems Program			Australia has partnered with Germany and the Government of Viet Nam to help communities in the Kien Giang province to adapt to climate change and improve the management of coastal environments.	October 2014	FCCC/SBI/2014/INF.25
Australia		BR1CTF	Technical	Capacity building	Pacific	Climate and Oceans Support Program			Australia's Climate and Oceans Support Program in the Pacific is supporting Pacific meteorological services to use climate science to support planning in various sectors, including agriculture, water security and health.	October 2014	FCCC/SBI/2014/INF.25
Australia		BR1CTF	Technical	Capacity building	Pacific	Pacific Adaptation Strategy Assistance Program (PASAP)			The PASAP produced regional climate change research to provide country specific climate projections in the region and has been well received by Pacific countries, their development partners, and the international community. The PASAP supported Joint National Action Plans in nine countries	October 2014	FCCC/SBI/2014/INF.25
Australia		BR1CTF	Technical	Capacity building	Cook Islands, Federated States of Micronesia, Fiji, Marshall Islands, Nauru, Niue, Palau, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu, and Vanuatu	Pacific Adaptation to Climate Change Project				October 2014	FCCC/SBI/2014/INF.25
Australia	2011	NC6	Financial and technical		23 countries: Pacific South Asia, Southeast Asia, Africa and the Caribbean	International Climate Change Adaptation Initiative (ICCAI)			Australia provides policy and technical assistance to multilateral institutions, and targeted assistance through bilateral partnerships that support adaptation in developing countries. Australia's \$78 million ICCAI investment in 2011-12 funded efforts in 23 developing countries to reduce their vulnerability to climate change.	October 2014	FCCC/SBI/2014/INF.25
Austria		BR1CTF	Technical	Capacity building	Ethiopia	Conservation of the "Yayu Coffee Forest Biosphere Reserve"			The project supports conservation of the "Yayu Coffee Forest Biosphere Reserve" by fighting deforestation and forest degradation and simultaneously improving local livelihoods through "adaptive conservationdevelopment integration activities".	October 2014	FCCC/SBI/2014/INF.25
Austria		BR1CTF	Technical	Capacity building	Lao People's Democratic Republic	Management of the protected areas in the Phouchomvoy province			This project focuses on the management of the protected areas in the Phouchomvoy province and enlargement of national biodiversity protected areas to avoid further deforestation.	October 2014	FCCC/SBI/2014/INF.25
Austria		BR1CTF	Technical	Capacity building	Bhutan	Climate change adaptation potential of forests in Bhutan			With this project, the potential for adaptation measures to climate change as well as mitigation potential in Bhutanese forests will be determined and concrete activities to increase the resilience of forests (e.g. increase species diversity in early successional monospecific forests) will be started. Forest restoration strategies and activities for increasing carbon stocks as well as combating species losses, particularly on degraded lands will be developed using innovative participative tools.	October 2014	FCCC/SBI/2014/INF.25
Austria	2011	NC6		Capacity building	Africa (regional)		2,080,000	USD		October 2014	FCCC/SBI/2014/INF.25
Austria	2011	NC6		Capacity building	Burkina Faso		2,220,000	USD		October 2014	FCCC/SBI/2014/INF.25
Austria	2011	NC6		Capacity building	Cape Verde		30,000	USD		October 2014	FCCC/SBI/2014/INF.25

European Union		BR1CTF	Financial and technical	Capacity building	Nepal	GCCA (UK and Cyprus) support Nepal Climate Change Support Programme. focuses on building community resilience to climate change. Local communities will use a simple national adaptation framework to plan and prioritize adaptation activities.			The project also aims to enable the Government of Nepal (GoN) to adopt climate change policies and implement actions that increase benefits and sustainability of public as well as public private development efforts in a longer term.	October 2014	FCCC/SBI/2014/INF.25
European Union		BR1CTF	Financial and technical	Capacity building	Uganda	Improving livelihoods and food security in rural Uganda The project is tackling threat of climate change by focusing on the sustainable improvement of livelihoods and food security for the rural population.			The aim is to strengthen the resilience of the rural population and the agricultural production systems in the central part of the cattle corridor, and to build the capacities of communities, commercial farmers and the Government of Uganda to cope with climate change. Ireland has provided € 11 million for the project through the EU's Global Climate Change Alliance.	October 2014	FCCC/SBI/2014/INF.25
European Union		BR1CTF	Financial and technical	Capacity building	Peru	QESPIKUNA: Capacity building of local authorities and civil society actors for the integration of DRM in the sustainable development planning			"QESPIKUNA", an action supported by the NGO Practical Action together with local communities, has prioritized work in three regions of the Peruvian Andes to strengthen the capacities of local authorities and civil society for the integration of the Disaster Risk Management (DRM) in local sustainable development planning. The project seeks to disseminate and apply political and economic tools to allow appropriate social development planning and greater coordination and transparency among the institutions involved, prioritizing the use of Information and Communication Technologies (ICT).	October 2014	FCCC/SBI/2014/INF.25
European Union		BR1CTF	Technical	Capacity building	Mozambique	GCCA (Ireland and Denmark) support Mainstreaming of climate change into national systems and policies			Aiming at supporting the government of Mozambique's efforts in tackling the adverse effects of climate change, with a special focus on the most vulnerable communities in the rural areas of the country, this program seeks to increase the capacity of the Government to adequately mainstream climate change and climate-proofing initiatives into its poverty alleviation and development strategies. It benefits from support of the Global Climate Change Alliance (GCCA). Ireland and Denmark	October 2014	FCCC/SBI/2014/INF.25

Germany	2012	BR1CTF	Technical	Capacity development	Bangladesh	Resilient and inclusive city development- Social Infrastructure			KfW; The project aims to improve adaptation to the impacts of climate change and improved living conditions through increased protection of the population against extreme weather events such as floods, cyclones and floods in vulnerable coastal districts of Barguna and Patuakhali. This will be achieved by establishing and improving appropriate multifunctional protection infrastructure for human and partly animal and secure access routes to shelters. Target group is people living in the environment of the shelters primarily rural, poor population.	October 2014	FCCC/SBI/2014/INF.25
Germany	2012	BR1CTF	Technical	Capacity development	Global	DWD Support of National Meteorological Services of Developing Countries with respect to regional numerical weather prediction			High resolution regional numerical weather prediction (NWP) models are indispensable for reliable and timely warnings of authorities and the general public in case of severe weather events. With the availability of cost-effective Linux cluster computers and high-speed internet connections even weather services in developing countries are able to run such NWP models at their institutes if they are supported by experts of global NWP centers like Deutscher Wetterdienst (DWD).annual training workshops	October 2014	FCCC/SBI/2014/INF.25
Germany	2012	BR1CTF	Technical	Capacity development	The Caribbean	Climate risk adaptation and insurance in the Caribbean			The project supported by Germany is developing solutions for managing weather-related risks – due to extreme weather events, such as hurricanes and droughts. It is also supporting the development and launch of public safety networks and public-private insurance schemes for vulnerable population groups. To this end, it is bringing together three key stakeholders: the Caribbean Catastrophe Risk Insurance Facility (CCRIF) as a regional insurance pool, MicroEnsure, a pioneer in the provision of local insurance solutions, and the international reinsurer Munich Re.	October 2014	FCCC/SBI/2014/INF.25
Germany	2012	BR1CTF	Technical	Capacity development	Pacific Islands	Strengthening regional and national adaptation capacities in the Pacific Islands Region			Germany supports capacity development of 12 Pacific Island countries and several Pacific regional organizations in strengthening climate change adaptation activities. Building on the Pacific Island Framework for Action on Climate Change Germany supports together with the Secretariat of the Pacific Community (SPC) inter alia the development and implementation of joint national action plans on climate change and disaster risk management as well as national sustainable development strategies. On the local level activities include for example, a community-based ecosystem approach to fisheries management in Yap (Federated States of Micronesia).	October 2014	FCCC/SBI/2014/INF.25
Germany	2012	BR1CTF	Technical	Capacity development	Mekong region	Providing support to measures for adaptation to climate change in the Mekong region			In this project Germany supports the Climate Change Adaptation Initiative (CCAI) of the Mekong River Commission (MRC), a regional cooperation body of countries in the lower Mekong river basin. The CCAI serves as a knowledge and information hub for climate data and adaptation expertise with the aim to design regional adaptation strategies and advise MRC members in adaptation planning and implementation	October 2014	FCCC/SBI/2014/INF.25

Italy		BR1CTF	Financial		China	Sino-Italian Climate Change Cooperation Program (march 2011-ongoing) launched in 2011 aiming to start a joint program of mitigation and adaptation, transfer and promotion of low-carbon technologies, studies and researches as scientific support to decision-making.			The cooperation program includes the following main projects: • Capacity Building of Coastal Ecosystems to Climate Change Adaptation: The Project was implemented in Wenzhou city, involving on the Chinese side the State Oceanic Administration and Zhejiang Research Institutes. The objective is to build a methodology to evaluate the climate change effect on the coastal and marine environment, and identify actions for the protection of the coastal and marine environment. The key indicators of human activities and climate change pressure were defined. • Training Program on Climate Change and Sustainable Development: specific courses on "capacity building on climate change" and "climate change: policy, conventions and statistical systems".	October 2014	FCCC/SBI/2014/INF.25
Italy	2010	NC6	Financial		Cook Island	Capacity building	60,000	EUR		October 2014	FCCC/SBI/2014/INF.25
Italy	2010	NC6	Financial		Dominican Republic	Agriculture and capacity building	450,000	EUR		October 2014	FCCC/SBI/2014/INF.25

Japan	2011+2012	NC6	Financial		Ethiopia, Kenya, Djibouti, Sudan, Togo and Malawi	Water and sanitation	34,000,000	USD	Rural water supply projects. Japan repaired the water supply facilities in the areas which have been suffering from drought caused by climate change. For example, in Ethiopia, Japan constructed and repaired the water supply facilities and provided equipments for reconstructing wells in 10 districts where water supply was extremely poor and underwater development was technically and geologically difficult. In addition, in Sudan Japan improved water supply facilities and implemented plans to supply safe water stably with the residents. Moreover, in Togo, Japan supported the construction of 10 water supply facilities with engine pump as well as constructed 100 water supply facilities with human-powered pump and repaired 50 facilities. The project also includes interactive workshops on climate change, water, hygiene and sanitation for the pupils and the teachers.	October 2014	FCCC/SBI/2014/INF.25
Malta	2012	NC6	Financial		Kenya	Water and sanitation	53,404	USD	Construction of boreholes. The project aims at providing water for an educational facility run by missionaries and situated in Nairobi, through the construction of a borehole. This project will also serve to showcase adaptation approaches in a region susceptible to drought conditions. Funds budget for Fast Start Finance by the Government of Malta	October 2014	FCCC/SBI/2014/INF.25
Malta	2012	NC6	Financial		Philippines	Water and sanitation, Infrastructure	30,000	USD	Construction of water canals and access roads The project focuses on preventing damage caused by heavy rainfall through the construction of a system of water canals in a compound run by the sponsored organisation. The system will collect rain water, particularly during the rainy season, and dispose of it in a manner that does not adversely affect the local community. The project also included the construction of an access road, thus facilitating mobility in the area.	October 2014	FCCC/SBI/2014/INF.25
Malta	2012	NC6	Financial		Uganda	Agriculture	76,421	USD	Water and food scarcity projects. Targeted at rural families in rural areas near Jinja, dependent primarily on subsistence farming, the project will provide education on agricultural practices that increase resilience to climate change and enhance security of water and food resources. The aim is to establish rural women groups which can continue to disseminate information on climate-resilient agricultural practices long after the project proper ends. The Netherlands	2011-2012	NC6	Financial		Integrated Watershed Management Programmes	Coastal zone management, Water and sanitation			In relation to climate adaptation, The Netherlands supports various Integrated Watershed Management programmes. Since 2004, The Netherlands supports the Mekong River Commission on flood management (€11 million contribution). The Flood Management and Mitigation Programme (FMMP) builds on the Mekong River Commission's (MRC) Flood Management and Mitigation Strategy Implementation Programme (FMMSIP). The FMMP provides support through technical assistance, training and capacity building to identify flood risks in time and provide and install warning mechanisms. In Bolivia, the Viceministerio de Recursos Hídricos y Riego is implementing the National watershed Plan with a total budget of US\$108 million, to which The Netherlands contributes with US\$16 million.	October 2014	FCCC/SBI/2014/INF.25
The Netherlands	2011-2012	NC6	Financial		Red Cross/Red Crescent	DRR:integrate knowledge of climate risks into Red Cross/Red Crescent strategies			A noteworthy supported project is the establishment of the Red Cross/Red Crescent Climate Centre. The centre's main approach is to raise awareness; stimulate climate adaptation and disaster risk reduction (both inside and outside the Red Cross and Red Crescent); analyse relevant forecast information on all time-scales, and integrate knowledge of climate risks into Red Cross/Red Crescent strategies, plans, and activities. As of 2011, the Netherlands will support the 'Disaster Risk Reduction and Climate Change Adaptation Alliance', a co-operation that includes the Red Cross, Wetlands International, CARE, and Cordaid (total €36 million). In addition, in the programme of the Ecosystem Alliance of IUCN, BothEnds, and Wetlands International (€40 million), climate change formed an integral part of the design and implementation. The programme aims to improve rural livelihoods and ecosystem management and integrates adaptation to climate change.	October 2014	FCCC/SBI/2014/INF.25

The Netherlands		BR1CTF	Technical	Capacity building	Eritrea, Ethiopia, Côte d'Ivoire, Kenya, Kyrgyzstan, Liberia, Sierra Leone, Tajikistan, Turkmenistan	Capacity building programme Red Cross/Red Crescent Associations			This capacity building programme of the Red Cross/Red Crescent was financed from 2003. This programme focused on six countries in East and West Africa as well as Central Asia. During the International Conference of the Red Cross in 2007 it was decided to continue and extend the programme towards issues of resilience to disasters and climate change. The Netherlands then made another pledge	October 2014	FCCC/SBI/2014/INF.25
The Netherlands		BR1CTF	Technical	Capacity building	Bolivia	VIVIR CON EL AGUA – Management of flood risks in the Beni			he main problem in Beni area are the annual floods caused by intense rainfall in the basins of local rivers, the Andean basins of the Chapare and Yungas and large-scale flooding that occurs in the years of El Niño and La Niña.	October 2014	FCCC/SBI/2014/INF.25
The Netherlands		BR1CTF	Technical	Capacity building	Africa, Middle East and North Africa, Asia Pacific, Latin America and the Caribbean, LDCs, SIDS	DMH/HH WW/ISDR			ISDR aims to improve political and financial attention to Disaster Risk Reduction (DRR). Eventually, this will contribute to the Hyogo Framework of Action (HFA, which was designed in the UN after the 2004 tsunami). DRR is supposed to be integrated in policy and local institutions should be encouraged to focus on disaster management. DRR should be an integral aspect of national response to disasters and reconstruction.	October 2014	FCCC/SBI/2014/INF.25
The Netherlands		BR1CTF	Technical	Capacity building	Bolivia	Apoyo al Plan Estratégico Institucional de la Fundación Amigos de la Naturaleza (PEI-FAN)			The FAN project focuses on the management of protected areas for biodiversity conservation and the generation of scientific research and legislation with respect to biodiversity. The project stimulates communal and municipal reinforcement for biodiversity conservation in relation to the effects of climate change. The implementation is based on the development and examination of instruments for spatial management of protected areas, mitigation and adaptation and the role of institutions on three levels: national, departmental and municipal. The project also strives to offer a platform for flexible service to further the implementation of national biodiversity strategies	October 2014	FCCC/SBI/2014/INF.25
The Netherlands		BR1CTF	Technical	Capacity building	Viet Nam	Ho Chi Min City Flood and Inundation Management Project			Viet Nam is one of the most disaster-prone countries in the world and together with coastal typhoons flood is the natural disaster that causes most suffering. Not surprisingly the areas most prone to these disasters are some of the poorest parts of the country. Some solutions have already been implemented or are currently implemented, such as a drainage project, environmental sanitation programme and the flood control programme supported by the Government of Viet Nam (with support of JICA, World Bank and ADB). However, further measures and assistance are urgently required. Dutch expertise on water is useful, as the Netherlands is a country with a vast experience in flood management. Implementation of the project should contribute to alleviating flooding and inundation problems of HCMC through an integrated approach for flood and inundation management and by strengthening the technical and management capabilities of the Ho Chi Min City Steering Centre of Flood Control Programme and relevant Vietnamese agencies.	October 2014	FCCC/SBI/2014/INF.25

The Netherlands		BR1CTF	Technical	Capacity building	Mali	PASARC /NEF			Make significant progress in reducing poverty and hunger by targeting 100,000 people, spread over 14,300 households in 200 communities in the Mopti region. Additionally, the programme will strengthen the capacity of communities to address the sources of conflict and promote reconciliation between different ethnic groups, emphasizing stability and social cohesion. The investment fund aims to ensure better food security through enhanced water management efficiency and other measures that increase the resilient to climate change of the population.	October 2014	FCCC/SBI/2014/INF.25
The Netherlands		BR1CTF	Technical	Capacity building	Viet Nam	Flood Management and Mitigation Programme			The Flood Management and Mitigation Programme (FMMP) builds on the Mekong River Commission's (MRC) Flood Management and Mitigation Strategy Implementation Programme (FMMSIP). The FMMP provides support through technical assistance, training and capacity building to identify flood risks in time and provide and install warning mechanisms.	October 2014	FCCC/SBI/2014/INF.25
The Netherlands		BR1CTF	Technical	Capacity building	Mali, Benin, Ethiopia, Rwanda, Kenya, Sudan, Egypt, Congo, Mozambique, Indonesia, Pakistan, India, Brazil	UNDP Cap-Net Phase 3			Cap-Net is UNDP's global network to strengthen capacity building at the local level towards sustainable management and development of water resources and improved access to water supply and sanitation. Better resource and service management will result in a more sustainable use of increasingly scarce water resources, a reduction in water pollution, more productive water use, prevention of conflicts over water access and improved health.	October 2014	FCCC/SBI/2014/INF.25
The Netherlands		BR1CTF	Technical	Capacity building	Ethiopia, Philippines, Guatemala, India, Indonesia, Kenya, Mali, Nicaragua, Uganda	Partners for Resilience			'Partners for Resilience' consists of five Dutch organisations that aim to increase the resilience of citizens against natural disasters, climate change and deterioration of ecosystems. The alliance strongly believes in the role and importance of resilience to reach sustainable development in countries that are vulnerable to climate-related natural disasters. Resilience defines how people cope with natural disasters, but similarly how societies adapt to mitigate negative impact. By investing in the resilience of people, human suffering, degradation of ecosystems and material damage is reduced or even prevented. These five organisations have decided to work together and apply for government subsidy, which has been granted in November 2010.	October 2014	FCCC/SBI/2014/INF.25
The Netherlands		BR1CTF	Technical	Capacity building	Afghanistan	ICARDA			ICARDA contributes to economic growth and poverty alleviation in dry regions through sustainable increase in agricultural production. The main target group are the 'resource poor' who have insufficient means for their daily living, who are dependent on agriculture and herding of cattle and are vulnerable to food insecurity. Through research and technological development ICARDA contributes to agricultural productivity, an increase in the average income from agriculture and cattle herding and the sustainable use of natural resources.	October 2014	FCCC/SBI/2014/INF.25

The Netherlands		BR1CTF	Technical	Capacity building	Indonesia	Joint Cooperation Program Hydro Climate (JCP)			The Joint Cooperation Programme is part of the 'Water Mondiaal' Programme within the framework of the Dutch National Water Plan (2010-2015), within which Dutch expertise on water is transferred abroad. Indonesia is one of the five delta areas that take part in this collaboration. The JCP stimulates the sustainable development of agriculture, fisheries, forestry, sanitation, water management and coast protection. JCP emphasizes the need to take climate change into account in national, regional and global political-economic framework, to secure sustainable socio-economic development.	October 2014	FCCC/SBI/2014/INF.25
The Netherlands		BR1CTF	Technical	Capacity building	LDCs	Contribution to the Least Developed Countries Fund for Climate Change			The goal of the Least Developed Countries Fund (LDCF) is to support the Least Developed Countries (LDC's) to become climate resilient by integrating adaptation measures in development policies, plans, programmes, projects and actions. The LDCF was established to address the special needs of the Least Developed Countries (LDCs) under the Climate Convention. The LDCF was tasked with financing the preparation and implementation of National Adaptation Programs of Action (NAPAs). NAPAs use existing information to identify a country's priorities for adaptation actions. Consistent with the NAPAs, the LDCF focuses on reducing the vulnerability of those sectors and resources that are central to development and livelihoods, such as water; agriculture and food security; health; disaster risk management and prevention; infrastructure; and fragile ecosystems. NAPA implementation projects under LDCF are designed entirely in accordance with country priorities and executed by national stakeholders, and involving active participation of vulnerable communities.	October 2014	FCCC/SBI/2014/INF.25
The Netherlands		BR1CTF	Technical	Capacity building	Africa, Middle East and North Africa, Asia Pacific, Latin America and the Caribbean, LDCs, SIDS	World Resources Institute (WRI)			The Dutch government supports WRI's work on international climate change issues. WRI's climate programme affects international climate policy to a large extent. 8 countries are using the National Adaptation Capacity framework as part of their adaptation plans. Sweden	2012	BR1CTF	technical	technology transfer	Bangladesh	Reduce people's vulnerability to natural disasters			The Comprehensive Disaster Management Programme has contributed to reduce people's vulnerability to natural disasters, including negative effects of climate change. The programme has worked on many different levels to strengthen the legal framework for disaster management, build capacity and strengthen coordination between various ministries and agencies, etc. It has also, among other things, contributed to an improved national early warning system for weather related disasters. Through use of mobile phones and the mobilisation of tens of thousands of volunteers, more than 50 million people can now be reached by the early warning system.	October 2014	FCCC/SBI/2014/INF.25
Sweden		BR1CTF	Technical	Capacity building	Mozambique	Implementation of Pilot Projects Local Adaptation Program of Action			Increase resilience to the adverse impacts of climate change in 9 villages in Mozambique through implementation of adaptation measures and catalysing local activities	October 2014	FCCC/SBI/2014/INF.25
Sweden		BR1CTF	Technical	Capacity building	Cape Verde, Mozambique, Sao Tome and Principe	Integrating Adaptation to Climate Change into Development planning			Contribute to reducing vulnerability to the impacts of climate change in Cape Verde, Mozambique and Sao Tome and Principe, creating capabilities to integrate the response to climate change vulnerability in the process of designing policies and projects- Enhance the skills for the design of policies and projects that are resilient to the impacts of climate change and simultaneously consistent with the Sustainability Development Goals, particularly poverty reduction and environmental sustainability	October 2014	FCCC/SBI/2014/INF.25
Sweden		NC6	Financial		South-East Asia	Support to Mangroves for the Future in several countries			The programme has contributed to improved food security for more than 1,000 people living in poverty by securing 24 million cubic metres of water for food production. Irrigated plots have been distributed and production of vegetables for the local market has started.	October 2014	FCCC/SBI/2014/INF.25

USA	2012	BR1CTF	Financial		Pilot Program for Climate Resilience		18,700,000	USD	It also provides a Web-based platform to improve open access to satellite information, imagery, and other decision-support tools to inform agriculture, water, energy, health, forest and land planning and management, ecotourism, and disaster preparedness and response, among other areas.	October 2014	FCCC/SBI/2014/INF.25
USA	2010-2013	NC6	Financial		Central America, Eastern and Southern Africa, and the Hindu Kush-Himalaya region	NASA provided satellite data, ground-based observations, and forecasts that directly tailored to the needs of decision makers to help them avoid climate-related hazards and improve development outcomes.	41,000,000	USD	It provides information and early warning on seasonal climate patterns and challenges to food and water security in communities vulnerable to climate variability and change; monitors agriculture, climate, and market data; and helps decision makers anticipate and respond to food insecurity. This and other efforts are transforming the ability of developing countries to use science to improve their decision-making processes and strategies.	October 2014	FCCC/SBI/2014/INF.25
USA	2010-2013	NC6	Financial			FEWS NET to support the Famine Early Warning Systems Network	52,000,000	USD	USAID is investing \$8 million in the R4 Rural Resilience Initiative, which will overcome cash constraints by enabling the poorest farmers to pay for their insurance with their labor by working extra days on community risk reduction projects, such as improved irrigation or soil management. USAID is also supporting the expansion of an index-based livestock insurance program from Kenya to Ethiopia to help protect herding families from losses due to severe drought. This initiative has leveraged \$1.2 million in private investment and expertise from global reinsurer Swiss Re.	October 2014	FCCC/SBI/2014/INF.25
USA		NC6	Financial			R4 Rural Resilience Initiative: USAID to insurance to help poor farmers manage weather risks		USD	C-CAP is building local capacity for disaster risk reduction and preparedness, and integrating climate-resilient policies and practices into longterm land-use plans and building standards. The program is expected to benefit approximately 90 communities in up to 12 Pacific Island nations.	October 2014	FCCC/SBI/2014/INF.25
USA		NC6	Financial		12 Pacific countries	Coastal Community Adaptation Program (C-CAP) to help reduce the vulnerability of coastal communities to the impacts of climate change	23,600,000	USD		October 2014	FCCC/SBI/2014/INF.25
USA	2011	BR1CTF	Financial		Multiple Regions, Multiple Countries	Adaptation: cross-cutting	301,712,443	USD		October 2014	FCCC/SBI/2014/INF.25
