

Working document

[Section J – Time frames and process related to commitments/contributions Other matters related to implementation and ambition]

Version of 2 September 2015 at 23:30

Observations and notes by the Co-Facilitators:

- Discussions continued in order to allow all Parties to share their initial views on the Co-Chairs' Tool. In particular, Parties continued to discuss issues around scope, timing, communication of commitments/contributions, collective stocktaking and housing. With respect to housing, it was recognized that housing did not sit well in this section and would be more suited to other sections, such as section L on procedural and institutional provisions. However, at this session, it would be addressed in the facilitated group on timeframes and process.
- As a number of Parties had raised cross-cutting issues, the Co-Facilitators would invite the Co-Facilitators for finance and for transparency of action and support, as well as those for mitigation and for adaptation and loss and damage, to the next facilitated group meeting that is due to be held on Thursday, 3 September 2015.
