

Section K, Option I¹

Version of 5 June 2015 at 22:45

Output of facilitated meeting

Consideration of Option I

Observations:

- It was observed that the section offers several alternative models for arrangements for implementation and compliance. Parties agreed that within Option I:
 - Paragraph 194 Option 7 should be presented as a standalone option, i.e., as Option IV.
 - Paragraph 194 Option 8 should be presented as a standalone option, i.e., as Option V.

General observations

- There was recognition that concepts in the section can be labelled, or alternatively, categorized into baskets or high-level categories. Parties have identified that discussion on these baskets or categories is necessary in order to unpack paragraphs and clarify concepts and elements. Parties showed interest in exploring possible baskets or categories for these concepts and elements.
- A number of Parties observed that a discussion on compliance is challenging and premature due to lack of clarity on the legal form of the agreement and the nature of contributions.
- A number of Parties were of the view that a detailed discussion of this section is premature but expressed their willingness to explore concepts and identify possible options for a compliance mechanism that would be contingent on the legal form of the new agreement.
