Other issues related to elements: structure of the agreement

Questions Suggested by the Co-Chairs

13 June 2014

Many Parties in their submissions and interventions have raised issues relating to the structure of the 2015 outcome and the implications this will have for the elements of the draft negotiating text. These include:

- Issues relating to inter-relationships and cross-linkages between elements
- Issues that are cross-cutting across elements
- Issues relating to placement – which issues are best addressed in the agreement and which issues are more suitable for COP decisions
- Issues relating to timing – whether issues need to be addressed in Lima, in Paris or later
