

ADP 2-5
Contact Group on item 3

Workstream 2
(Pre-2020 ambition)

Questions suggested by the Co-Chairs
5 June 2014

Recognizing and encouraging progress on pre-2020 ambition

- How should the COP be informed of the progress in increasing pre-2020 ambition resulting from the TEMs and how could this be recognized and be given higher visibility?
- What action should the COP take in relation to the UNFCCC institutions and the support they provide to Parties pursuing the implementation of options from the policy menus identified in the TEMs?

Further strengthening the work plan on enhancing mitigation ambition

- What additional activities could be introduced under the work plan on enhancing mitigation ambition that would help Parties to scale up the implementation of mitigation action in 2015? Should the Technical Expert Meetings continue or not?
- Given that the mandate for the ADP will expire in Paris, what action could the COP take in Lima as a step toward establishing longer term arrangements for enhancing ambition?
