

## G77/CHINA ADP WS2 POINTS

- Recognition and appreciation for the Collaborative nature of the WS2 Space as well as unique characteristics: by exploring mitigation potential and co-benefits in other areas, engaging a broader community of actors, and all in a facilitative exchange of views;
- After 3 years of focused and intense sectoral exploration – **Challenge now is turning the identified Potential into Reality.**
- To achieve such an outcome we should be ready to cover all essential aspects to unlock and transform the potential in the ***6 already identified areas***; from ***lifting financial to non financial barriers, as well as harnessing both demand and supply side incentives, at global, regional and local level...***
- Important in going forward with the work to maintain a country driven and country owned approach, respecting developing countries nationally determined priorities
- Also important this year in the process design is given due consideration – to “hone and focus” on harnessing developed countries’ significant mitigation potential

**NB: On paras 3 and 4 (Warsaw) and paras 17 and 18n (Lima) – G77/China Coordinator will ask the ADP Co-chairs (before the beginning of the session) how they intend to take up this work in Geneva**
