

Para 50 options 1, 11

[All Parties, [in accordance with the principles and provisions of the Convention, its Article 4 and their common but differentiated responsibilities and previous decisions of the Conference of the Parties (COP), to] [commit to cooperate to adapt to the adverse effects of climate change, ensure resilience and protect citizens and ecosystems in the context of the long-term temperature limit and to achieve sustainable development [in the context of poverty reduction and maintaining food security], [while recognizing the local, national and transboundary dimensions of adaptation]:

- . 50.1. [All Parties][Developed country Parties][Annex X Parties][all countries in a position to do so] to undertake the steps necessary to ensure that the level of support meets the needs for adaptation in [developing countries][Parties not included in annex X] [in the context of the long-term temperature limit: request to the SBSTA to develop methodologies for this purpose;
- . 50.2. Addressing climate resilience and sustainable development trajectories that combine adaptation to and mitigation of climate change and its impacts;
- . 50.3. All Parties commit to increase efforts to adapt to climate change impacts, reduce vulnerability and increase resilience in the context of the actual increase in global mean temperature, taking into account the relationship between mitigation ambition, associated climate change impacts, and consequent adaptation needs, costs, and co-benefits;
- . 50.4. All Parties commit to increase efforts to promote systematic observation and enhance national capacity in the area of scientific, technical and other research in accordance with the provisions of Article 4, paragraph 1(g), and Article 5 of the Convention].

Para 50 options 4, 5 and 13

[A global goal for adaptation is hereby established, with the purpose of enhancing the implementation of adaptation actions, in particular in developing countries, as part of enabling economic development in the context of sustainable development]. [All Parties take action and cooperate to reduce vulnerability and build resilience to the adverse effects of climate change.]

[The global goal for adaptation shall provide for supporting enhanced adaptation and sharing best practices by all Parties; the understanding of adaptation needs in the light of mitigation ambition; the provision of adequate support for developing countries to meet their adaptation needs; and the recognition of adaptation investments by developing countries as part of their contribution to the global effort]. [The goal has both qualitative and quantitative aspects, including elements of knowledge dimension informed by science, planning and policy aspects].

[The global goal for adaptation affirms that adaptation is a global responsibility and further:

- a. Establishes a platform for all Parties to communicate their efforts towards achieving the global goal on adaptation, as well as for the exchange and sharing of best practices on the formulation and implementation of adaptation measures;
- b. Acknowledges that historical emissions and the level and pace of both current and future mitigation efforts will determine the extent to which Parties will need to adapt to the adverse effect of climate change and address loss and damage resulting therefrom and the associated costs thereof;
- c. Notes that since adaptation efforts will need to be undertaken far in advance of the temperature rise, planning for adaptation and undertaking adaptation should be based on an evaluation of temperature scenarios that are expected to result from particular levels of mitigation action;
- d. Agrees that in order to determine levels of adaptation support (finance, technology, and capacity) required for a given commitment period, the ex ante assessment of aggregate mitigation action and associated temperature rise shall be used as a basis, including in the consideration of nationally determined needs for adaptation;
- e. Notes that levels of adaptation finance provided by developed countries should be commensurate with meeting the costs of adaptation in developing countries, particularly those in Africa, the least developed

countries, and small island developing States, in accordance with developed country Party obligations under Article 4, paragraph 4, of the Convention;

- f. Provides for recognition of adaptation investments of developing countries as part of their contributions to the global effort to address climate change.]

Para 51.7 (option 3) Bullet point b options i and ii

[Contribute to the achievement of sustainable development, which] [may] include economic diversification [in an equitable manner] [in the context of their specific needs and special circumstances];

Para 51 options 8 and 10

Each Party [to prepare and implement its adaptation commitment/contribution/action under Article 4 of the Convention; developing country Parties] to integrate adaptation with national development planning, [mainstream adaptation into national policies] undertake the national adaptation plan (NAP) process, and/or strengthen governance [and enabling environments]; [and Annex II countries to enhance their support subject to the modalities and procedures to be developed and adopted by the governing body.] [All Parties should take adaptation actions. Those Parties with limited capacities require support from those countries in a position to provide such support].
