

# UNEP Support to INDC Process

## UNEP DTU Technical Assistance

Jørgen Fenhann, Senior Scientist  
Low Carbon Development Programme

# Areas of support

- **UNEP DTU is providing technical support to 30 countries under the GEF funded UNEP INDC Support Programme.**
- **UNEP DTU's Technical Assistance consist of:**
- **Defining the scope and nature of INDCs**
  - The scope of work depends on the content (mitigation, adaptation, etc.
  - A stock tacking and country background analysis
  - Detailed scope of work - including contents and nature of INDCs identified.

# Areas of support

- **Designing, organizing and conducting training sessions/workshops**
  - Two workshops organized in Copenhagen:
    - 20-22 May - 12 countries and 30 participants
    - 30 June - 02 July - 18 countries, more than 40 participants expected.

# Areas of support

- **Analytical support**

- Common platform - INDC national process to be consistent with UNFCCC process and with countries selected scope of work
- The purpose is to create a uniform understanding among all Parties of the INDC process and a common format for reporting INDC.
- This will enable a comparable technical analysis by the UNFCCC.

# Areas of support

- **Analytical support**
- **Technical analysis of the country's current circumstances on climate change**
  - A stocktaking and analysis of current data and existing efforts to address climate change
  - A detailed stocktaking will be conducted by the national expert
  - Calculations and forecastings: GACMO; other models...
- ***Requirements for the phase*** - UDP will implement the following activities:
  - Guidance manual to enable countries understand the INDC process and its requirements;
  - Technical manual for analysis and modelling tool (in case of countries confirm the use of the GACMO model under development by UDP)
  - Template for stock taking report of current country situation related to climate change
  - Templates for preparing and submitting the INDCs, and templates for final project report.
- ***Output***
  - Draft INDC report outlining various options for each of the elements of the INDCs.

# Areas of support

- **Support the political endorsement of the draft INDCs options**
  - National consultation workshop
  - Support is provided for political approval
  - Support Final submission of INDCs to UNFCCC.

# Areas of support

- **In-Country Specific Technical Assistance.**
  - Direct support to undertake analysis (mitigation and adaptation)
  - UNEP DTU works closely with the national consultant(s) to:
    - support identifying data needs and collection,
    - application of methodology for analysis (GACMO Model)
    - revision of analysis.
  - Review all national activity outputs - quality control; substance and consistency with UNFCCC requirements.
  - Support in preparing and finalizing INDC report ready for political endorsement

# THANK YOU
