Enhance Capacity Building through South-South Cooperation

Zhang Yucheng International Cooperation Division, Climate Change Department, National Development and Reform Commission, P.R. China

South-South Cooperation on Climate Change in Action

➤A practical model for international cooperation on climate change

> An opportunity and platform for experience sharing and enhancing capacity building

Voluntary actions to meet the urgent needs:

Projects on: clean energy, agricultural droughtresistance techniques, use and management of water resources, monitoring sea level rising ;

Training courses on: technologies used for small hydropower stations, application of solar energy technologies, water-saving irrigation and renewable energy technologies

Initiatives of the Chinese Government

- In Durban, the Government of China announced that from 2011- 2013, 200 million RMB would be allocated to support other developing countries enhancing their capacity in addressing climate change.
- Providing energy conservation products and facilities and organizing training programs;
- Cooperation on adaptation, especially fostering the deployment of adaptation technologies;
- Recipient countries: Ethiopia, Grenada, Samoa, Maldives, Madagascar, Zambia, Chad, Benin, etc.

The Climate South-South Cooperation with Key Partners

For the National Development and Reform Commission of the People's Republic of China (signed)

AUZ TH

For the Ministry of Highe Education and Scientific Researc of the Republic of Benin (signed) Memorandum of Understanding

batwaan

the National Development and Reform Commission of the People's

Republic of China

and

the Ministry of Higher Education and Scientific Research of the

Republic of Benin

Concerning

the Provision of Goods for Addressing Climate Change

The National Development and Reform Commission of the People's Republic of China and the Ministry of Higher Education and Scientific Research of the Republic of Banin (hereinafter referred to as the "two parties").

Recalling the long-term mutual support and cooperation as well as the positive dialogue and collaboration between the two parties in the field of climate change;

Acknowledging that climate change and its adverse effects are common

Memorandum of Understanding Concerning the Provision of Goods for Addressing Climate Change.

Organizing Training Programs

- A series of thematic workshops and seminars on addressing climate change for developing countries were organized.
- A total number of 380 government officials and experts from 87 countries benefited from the programs.

Organizing Training Programs

- > A wide range of topics for training programs
- Training courses overseas

Climate Change Education for Young

Educational materials published;

- Opportunities of participation in international climate change events provided for the young people;
- International Youth Leadership Summit for Climate Champions;
- Other joint initiatives, such as UNICEF

Public Awareness

> 1st National Low Carbon Day : 17th June 2013

> The very first initiative in raising the public awareness of climate change and sustainable development in the international community

Building up the national consensus on combating climate change

Intense publicity nationwide: public service advertisement on national and local television; climate change exhibition; low carbon day for the Youth; community-led activities; Photographic exhibition on low carbon life.

Ways of Exploring Cooperation

- Leveraging international resources with a view to better facilitating and exploring ways of South-South Cooperation
- GEF-SCCF: A cooperation between NDRC of China and UNEP- an innovative partnership with international organizations
- Mauritania, Nepal, and Seychelles are identified as the pilot countries of the project.

- > Enhancing south-south cooperation through deversified and effective models
- Wider ranges and larger scales

Thank You I
