OZONE DAY 2011

Message by Han. Mohamed Asiam, the Minister of Housing

This year's theme 'Ozone Layer Depletion: Governance and Protection at Their Beef high lights the importance or national compliance and sixong commitment around the world to the protection of the Ozone layer.

The Montreal Protocol has achieved a unique stata among the existing multilateral eave/connects agreements through universal participation and has bee regarded as the most successful agreement in achieving coals and targets in protocting the environment. It has provided whotsmist global warming reduction benefit than helping to manage the twin challenges of ozone lays protection and the climate system.

Today, as we celebrate the Ozone Day, we are agai reminded of the greet challenge abead of us in saving the planet. The road ahead is not easy, but with continue support from the associated agencies we have no doub about achieving our targets.

Makilves has declared its commitment to phasing-out if Hydrochkow flourocarbons (HCFCs) by 2020, 10 year earlier than the actual accelerated phase-out schola agreed by the member countries. This scholade Makilves is aligned with the carbon neutrality plans Makilves, siming to achieve dual benefits by eliminating Ozone depleting substances and also reducing carbo

Total phase-out of HCFC will contribute to eliminati 130,000 Mt equivalents of CO2 emission, which estimated to be 20% of total carbon emissions Maklians.

The steps that the Maldives is taking with regard to a environment are bold and uncondisional and hope to imprizational to other nations as well. Our commitment mitigate climate change underlines how crucial it especially for low lying is fand states and other vulneath analous to ensure that scalous is taken in time to ow wiping out of entire civilizations in small is land state

The High Level Round Table Dialogue on the HCPC Phase-out! Management Plan (IPMP) and in contribution touchnon neutrality inhald down held in his this year helped to reaffirm the government commitment to achieving HCPC phase-outly 2033; or the endorsement of valous Government ministrie and private organizations involved in the HTMP implementation plan, and to game the much-needed successful for the properties of the properties of contributions of the properties of the properties of properties properties properties of properties of properties of properties of properties of properties of properties properties of properties propert

With the involvement of relevant stakeholders we have now formulated a road map to implement the HPMP and are geared towards achieving the set targets. When the hdtp of the HPMP Steering Committee which was recently formulated by the President, we are now to take further relevant measures to control HCFC

We are truly grateful to MLF, UNEP, UNDP and it regional office for their continued support and assistance in implementing ozone related projects. We all appreciate the continued support and on-operation from the member countries in implementing activities und the Montreal Personal.

Constrains

- Inefficient utilization of the existing resources and disparities between donor funds and donee's sectoral needs. Poor aid coordination further adds to the problem.
- Poor inter/intra sectoral commitment and coordination and poor integration of the existing plans within the sector.
- Lack of a common platform for data sharing or information dissemination.
- Lack of financial resources for the implementation of the programs and strategies.

- Partnering with NGOs
- Grass root level awareness programme
