SUBMISSION BY HUNGARY AND THE EUROPEAN COMMISSION ON BEHALF OF THE EUROPEAN UNION AND ITS MEMBER STATES

Budapest, 11 May 2011

Annex to the EU Fast start finance Report for submission to the UNFCCC Secretariat – Individual actions supported by EU fast start financing
## Individual actions supported by EU fast start financing

*Updated data on specific examples of Fast Start Climate Finance actions, to accompany the 2010 EU Fast Start Finance report for the UNFCCC secretariat*

<td>mitigation</td>
<td>EBRD TA for Improving Energy Efficiency of Buildings in Russian Districts</td>
<td>2009-2011</td>
<td>EBRD</td>
<td>2,0 grant</td>
<td>grant</td>
<td>The Austrian funded TA Project seeks establish a sustainable market for energy efficiency (EE) and renewable energy (RE) investments in Armenia. The Project will achieve this goal by: 1. Supporting the development of renewable energy financing through local financial institutions; 2. Creating a platform to support financial institutions in the development and marketing of energy efficiency lending; 3. Improving the regulatory framework for the development of renewable energy; 4. Increasing the awareness of RE project developers and the expertise of local design companies on the application of modern design solutions and new technologies to ensure the long-term sustainability of RE projects; 5. Building awareness and market demand for sustainable energy finance through a broad public awareness campaign.</td>

<td>2.3</td>
<td>grant</td>
<td>The program addresses the challenges posed by energy security, poverty reduction and climate change through its core functions as a think tank and knowledge clearing house, but also through operational leveraging. ESMAP assists low- and middle-income countries to promote environmentally sustainable energy solutions for poverty reduction and economic growth. ESMAP offers pre-investment activities such as analytical and advisory activities, studies, pilot projects, conferences, training and workshops, but not investments themselves. A priori the potential of investments are analysed, while ex post best practices are gathered, evaluations are undertaken and knowledge is transferred. The total budget for the ESMAP 2008-13 Business Plan is estimated at US$55 million.</td>

<td>EBRD</td>
<td>2.0</td>
<td>grant</td>
<td>The Global Environment Facility (GEF) provides grants to developing countries and countries with economies in transition for projects related to biodiversity, climate change, international waters, land degradation, the ozone layer, and persistent organic pollutants. 33% of GEF Funds are directly allocated to climate change programs to the overall objective of the UNFCCC. Cross elements of climate change are also found in other areas of GEF. Austria fast start support for the GEF, € 14 Million, is calculated from Austria contribution to GEF-5 using the climate change focal area allocation of GEF-5 (33%). Austria’s total contribution for GEF-5 is around 75 % higher than for GEF-4. Total contribution for GEF-5 is € 42,6 Million.</td>

</table>

The purpose of the project is to conserve forests in the Pacific Island States in order to avoid greenhouse gas emissions. To achieve this, REDD+ processes are to be initiated and implemented in island states and a regional REDD+ strategy is to be elaborated. The actors will be enabled to earn carbon credits for forest conservation: a direct contribution to the reduction of greenhouse gas emissions. Regional cooperation will make it possible to address the problem of leakage at a supranational level. Sustainable forest management and reduced greenhouse gas emissions will become a shared concern for government, civil society and the timber industry.

The project aims to promote low carbon sustainable transport systems in India through modal substitutions and technological improvements. To this end an integrated assessment for the transport sector in four cities will be carried out and linked to the national and city level.

The project aims at mapping potential for solar power production and thus furthering the production of renewable energies.

The programme's objective is to deepen the Indo-German research cooperation in the field of innovative clean energy technologies. Within the programme, it is foreseen to finance e.g. research/testing facilities in the field of solar thermal energy and further renewable energies, as well as related capacity building measures.

In Indonesia, the statistical basis for the efficient use of climate adaptation information and the formulation of appropriate adaptation strategies are still insufficient. There is a lack of scientific capacities as well as of human, financial and technical resources. Accordingly, the purpose of the project is to improve Indonesia’s ability to adapt to climate change impacts by means of an improved statistical basis and a standardised processing of data. A further goal of the project is to create an information management system to support planning, implementation and monitoring of adaptation measures.

The purpose of this project is to help Morocco expand its wind and other renewable energy sources. This will be achieved by establishing a national competence network and holding information and training events.

Implementation of a flood warning system along the river Chire and sensitisation of the local population.

Goal of the project is to support the Peruvian government during the development of a national REDD-system. It will then be possible to integrate sub-national approaches into the national REDD-politics.

This project will support the Peruvian environmental ministry during the development and exemplary testing of the tropical rainforest programme "Conservando Juntos".

During the implementation of the project the development of an innovative insurance system in order to cover the risks of climate change will take place. The project goal ist to establish a sustainable market for insurances in the agricultural sector.

Strengthening of local population by information on possible adaptation actions to climate change and initial implementation as well as development of climate proofing methodology.

<td>The objective of the programme is to strengthen the capacities of development countries to strengthen ecosystem resilience for promoting ecosystem based adaptation (EBA) options and to reduce the vulnerability of communities, with particular emphasis on mountain ecosystems. Specifically the project will support: (i) the development of methodologies and tools for mountain ecosystems; (ii) the application of the above tools and methodologies at the national level; (iii) the implementation of EBA pilots at the ecosystem level; and (iv) the formulation of national policies and building an economic case for EBA at the national level. The programme will create new opportunities for experimental learning between regions and among countries within the same region. Through parallel and cooperative development and application of methodologies and tools and the implementation of pilot projects, the project will shorten the learning curve of local and national institutions and fast track the transfer of knowledge and experience building ecosystem resilience.</td>

</tbody>
</table>
The Global Climate Partnership Fund (GCPF) is an innovative funding instrument that should allow highly effective investments to be made in climate-relevant projects in selected countries. This involves providing local financial institutions with credit lines, with which they can in turn offer loans for investments in renewable energy, energy efficiency and the reduction of greenhouse gases. The focus is currently on Brazil, India, China, South Africa, Indonesia, Viet Nam, the Philippines, Chile, Mexico, Turkey, Tunisia, Morocco and Ukraine. Further countries can be included at a later date.

The project objective is to provide scientific and strategic support on demand for the negotiating delegations from least developed countries (LDC) and small island developing states (SIDS) providing briefings, analyses and modelling tools. It builds on a successful first phase of the project.

The Adaptation Fund has been established by the Parties to the Kyoto Protocol of the UNFCCC to finance concrete adaptation projects and programmes in developing countries that are Parties to the Kyoto Protocol.

PPCR is a program für climate change adaptation under the Strategic Climate Fund (SCF), which is one of two funds within the design of the Climate Change.

The Programme was launched to assist developing countries prepare and implement national REDD+ strategies, and builds on the convening power and expertise of FAO, UNDP and UNEP. The Programme currently supports REDD+ readiness activities in several countries, spanning Africa, Asia and the Pacific and Latin America.

| FI | Indonesia | Mitigation | Indonesia Energy and Environment Partnership | 2010-2012 | 4,00 | grant |

One of the Finnish key projects has been the Energy and Environment Partnership Program (EEP) which aims to promote renewable energy, energy efficiency, and clean technology investments in selected program countries, with the twin objectives of providing sustainable energy services to the poor and simultaneously combating climate change. The Energy and Environment Partnership with Central America (EEP-CA), was launched by the Ministry for Foreign Affairs of Finland and the seven participating Central American countries in 2002, during the United Nations World Summit on Sustainable Development. Since 2003, Finland has allocated a total of 7 MEUR for the partnership, for the period 2010-2012, a total of 6 MEUR has been allocated. Based on the encouraging results from the Central American EEP, the MFA Finland has initiated similar programs in other regions (Mekong 2009-12 4,9 MEUR; Indonesia 2010-12 4 MEUR; Southern and East Africa 2010-12 8,5 MEUR; and Andean Region 2010-12 6 MEUR).

| FI | Nepal | Adaptation/Climate | Increased Capacity of Hydrometeorological Services ICI-project | 2010-2012 | Finnish Meteorological Institute | 0,49 | grant |

The project aims to improve the capacity of the Department of Hydrology and Meteorology under the Ministry of Environment in hydrometeorological observations, services and international data sharing and thus improve the capability of the Government of Nepal to respond to the increased risks of natural disasters related to weather and climate.

| FI | Global | Capacity building, gender | Support for GGCA for Gender Mainstreaming in Global Climate | 2010-2011 | Global Gender and Climate Alliance (GGCA) | 2,60 | grant |

The Global Gender and Climate Alliance brings together key UN actors in the field of international environmental and development policy to address the question of gender and climate change. Its main goal is a more widespread recognition of a gender perspective in decision making and policy planning related to climate change. Participation of women government delegates to UNFCCC negotiations is supported through the Women Delegates Fund.

<td>Agriculture and land use are responsible of around 30 percent of the emissions and have a significant potential for mitigation. The goal of the project is to enable countries to better realize the opportunities of climate change mitigation in agriculture while improving food security and increasing resilience of farming systems at the same time. The project implementation can be divided into five modules: 1) Better knowledge support 2) Increased awareness, participation and partnerships; 3) Strengthened technical consultative processes; 4) developed communities of practices and 5) Development and advice on options. The duration of the project is five years (2010-2014) and the total budget is about 40 000 000 Euros.</td>

Based on bilateral agreements between the Italian Ministry for the Environment, Land and Sea and the Ministries of Environment/Energy/Water Resources, with the participation of UNEP, the Program covers various projects including preservation and ecosystem management, pilot mitigation actions for the use of the flare gas produced in the oilfields, monitoring of the forest resources and soil erosion processes, activation of fuel switching mechanisms in selected areas of Iraq, optimisation of water and energy utilization for water and sanitation services, environmental analysis of the Iraqi coastline and proposals for sustainable development, promotion of the development of green belts in the areas affected by sand-storms and the re-seeding of degraded rangelands, strategies and actions to adapt to the extreme drought event.

The Project objective is to strengthen the capacity of the local authorities (i) to monitor and manage biodiversity in the Bogeda Biosphere Natural Reserve and in the Kanas National Natural Reserve, (ii) to collect, update and store biological, ecological, hydrological and human activities information so to enable the prioritization of management and advocacy decisions as well as enhance scientific research and (iii) to systematically identify values, threats and potential management actions.

Support beneficiary Countries in developing and implementing environmentally sound, sustainable energy policies and in executing a number of renewable energy pilot projects focusing on ecosystem conservation and livelihood enhancement.
