Discrepancies in reporting of climate finance data between CTF, BR1 and NC6 and across Parties

- Differences in **sectoral attribution**;
- **Different amounts** reported for the same type of support/activity;
- **Different level of precision** (the number of digits reported for the amounts);
- **Different currencies** reported in the BR1 from in the NC6, with no provision of the exchange rates used;
- **Differences in reporting periods** and in the use of calendar versus fiscal year.

Discrepancies in reporting of climate finance data between CTF, BR1 and NC6 and across Parties

- Differences between reported **contributions to multilateral institutions**, (which may be due to the differentiation between core/general contributions versus climate-specific contributions in the BR1)
- Differences **in the status of the funds** reported on (i.e. whether the specific amount reported on was pledged, committed or in fact provided/disbursed)
- Difference **in amount reported** (In a few cases, some amounts were missing from one report but provided in the other).
