

Ms. Isabelle Proulx

Programme Manager, International Development Research Centre (IDRC)

Isabelle Proulx is a hydrogeologist with experience in applied research and climate change programming within Canada and in developing countries.

Over the last 10 years, her work has focussed on climate change adaptation, at Agriculture and Agri-Food Canada, the Office of the Auditor General, Natural Resources Canada, and now at IDRC.

She currently oversees the work of 3 teams delivering a total of about CAD 150 million in applied research, including with Fast Start Climate Finance from the Government of Canada, and a joint program on climate change hot spot in partnership with the United Kingdom's Department for International Development.
