

*Fraser Brown, WeForest, 10/11/2014*

To whom it may concern,

Please find attached information that WeForest considers relevant to expand the background paper by the Committee, and that is submitted in response to the UNFCCC call for papers on financing for forests due today 10th November 2014.

Although not specifically incorporated in nor referenced in the material submitted, I would like to take this opportunity to highlight three additional documents that could be considered by the committee in the synthesis of this background paper. They are:

1. European Tropical Forest Research Network: Good Business: Making Private Investments Work for Tropical Forests
2. The Forest Dialogue: Guide to Investing in Locally Controlled Forestry
3. Credit Suisse, McKinsey, WWF: Conservation Finance Moving beyond donor funding toward an investor-driven approach

I have attached these documents in a following email due to their filesize and for convenience.

Kind regards,

Fraser
