

Report-back from breakout group 4

Key issues discussed

Q1)

- Mainstreaming accreditation processes and simplifying the process, reducing the burden on countries
- Other channels of funding; not just focus on the Multilateral Funds (other national, regional funding)
- Getting partners to assist in developing their institutional capacity and national system
- Multilateral funds should support countries in all aspects of project preparation, delivery and implementation, not just readiness. (the whole cycle)
- Enhancing engagement of private sector and promoting continued dialogue/communication
- Understanding of what private sector finance is (only grant-based?)
- Keep a cap for countries (maximum amount of fund each country can get)
- For smaller countries (eg. SIDS), governments should be NIEs.
- NDCs are there, but quantifying and analyzing the NDCs is needed. (NDCs as a tool to approach the private sector)

Report-back from breakout group 4

Q2)

- Enhancing engagement of private sector and promoting continued dialogue/communication
- Understand better what the private sector finance is, including different instruments that can be used and how to incentivize
- Use the NDCs as a tool to better attract private climate finance
