

# Report-back from breakout group 4

---

## MAIN ISSUES DISCUSSED / KEY TAKEAWAY MESSAGE

- Definition of adaptation is context specific
- What are we trying to measure? – Outputs, Outcomes or impacts
  - Risk? Continuity?
- Climate finance is an input not an indicator of impact or effectiveness
- Similar questions in Aid, DRR
- Counterfactuals
- Basket of quantitative and qualitative indicators

## ACTIONS / NEXT STEPS

- Countries further define their specific adaptation aims, actions and timeframes
- Look at other harmonization or measurement processes, e.g. Equator Principles – understandable by Private Sector
- Need exercise for harmonizing existing indicators (SDGs, CSR, impact investing)
- Need indicators to measure links between btw adaptation and development pathways
