

UNFCCC Webinar: Views on the design of the 2017 in-session workshop on long-term climate finance

Webinar background and objectives

In accordance with Decision 7/CP.22, the in-session workshops on long-term climate finance (LTF) in 2017 and 2018 will, with a view to scaling up climate finance for mitigation and adaptation, focus on experiences and lessons learned from:

- a) Articulating and translating needs identified in country-driven processes into projects and programmes;
- b) Roles of policies and enabling environments for mitigation and adaptation finance;
- c) Facilitating enhanced access.

The aim of this webinar is to provide an opportunity for Parties and observers to discuss the modalities, content and expected outcomes of the in-session workshop on LTF in 2017.

Guiding questions for today's discussion:

1. How can the forthcoming LTF in-session workshop be designed to best contribute to the following objectives:
 - To arrive at a clearer understanding of how the needs identified and articulated by developing countries can be better translated into concrete projects and programmes, including through international cooperation.
 - To share experiences on climate finance access and identify points for action that can be undertaken to improve access to climate finance.
 - To achieve greater clarity on the role of policies and enabling environments for mitigation and adaptation finance.
2. How could the discussions and outcomes of the LTF in-session workshop be better integrated into other international and regional consultation processes inside and outside the Convention, to enhance their relevance and impact?
