# NAMA Seeking Support for Implementation

## A.1 Party
Republic of Serbia

## A.2 Title of Mitigation Action
Expansion of existing heating network in Valjevo

## A.3 Description of Mitigation Action
The NAMA is the expansion of the existing district heating network to the city areas of Valjevo with the aim of energy efficiency improvement and air pollution reduction. Total heat capacity to be connected to the district heating system under the project will be 37.85 MW. The mitigation action involves installation of a hot water network in the length of 9.7 km and closure of 25 existing inefficient heating stations (boiler rooms) and individual furnaces in 94 residential buildings. 119 new heating substations will also be constructed in order to supply heat to the total surface area of 286,649 m². NAMA will lead to climate change mitigation through reducing fuel consumption at outdated inefficient boilers for heating.
