

Submission from Pakistan

Item 8:

Implementation of all the elements of decision 1/CP.17, (b) Matters related to paragraphs 7 & 8 (ADP)

Response:

a) Pakistan did not object to the two work streams as agreed during the Bonn session in May 2012, even though we remained convinced that the work under paragraph 7 of Decision 1/CP/17 was not directly related to the work of drafting an instrument or an agreed outcome. In view of above Pakistan proposes the following:

The linkage with the proposed new instrument

Linkage with the existing instruments i.e. Kyoto Protocol

Time period in which this ought to be considered and;

How other frameworks such as NAMAs could contribute to this work plan.

b) In addition, Pakistan would also like to discuss linkage between paragraphs 5 and 7 of decision 1/CP.17.

The two work streams should be managed each by one of the Co-chairs of the ADP. If need be, some facilitation could be considered. The two work-streams should not meet simultaneously as this would pose significant challenge to a vast majority of delegation in servicing not only this meeting but also other working groups.
