

Compilation of information on the mitigation benefits of actions, initiatives and options to enhance mitigation ambition

Second version of the technical paper

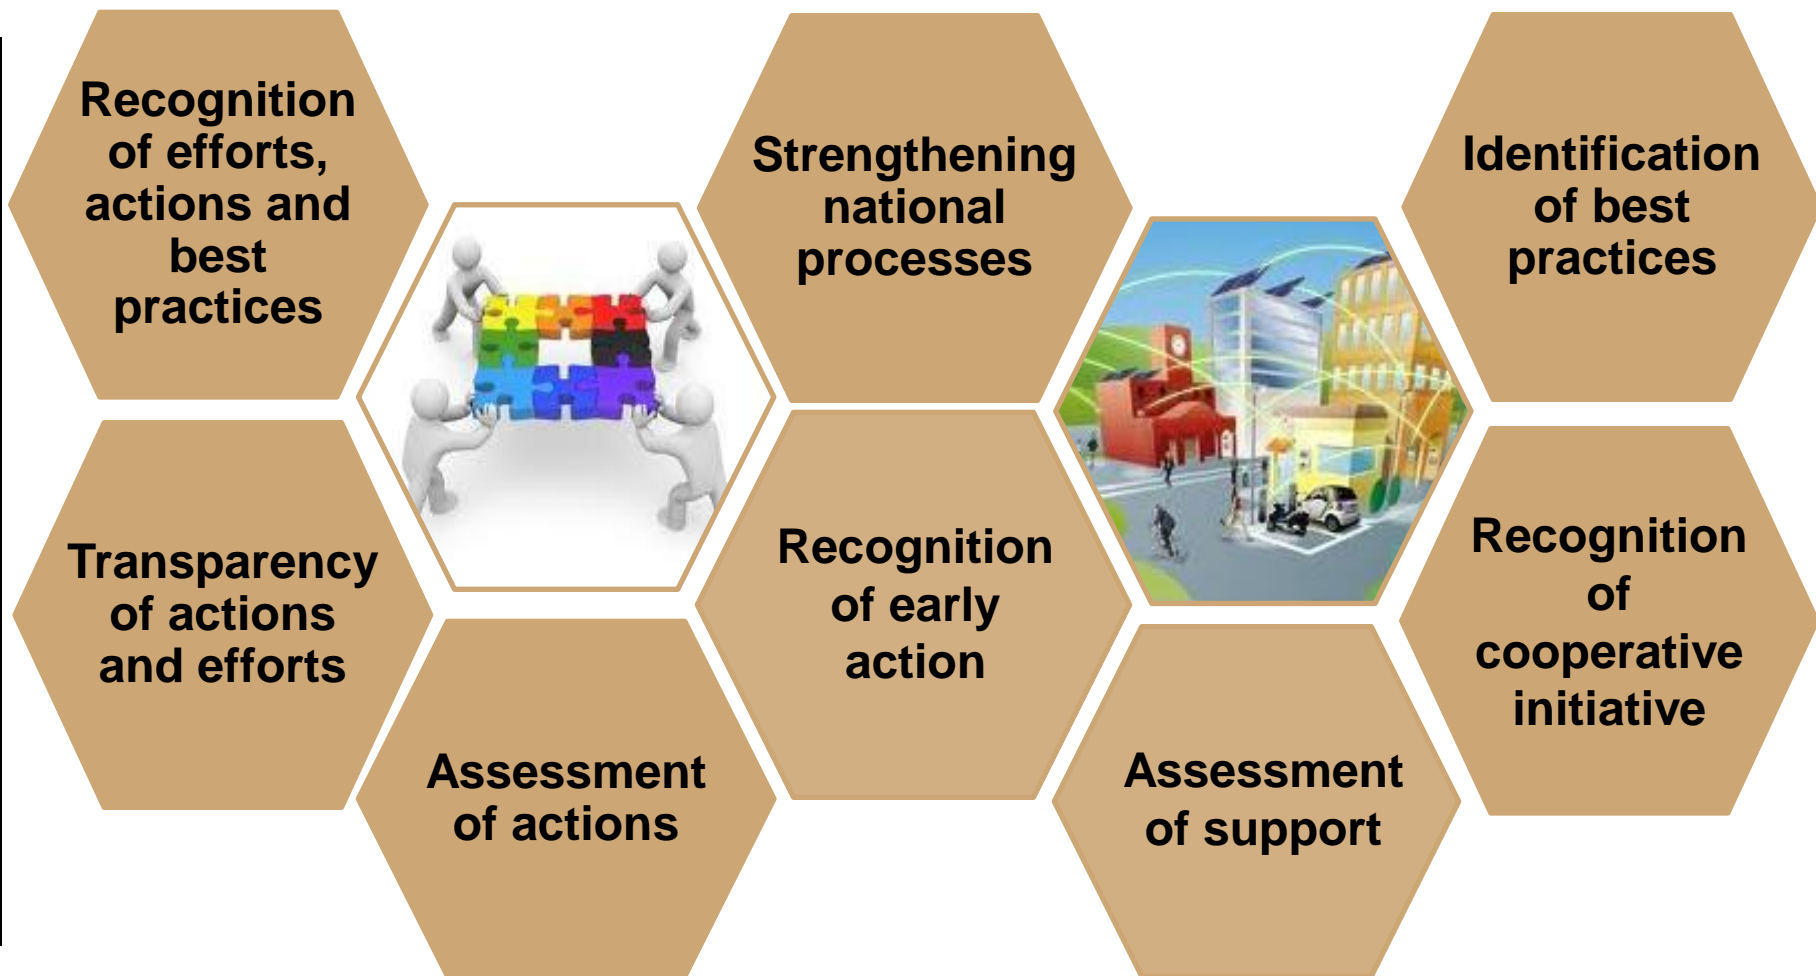

Thematic areas with sizeable mitigation potential

Box size gives an indication of mitigation potential provided in the TP

Options to enhance ambition of actions and support

Options related to work at technical and political levels

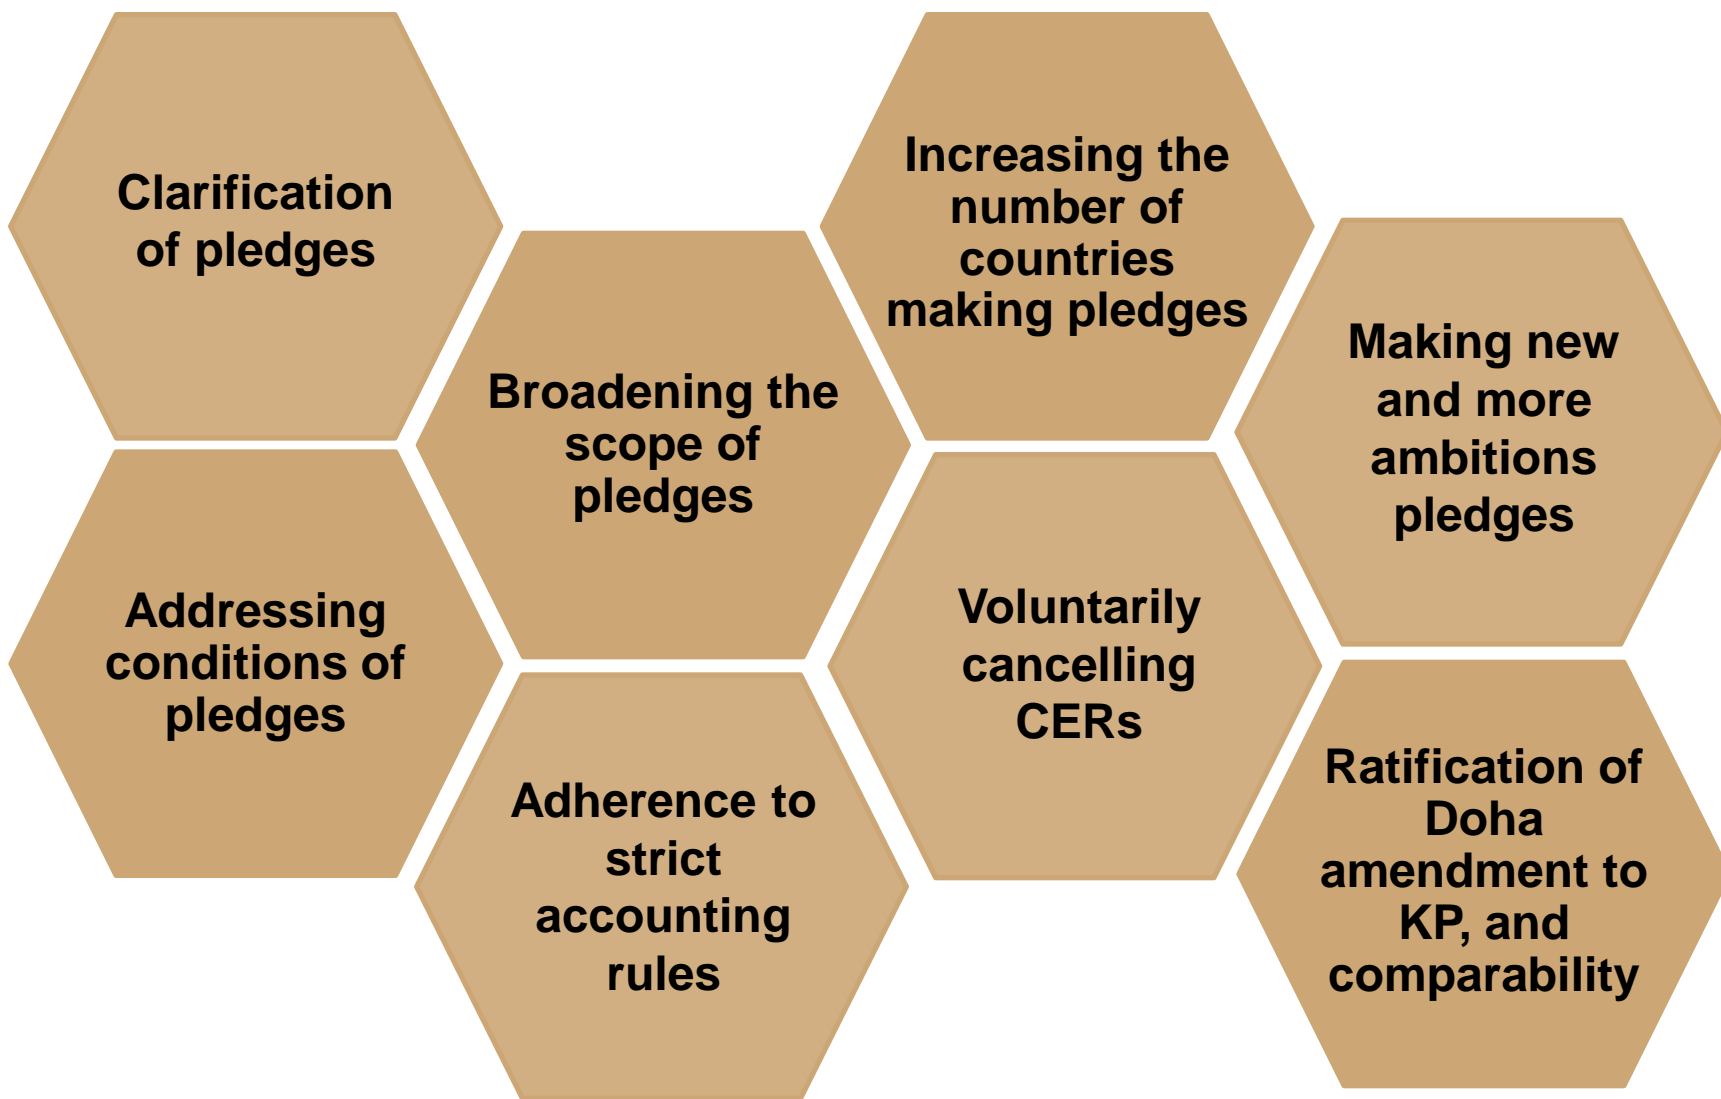

Work at technical level

- Technical expert meetings on a broad range of thematic areas, e.g. HFCs and REDD-plus
- Detailed technical processes with a timeline and focus on areas with mitigation potential
 - Workshops, mitigation action plans and implementation work
- Work programme under SBSTA on technical work and dialogue

Work at political level

- Importance of strong political signal
- Clear plan for ministerial involvement on ambition and support in 2014
- Kyoto Protocol ambition mechanism and Ministerial round table, June 2014
- Inputs for UN SG's event in Sept' 2014
- Ministerial on WS2 outcome
- Ministerial on options for mitigation actions

Options to enhance ambition of pledges

Possible ways forward to enhancing mitigation ambition (1)

- **Options to enhance mitigation ambition of actions and support**
 - Taking action to enhance mitigation efforts and support in 2014
 - Mobilizing effective support for enhanced action by developing countries
 - Recognizing, scaling up and increasing visibility of actions and cooperative initiatives undertaken by all stakeholders
 - Recognizing early action towards implementation of commitments accounted for under the 2015 agreement
 - Strengthening national processes through the UNFCCC to identify mitigation opportunities and facilitate investment
 - Catalysing REDD-plus actions
 - Invitation to the Montreal Protocol to phase down production and consumption of HFCs
-

Possible ways forward to enhancing mitigation ambition (2)

- **Options related to work at technical and political levels**
- Continue identification and sharing best practices and success stories
- Continue technical workshops and expert meetings on areas with high mitigation potential
- Clear technical process and direction for political and high level engagement

Possible ways forward to enhancing mitigation ambition (3)

○ Options to enhance ambition of pledges

- Enhancing pledges and making new more ambitious pledges
- Reaffirming leadership role by developed countries in pledging deeper emission reductions and moving to the upper range of pledges
- Ensuring prompt ratification of the Doha Amendment to the Kyoto Protocol
- Increasing ambition of commitments for the Kyoto Protocol CP2
- Ensuring comparable ambition of pledges and emission reductions under the Convention by non-Kyoto Protocol Parties
- Broadening a scope of pledges by developing countries
- Encouraging voluntary cancellation of CERs as a contribution to enhancing mitigation ambition
