Argentina’s NDC Revision Process

Soledad Aguilar, October 2016
Argentina’s NDC presents an economy-wide target on the basis of a BAU projection to 2030.

Bottom-up approach: The target is constructed adding individual measures validated by relevant ministries.

This effort allows us to focus efforts on financing and implementation, as well as adding measures from other jurisdictions to make the national effort more visible and participatory.

- Climate Change Awareness Raising
Revision of Argentina’s NDC 2016

- **Articulation** – with the 14 ministries, Federal Environmental Council (COFEMA), civil society, lawmakers and the private sector.

- **Methodological improvements.** Joint work with the Finance, Energy and Agriculture ministries to review the baseline and do methodological changes to the country’s inventory and NDC thanks to international funding.

- **Planning** to fund the measures included in the NDC (alongside the Finance Ministry and the Cabinet Chief).
