

International Partnership
on Mitigation and MRV

International Partnership on Mitigation and MRV

April 22-25, 2014
Vientiane, Laos

Miriam Ott, Federal Ministry
for the Environment,
Germany

About the Partnership

Launched by South Africa, the Republic of Korea and Germany at the Petersberg Climate Dialogue in 2010, the Partnership encourages countries to step up mitigation ambition and carry out the transformation to a low-carbon society.

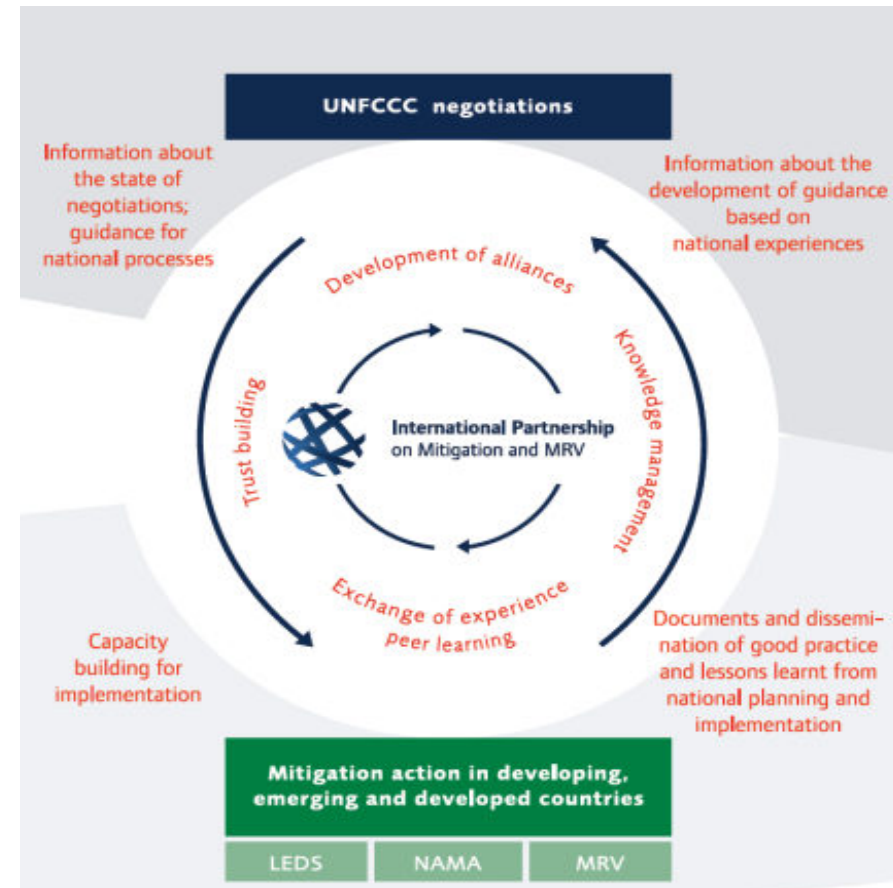

To this end, the Partnership supports the design and set-up of

- Low-Emission Development Strategies (LEDS);
- Nationally Appropriate Mitigation Actions (NAMAs); and
- Measuring, Reporting and Verification (MRV) systems.

About the Partnership

The Partnership facilitates the **exchange of good practices** on mitigation-related experiences and MRV between climate negotiators, policymakers and practitioners from more than 50 developing and developed countries in order to **share learning, build trust and inform the UN Climate negotiations.**

Partnership Meetings

- At the margins of UNFCCC sessions
- Trustful space for informal and open exchange and discussion among negotiators
- Communication channel between negotiation and implementation level
- Approx. 60 participants from about 50 partner countries from AI and NAI

Global Good Practice Analysis

- In order to encourage more exchanges between peers in the partner countries the Partnership carried out an analysis of good practices in cooperation with the UNDP LECB Programme
- Based on existing LEDS, NAMA and MRV activities, 21 good practice cases from 21 countries were selected
- The cases were analyzed in more depth with regard to their success factors and lessons learnt
- Final results will be converted into knowledge products and will be disseminated in June 2014 through the Partnership and the UNDP LECB Programme

Capacity Building

Peer-to-Peer Programme

Focus: Networking and exchange of specific experiences

Frequency: demand-driven

Participants: Representatives from 2 to 5 countries with similar interests and tasks at hand

Duration: 2 to 3 days

Technical Workshops

Focus: Intense study of a specific topic with either a technical or political focus

Frequency: 2-3 workshops per year

Participants: representatives from 2 to 5 selected countries in a region

Duration: 2 to 4 days

Summer Schools

Focus: Comprehensive insight into a complex topic (NAMAs/ LEDS/MRV)

Frequency: One Summer School per year

Participants: 25 representatives from various countries

Duration: 7 days
