United Nations Framework Convention on Climate Change

The NAMA registry

Status update

Vientiane, Laos, 22-25 April 2014

Claudio Forner
UNFCCC secretariat - Mitigation, Data and Analysis Programme

- Background
  - Mandate for the registry
  - Registry development timeline
  - Registry fundamentals
- Operation of the Registry
  - Overview of content
  - Secretariat activity
- Challenges and opportunities

- The COP decided to establish a registry to record nationally appropriate mitigation actions (1/CP.16)
- The COP also decided that the registry should be developed as a dynamic, web-based platform managed by a dedicated team in the secretariat (2/CP.17)
- Participation is voluntary and only the registry contains only information that has been submitted specifically for recording.

Registry development timeline

- Interim facility in August 2012
- Fully functional prototype deployed in April 2013
- Feedback on prototype from Parties received prior to the June sessions in 2013
- First version of the web based registry was deployed in October 2013.
- Second version of the web based registry was deployed in March 2014.
- This includes improvements suggested by parties and all content is accessible by the public

- The registry is now fully deployed.

- COP 18 invited developed country Parties, the entity or entities entrusted with the operation of the financial mechanism, including the Global Environment Facility and the Green Climate Fund, multilateral, bilateral and other public donors, and private and non–governmental organizations that are in position to do so, to submit, as appropriate, information on **financial, technology and capacity-building support available** and/or provided for the preparation and/or implementation of nationally appropriate mitigation actions

- COP 18 Invited developing country Parties to submit, as appropriate, information on further individual **nationally appropriate mitigation actions** seeking international support and other individual nationally appropriate mitigation actions, for their recognition

NR-49	Construction of New Energy Efficient Buildings Based on Energy Efficiency

- **These statistics are as at 14 April 2014**
- **As the web-based registry is less than one year old this information should be seen as indicative rather than a comprehensive**
- **Further analysis is available in the annual report of the registry**

Overview of registry content in 2013: Summary of registry participation

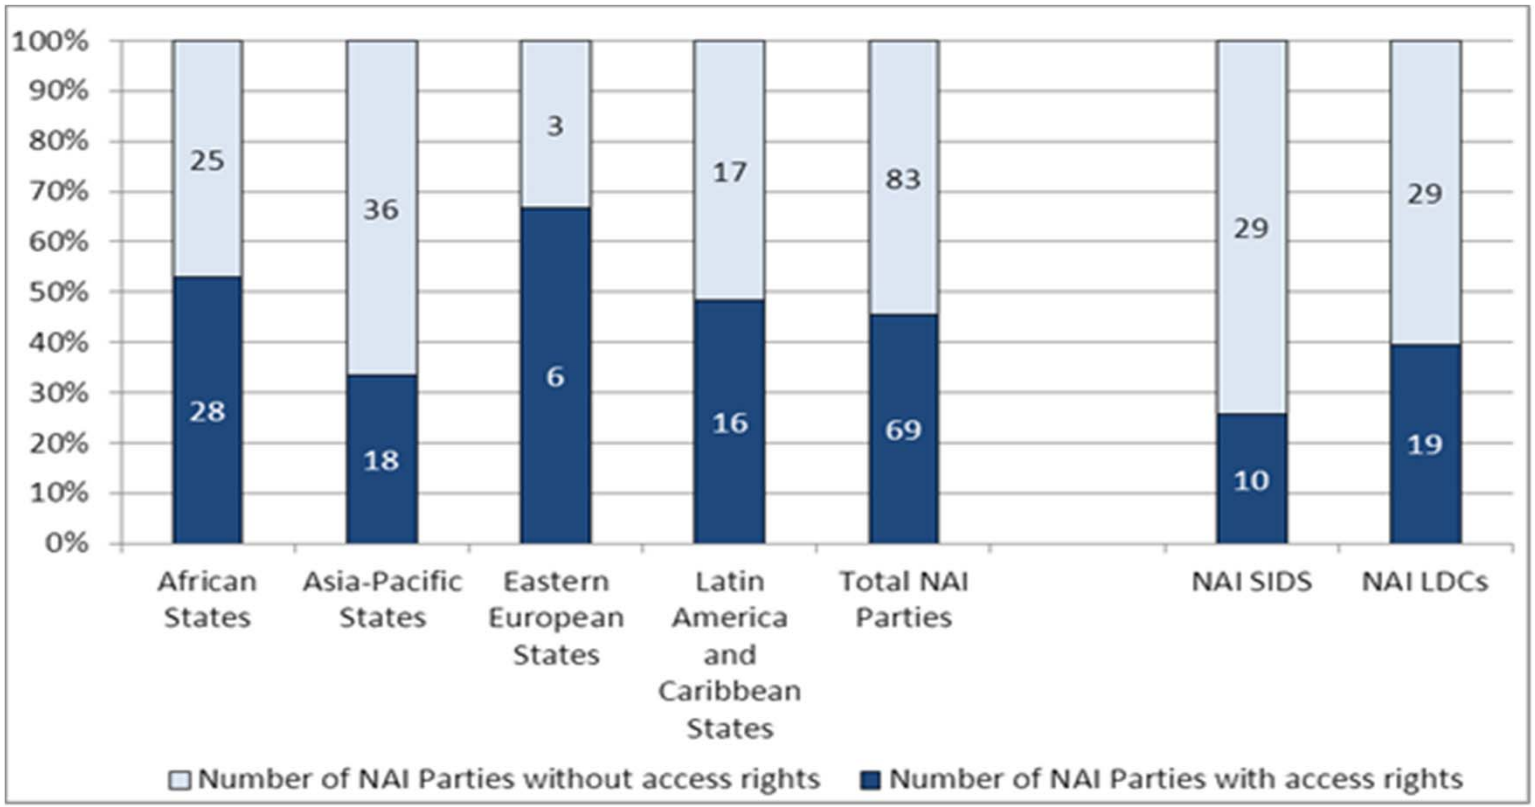
- **A significant number of entities have registered in the prototype phase of the registry**

- **Participation was higher on the NAMA side of the registry than the support side**

NAMAs	
Number of NAMA approvers	69
Number of NAMA developers	1
Number of NAMA entries	43
Support	
Number of support editors	23
Number of support entries	8

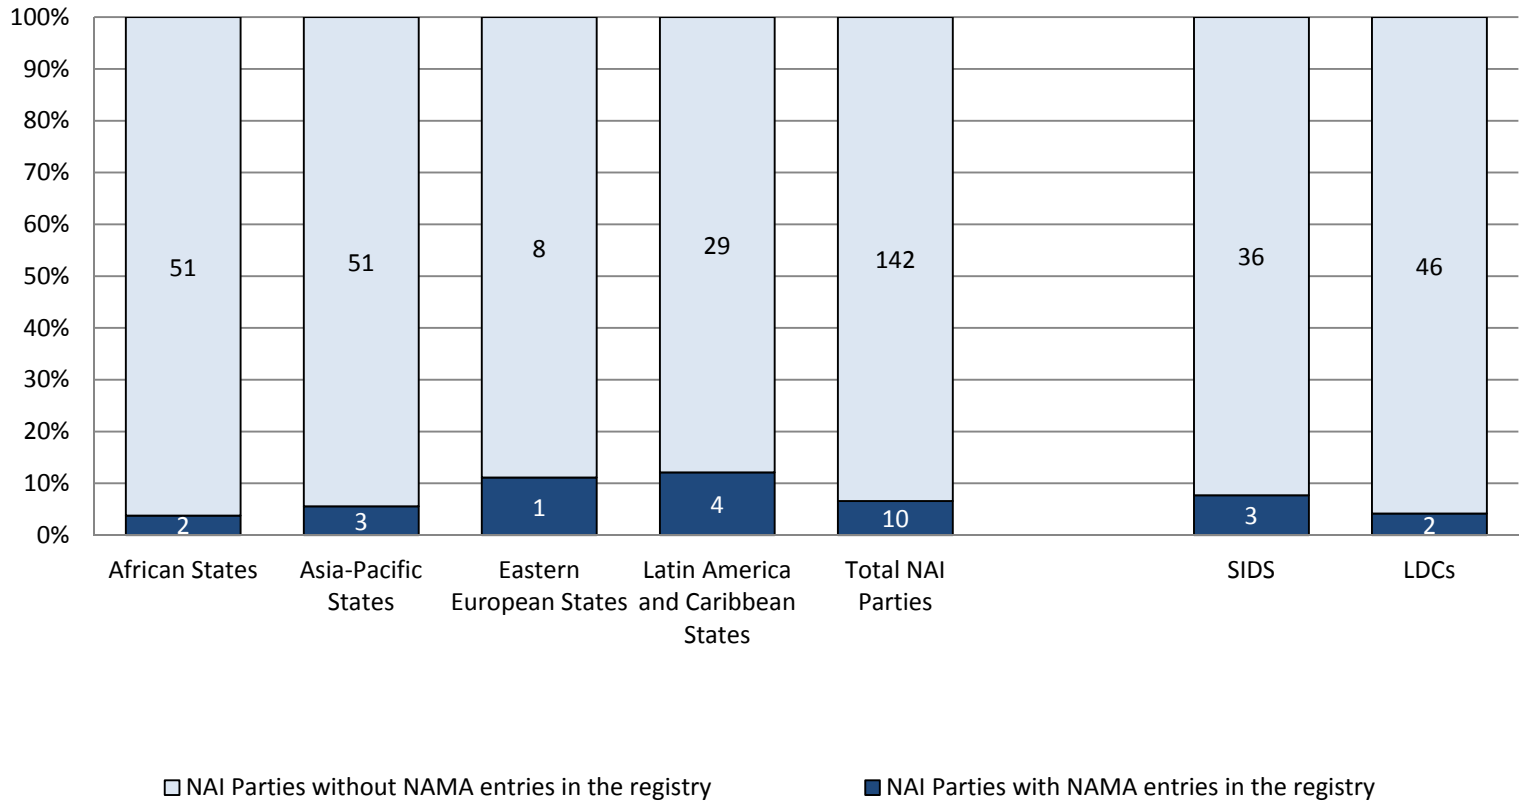
Overview of registry content in 2013: Registry participation characterised by NAMA approver access rights

- **By region, 30%-60% of developing countries requested access rights**



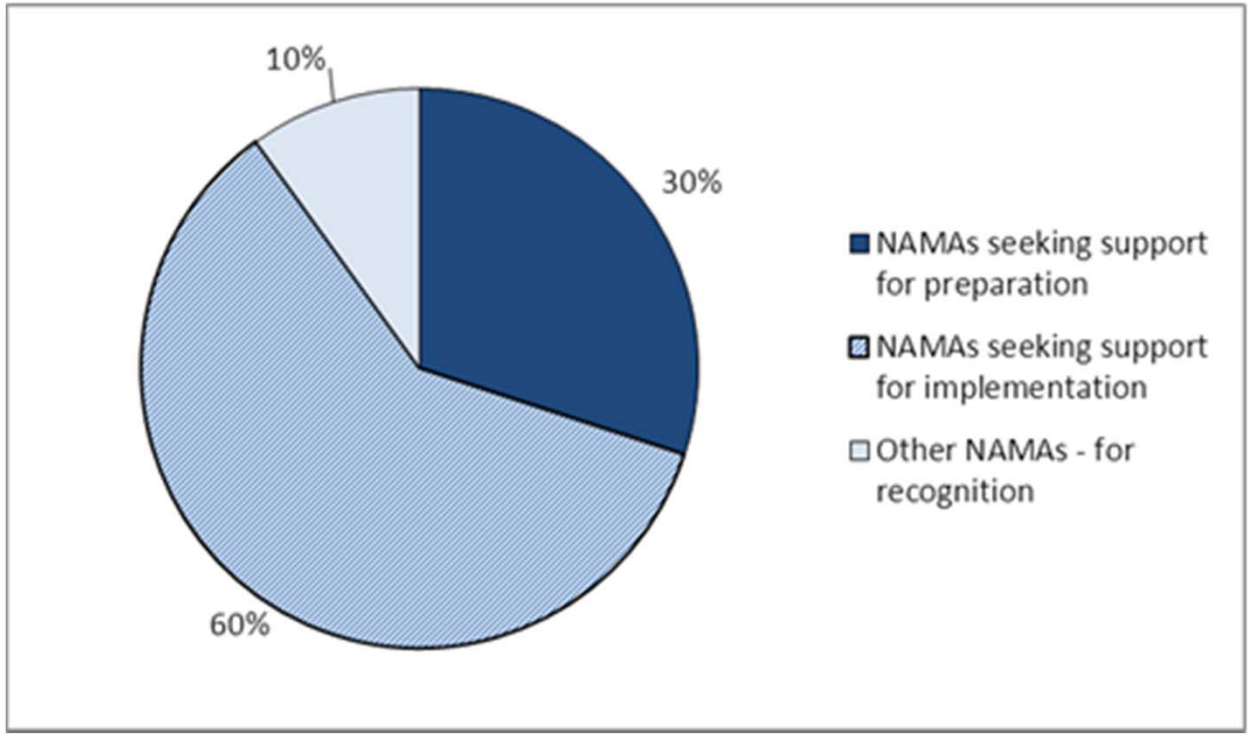
Overview of registry content in 2013: Registry participation characterised by NAMA entries

- **Significantly fewer have gone the step further of creating an entry in the registry**



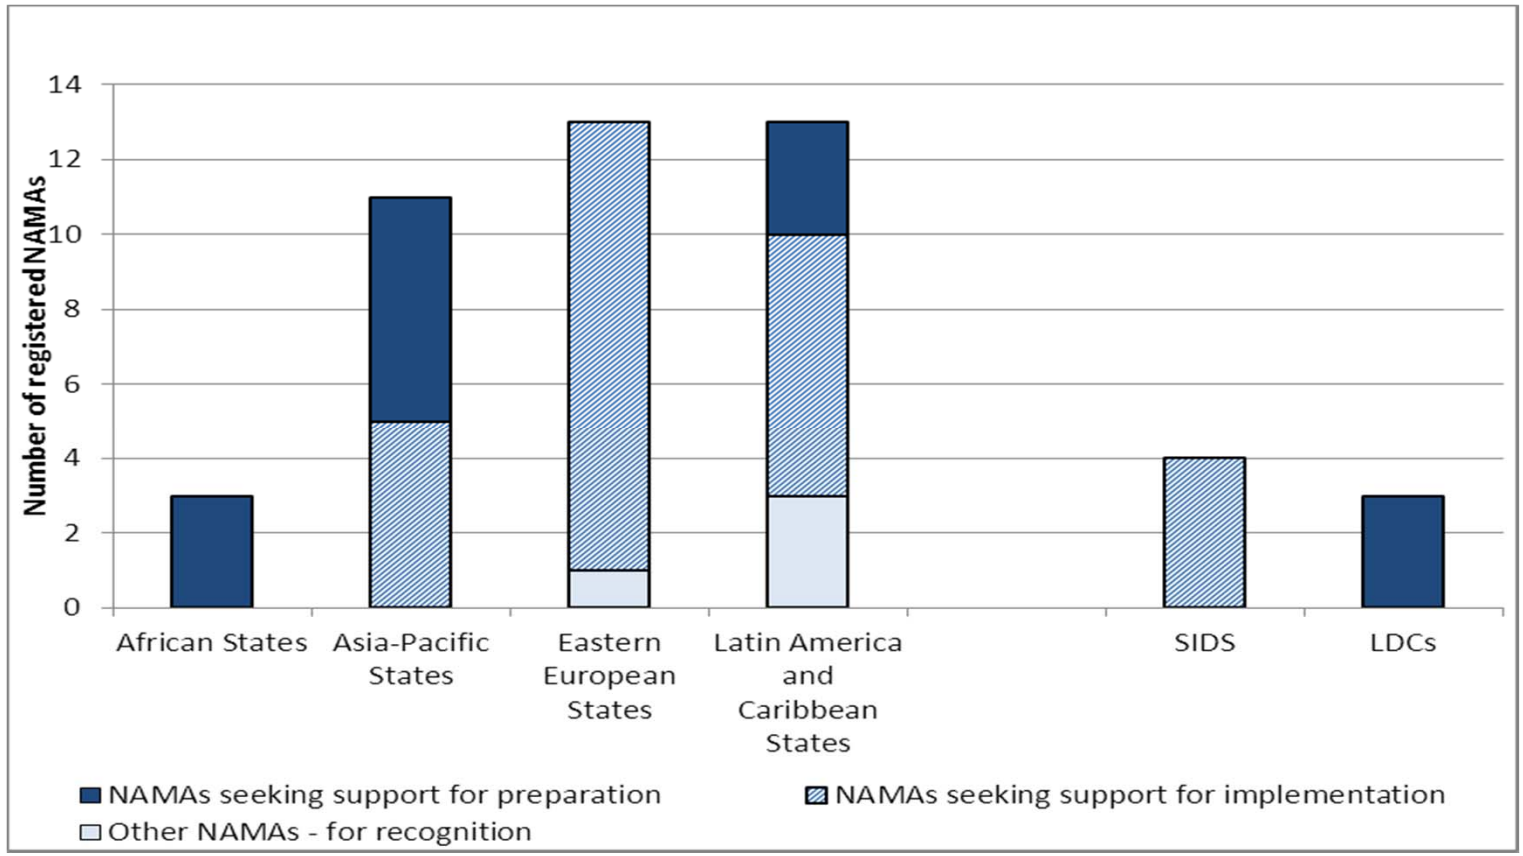
Overview of registry content in 2013: Characterization of NAMA entries by type

- **The majority of NAMA entries are seeking support and the majority of these are seeking support for implementation**



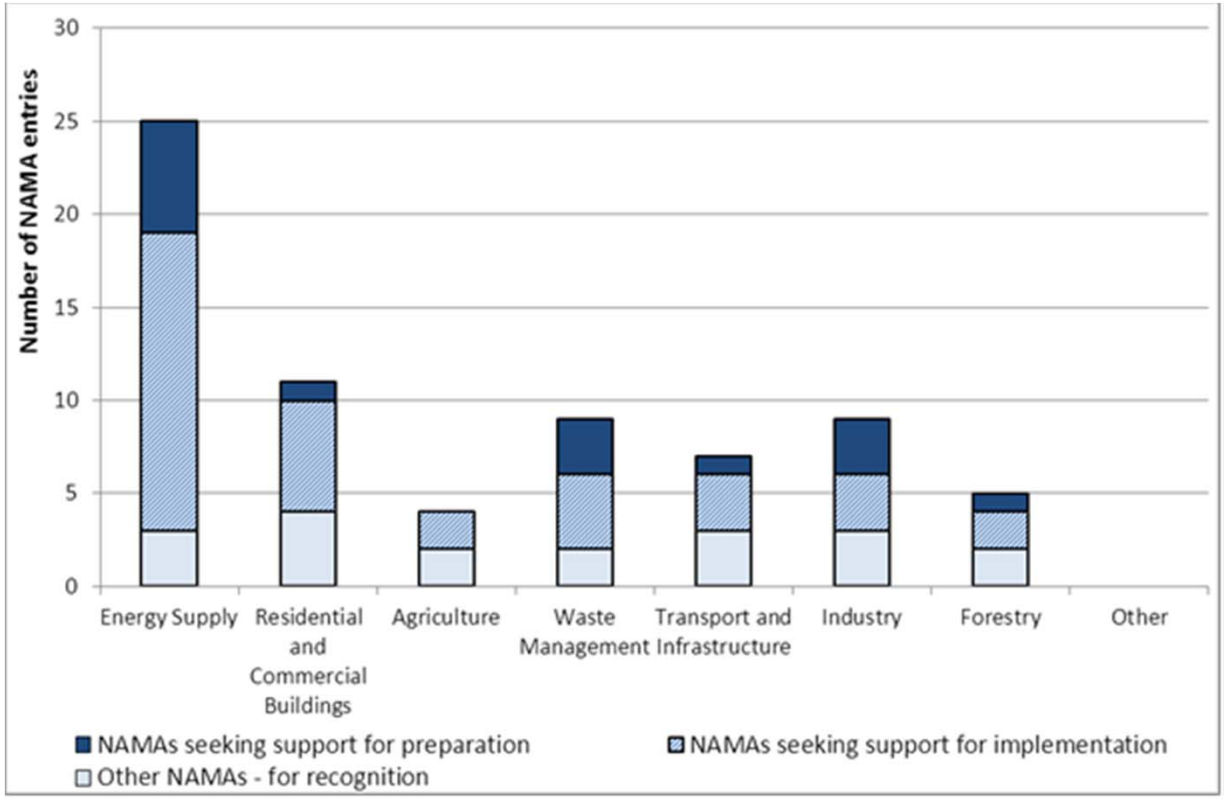
Overview of registry content in 2013: Characterization of NAMA entries by type

- **Types of support needed is different by region**



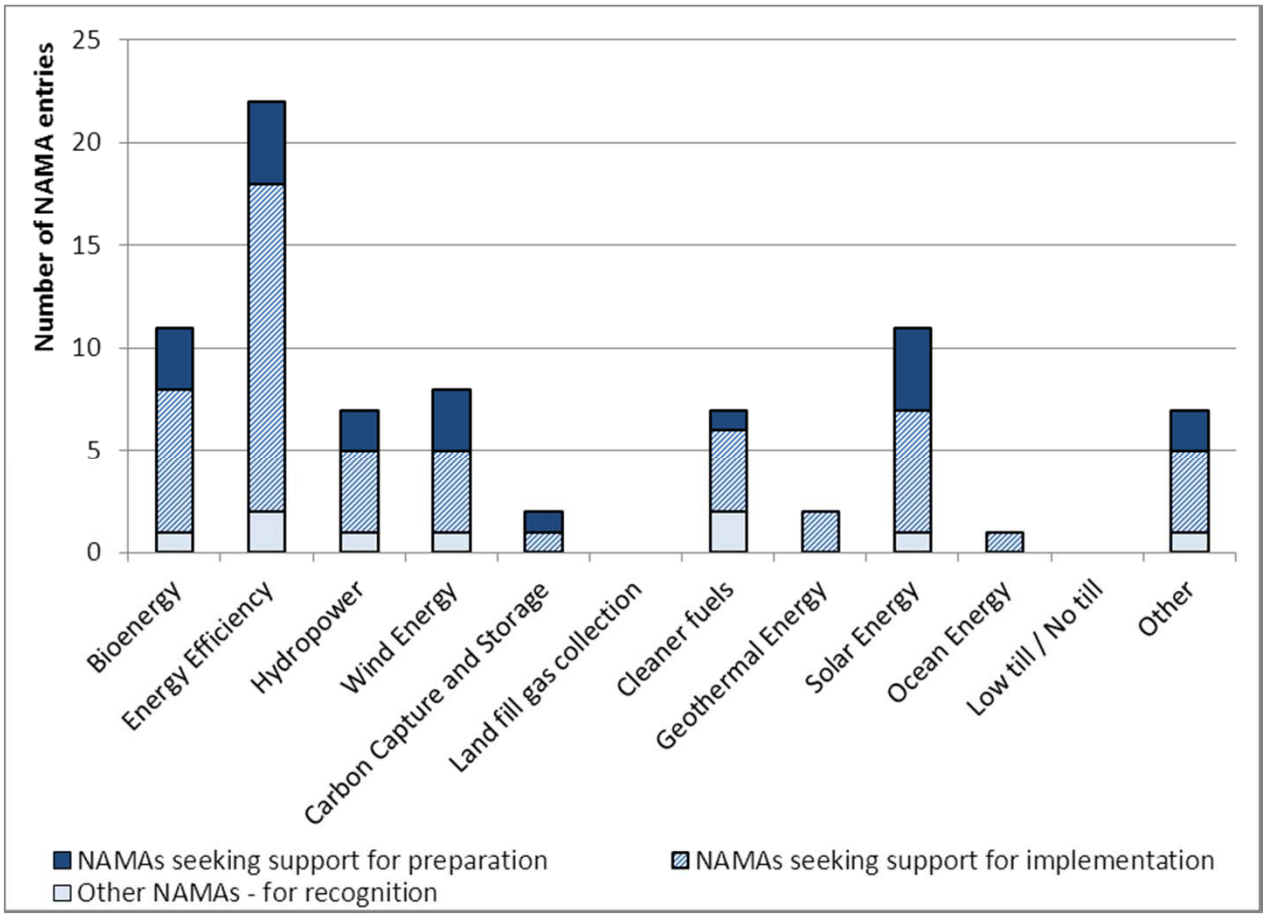
Overview of registry content in 2013: Characterization of NAMAs by sector

- **The energy supply sector is the sector relevant to most NAMA entries**



Overview of registry content in 2013: Characterization of NAMAs by technology

- **Energy efficiency is the technology relevant to most NAMA entries**

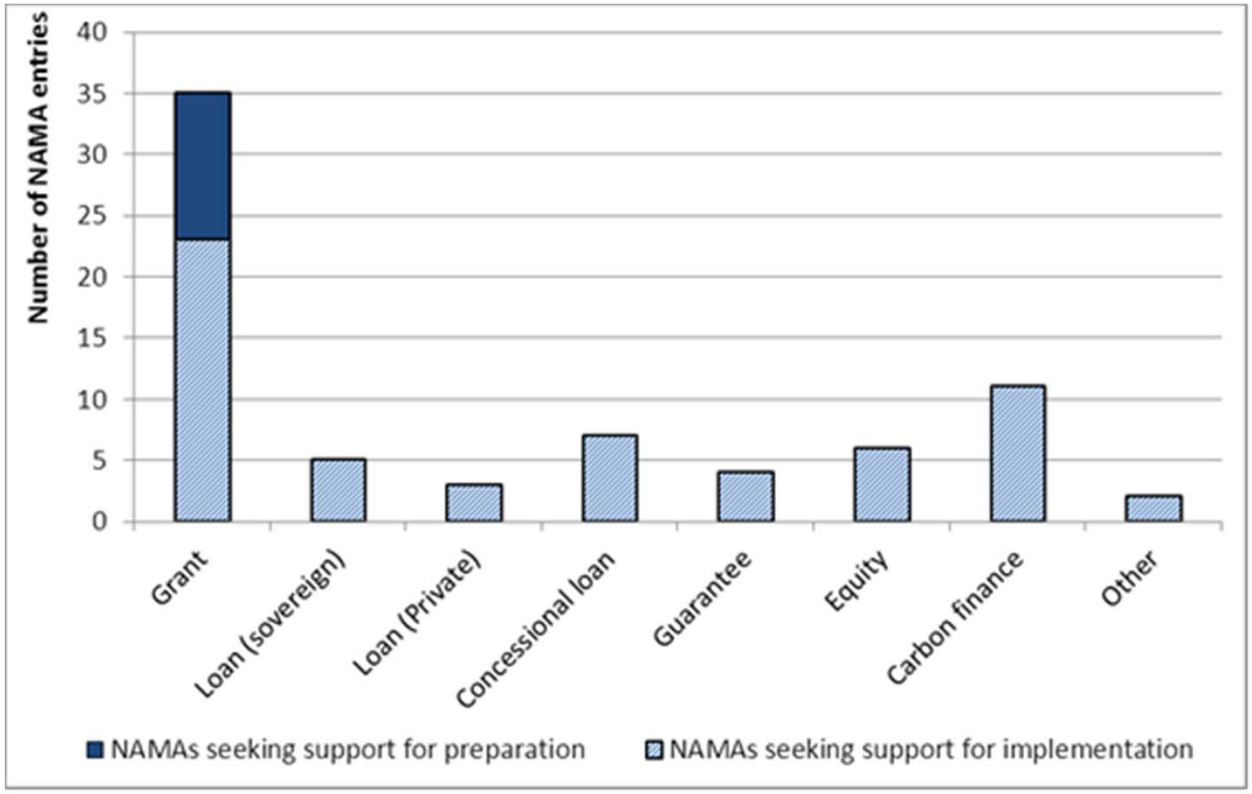


Overview of registry content in 2013: Support sought for NAMAs by type and grouping

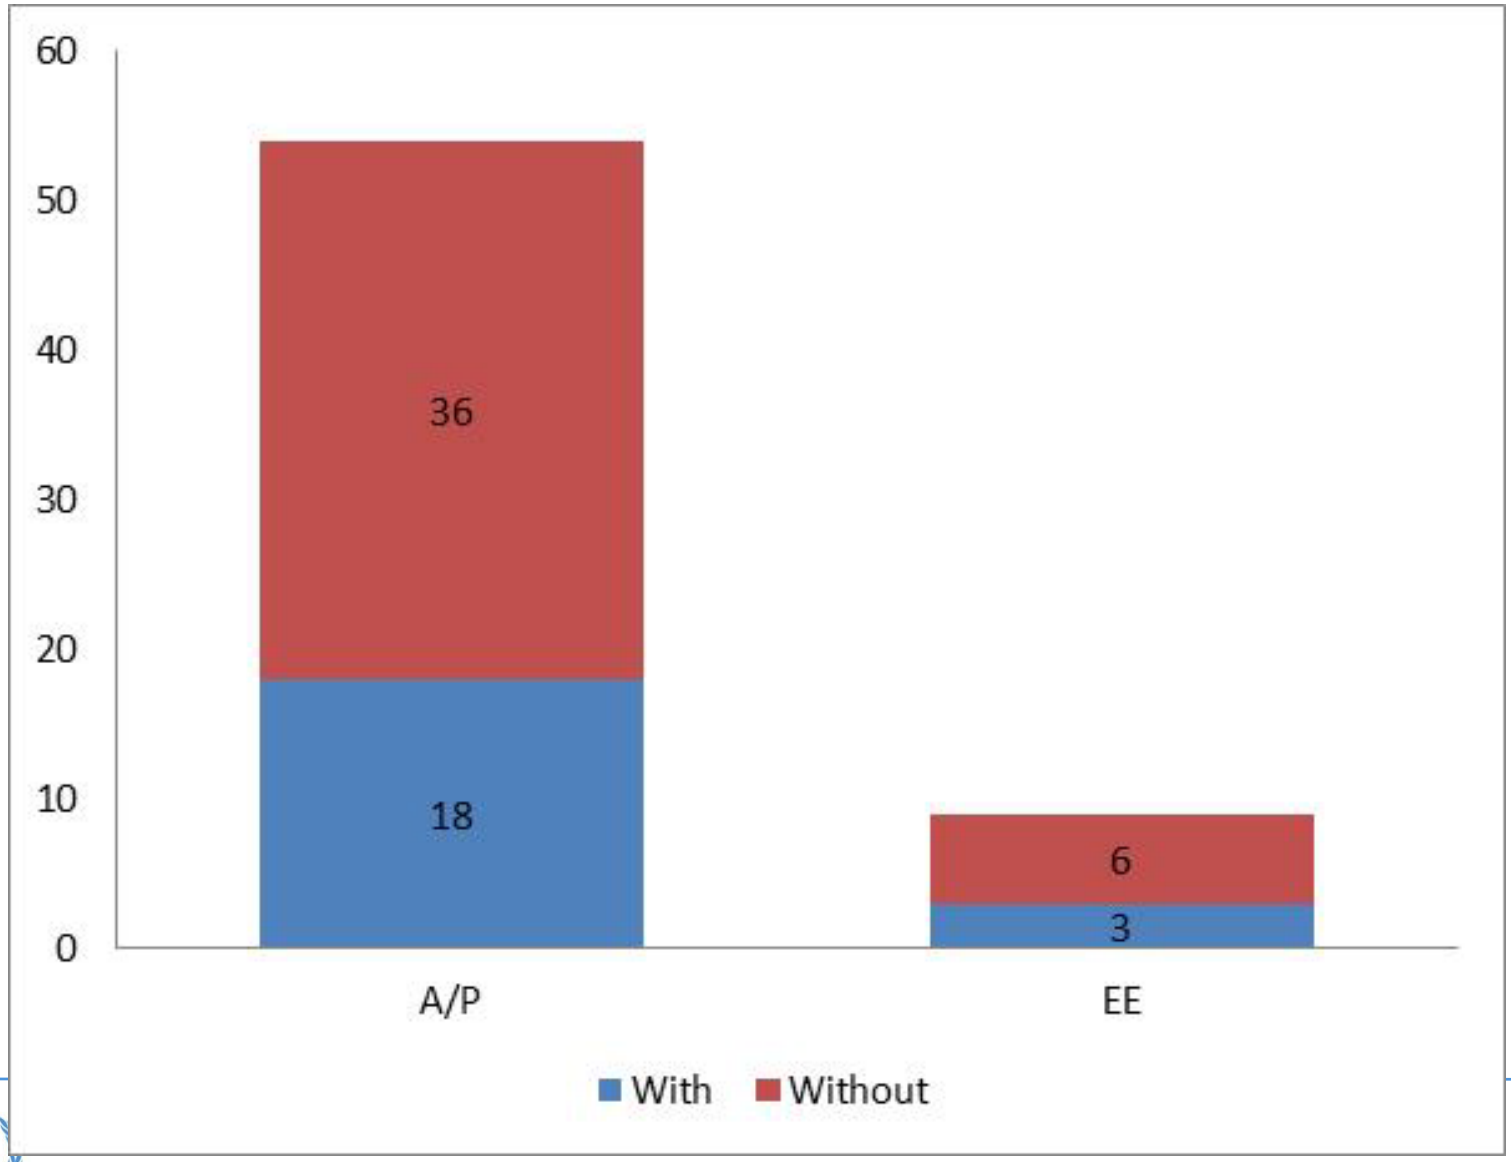
UNFCCC Regional Groupings by NAMA Category	Sum of Financial support (thousands of USD)	Sum of Technology support (thousands of USD)	Sum of Capacity building support (thousands of USD)
NAMAs seeking support for preparation	5,555	1,472	1,450
African States	480	260	800
Asia-Pacific States	3,400	1,212	600
Eastern European States	No entries for this region		
Latin America and Caribbean States	1,675	No entries for this region	50
NAMAs seeking support for implementation	4,168,000	20,000[a]	11,500
African States	No entries for this region		
Asia-Pacific States	380,700	20,000	10,000
Eastern European States	3,227,000	No entries for this region	No entries for this region
Latin America and Caribbean States	560,600	No entries for this region	1,500
Grand Total	4,173,000	21,470	12,950

Overview of registry content in 2013: Type of financial support sought

- **Grant funding is the type of financial support most commonly sought by NAMAs**

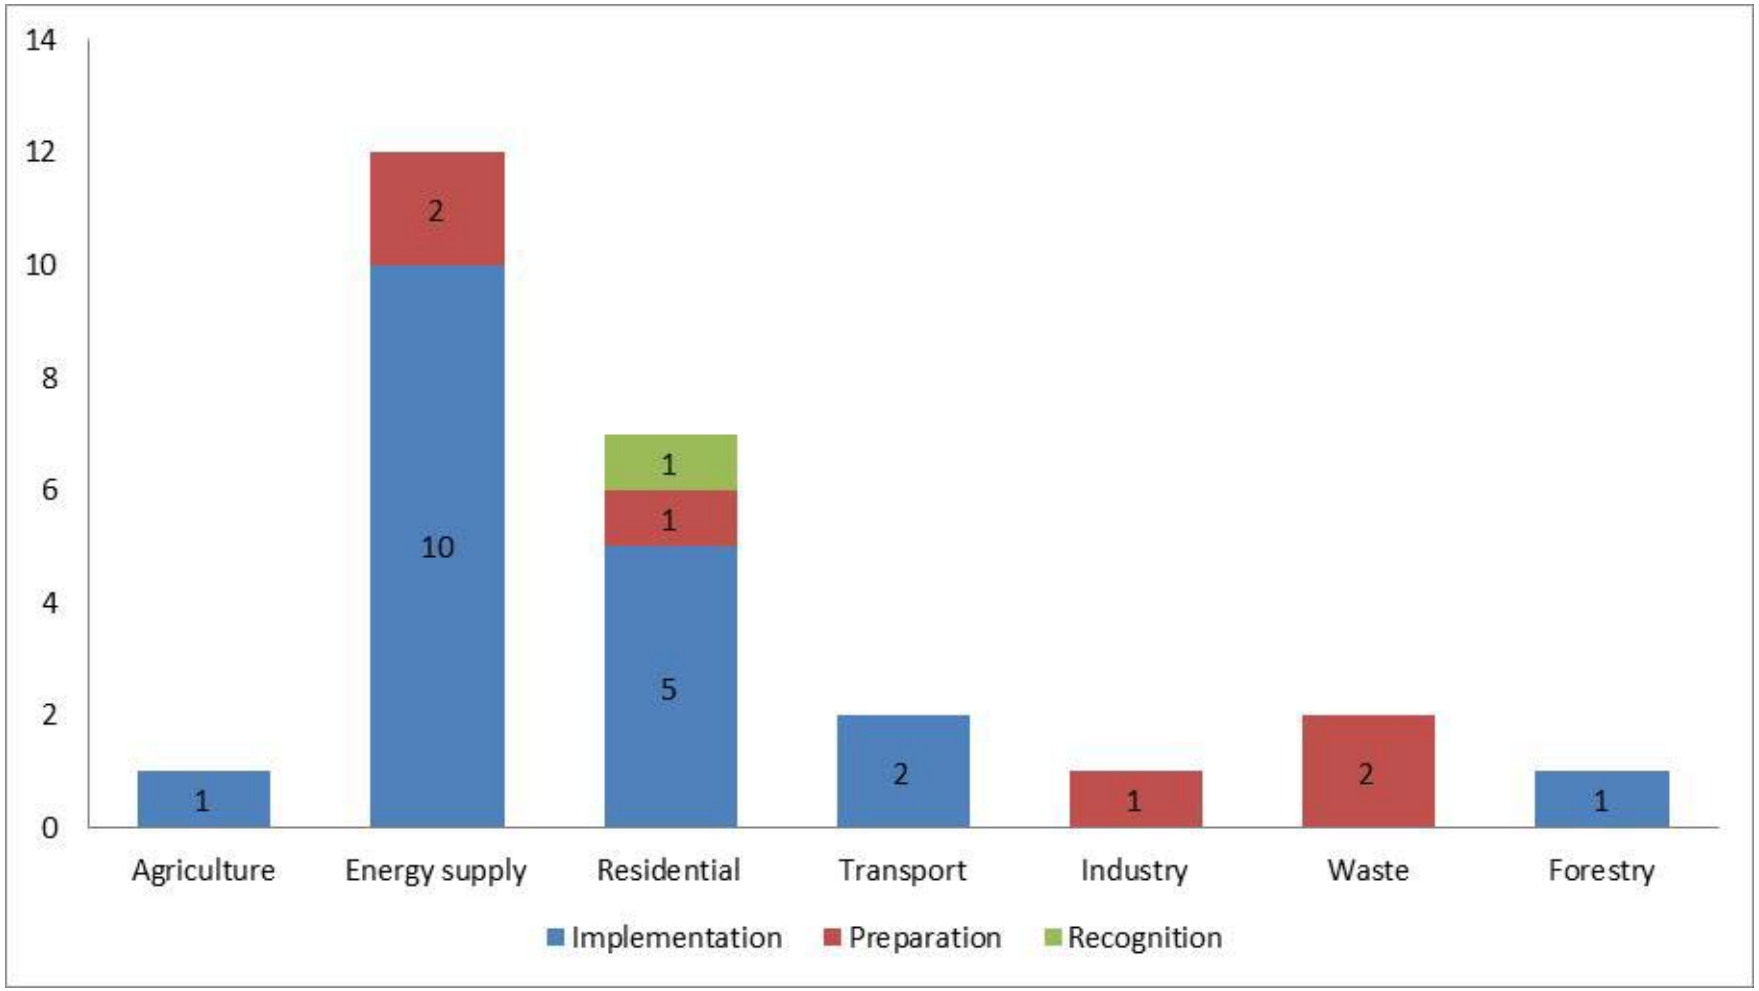


Asia Pacific and Eastern Europe: registry users



- 26 NAMAs (e.g. over 50 per cent of all NAMAs)
  - 21 come from 2 countries: 8 from Serbia and 13 from Serbia
  - 5 other countries have submitted NAMAs
  - Out of 63 countries 7 (11%) have recorded NAMAs

Asia pacific and Eastern Europe: Registered NAMAs



- Limited use and level of participation: the registry needs to contain a critical mass of information to be effective
- Improving information accuracy and completeness : registry content needs to be reliable and complete for the registry to be effective
- Limitations of final registry design: Functionality of registry determined by Parties but the secretariat received limited feedback from Parties on the design of the registry, in particular on the templates used for creating entries

- It is recommended that Parties and others who may benefit from the registry:

  a) Find ways to increase their level of participation in the registry, including obtaining access rights and creating registry entries. For developing country Parties , the ability to decentralize the preparation of NAMAs through NAMA developer access rights may facilitate participation

  b) Take steps to ensure that their entries in the registry are accurate, complete and up-to-date

  c) Continue to provide the secretariat with suggestions for improving the registry, with their related capacity-building needs and to make use of relevant technical resources

- The secretariat will continue to support for the registry, within the restrictions of mandate and budget:

  a) Capacity building through regional NAMA workshops

  a) Development of technical resources requested by Parties

  b) Outreach activities with potential providers of support and proponents of supported NAMAs

  c) Providing direct support to individual registry users

  d) Improving the registry platform

- How would you assess the level of participation of countries from the region in the registry?
- What would be the main barriers preventing broader use?
- What would you propose to address them?
