If this information is considered confidential, a note stating this fact should be placed on the public website.

2. Identification of Problems

The purpose of this section is to identify any problems with the national registry based on the Party's annual submission and transaction log records that may affect the performance of the functions of the national registry pursuant to paragraph 88 of the annex to decision 22/CMP.1.

Ref Nr	Requirement	Assessment	Comment
	22/CMP.1 paragraph 88.(a) The information is complete and submitted in accordance with section I.E of the annex to decision 15/CMP.1 and relevant decisions of the COP/MOP;	Assessed in SIAR Part 1. Kept here for completeness	
P2.2.2	22/CMP.1 paragraph 88.(b) The information relating to issuance, cancellations, retirement, transfers, acquisitions, replacement and carry-over is consistent with information contained in the national registry of the Party concerned and with the records of the transactions log;	Problem Identified? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	Party submitted a SEF which is consistent with the ITL records.
P2.2.3	22/CMP.1 paragraph 88.(c) The information relating to transfers and acquisitions between national registries is consistent with the information contained in the national registry of the Party concerned and with the records of the transaction log, and with information reported by the other Parties involved in the transactions;	Problem Identified? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	Party submitted a SEF which is consistent with the ITL records.
P2.2.4	22/CMP.1 paragraph 88.(d) The information relating to acquisitions of CERs, tCERs, and ICERs from the CDM registry is consistent with the information contained in the national registry of the Party concerned and with the records of the transaction log, and with the clean development mechanism (CDM) registry;	Problem Identified? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	Party submitted a SEF which is consistent with the ITL records.

P2.2.5	<p>22/CMP.1 paragraph 88.(e)</p> <p>ERUs, CERs, AAUs and RMUs have been issued, acquired, transferred, cancelled, retired, or carried over to the subsequent or from the previous commitment period in accordance with the annex to decision 13/CMP.1;</p>	<p>Problem Identified? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p>	<p>Transactions with response code 4003 and 4010 were identified by the ITL, but these response codes could occur under normal circumstances due to the DES transaction message flow model utilized in ITL releases prior to version 2.0 which was deployed in Q4 of 2010. Occurrences of response code 4003 and 4010 are hence not assessed as discrepancies.</p> <p>The assessor notes that the national registry has proposed a significant number of transactions that received the response code 4007 as a result of the verification by the international transaction log, where response code is documented in Annex E of the Data Exchange Standards for Registry Systems under the Kyoto Protocol Technical Specifications. The national registry should be capable of preventing the submission of such proposals by improvements to the validation performed by the national registry. The assessor recommends the Party improves this validation to ensure external transfer proposals always have different transferring and acquiring registries.</p> <p>The assessor notes that the international transaction log has recorded response codes in the range 3000 to 3999. This range of response codes, documented in Annex E of the Data Exchange Standards for Registry Systems under the Kyoto Protocol Technical Specifications (DES), indicate that the national registry has sent a significant number of messages to the international transaction log that do not strictly comply to the message sequences mandated in the DES. The assessor recommends that the Party takes action to reduce the number of out-of-sequence messages sent by their national registry.</p>
