The reporting tool on the website is maintained and controlled by the EU Commission as same as the Union registry. It is not distinctly stated in decision 13/CMP.1 paragraph 44 that the Party should maintain its own website and have control of the public information. The writing is that "Each national registry shall make non-confidential information publicly available and provide a publicly accessible user interface through the Internet that allows interested persons to query and view it." The EUTL is the transaction hub for the EU ETS used to monitor and log the data in the Registries in the ETS. This prevents deviations and acts as a backup function for every single registry. A link to the EUTL is provided through the website maintained by the party, http://www.energimyndigheten.se/en/Sustainability/EU-ETS---Implementation-in-Sweden/EUETS/Reports/ .</i></p>
