IAR SUMMARY					

General information

Registry Name	National registry of Japan		
Date of report	9/7/07	Reporting period	N/A
IAR Type	Standard IAR ☐	Initial IAR ◉	
Components	Initialization Required ☑	Operational Performance Required ☐	Public Availability of Information Required ☐
Registry URL	http://www.registry.go.jp/		
Consolidated system with other Parties?	Yes ☐ No ◉	Parties involved	

Overall Registry Assessment

Conclusion	Pass ◉ Fail ☐
Comments / recom-mendations	The registry has fulfilled all of its obligations regarding conformity with the Data Exchange Standards. These obligations include having adequate transaction procedures; adequate security measures to prevent and resolve unauthorized manipulations; and adequate measures for data storage and registry recovery. The registry is therefore deemed fully compliant with the registry requirements defined in decisions 13/CMP.1 and 5/CMP.1, noting that registries do not have obligations regarding Operational Performance or Public Availability of Information prior to the operational phase. Japan successfully completed on time (by 2 July 2007) all tests required by the Data Exchange Standards. However, technical issues outside Japan's control prevented the ITL Administrator from running a procedure to confirm the success of one of the tests. The procedure was eventually run on 6 July 2007 and confirmed the success of this remaining test. The resulting delay in the production of the IAR was thus in no way related to the state of readiness of the national registry of Japan.

Initialization

Conclusion	Pass ◉	Fail ☐	N/A ☐			
Initializations during reporting period	1	2	3			
Initialization status	Pass ◉ Fail ☐ N/A ☐	Pass ☐ Fail ☐ N/A ◉	Pass ☐ Fail ☐ N/A ◉			
Start Date	18/12/2006					
End Date	6/7/2007					
Comments / recom-mendations						

Operational Performance

Conclusion	Pass ☐ Fail ☐ N/A ◉
Comments / recom-mendations	

Public Availability of Information

Conclusion	Complete ☐	Incomplete ☐	No data ☐	N/A ◉

of the national registry of Japan

Addendum 1

Initialization 1

Registry Name	National registry of Japan	
Date of report	9/7/07	Pass ⦿
Reporting Period	N/A	Fail ◯
Start Date	18/12/06	N/A ◯
End Date	6/7/07	
Comments / recommendations		

1   Documentation Evaluation

This evaluation was carried out by the ITL Operator under the initialization process and aggregated results have been transcribed here in full.

Status	Green ⦿ Amber ☐ Red ☐ N/A ☐
Total Score (max. 100)	96
Comments / recommendations	

The scoring approach used to evaluate the registry documentation is to assess the confidence level associated with each document, based on quality (completeness / accuracy / consistency of information supplied) and evidence (actual results supporting information supplied, if appropriate). The approach is set out below (see the ITL Initialization Process documentation for further information).

Status	Description	Score	Outcome
Green	No significant concerns about the state of registry readiness are identified.	> 80	The ITL Operator progresses immediately with the registry initialization process.
Amber	Minor limitations in the state of registry readiness are identified.	50 - 80	Registry initialization can proceed, once minor limitations have been resolved. The ITL Operator communicates with the candidate Registry to obtain additional information. Provided that timely resolution can be achieved, the ITL Operator can proceed with the registry initialization process.
Red	Significant concerns about the state of registry readiness are identified.	< 50	Request for registry initialization is rejected. The ITL Operator notifies the candidate Registry, highlighting the areas of major concern that need to be resolved before a subsequent request for Initialization is made.

Ref.	Test Description	Quality	Evidence	Confidence[1]
1.1	**Database and Application Backup** Detailed plan describing backup procedures for the production database and software.	100%	100%	100%
1.2	**Disaster Recovery Plan** Plan designed to enable Registry to survive in the event of catastrophic failure or disruption of the host environment and to re-establish normal business operations as quickly as possible.	100%	100%	100%
1.3	**Security Plan** Plan defined in order to protect the application and data from unrestricted and unsolicited use.	100%	89%	97%
1.4	**Application Logging Documentation** Documentation describing registry capability to maintain database logs and activity logs, provided to demonstrate conformance with Section 7 of the Data Exchange Standards.	100%	95%	97%
1.5	**Time Validation Plan** Specific procedures for validating server time on a periodic basis to allow successful data exchange.	100%	89%	97%
1.6	**Version Change Management** Procedure providing a clear migration path to upgrade from version to version of registry software and database schemas.	100%	89%	97%
1.7	**Test Plan** Plan ensuring a registry has performed basic testing and is capable of participating in the tests outlined in Annex H of the DES, which are required of a registry prior to being authorized to submit production transactions to the ITL.	100%	100%	100%
1.8	**Test Report** Report providing evidence that a registry has performed basic testing and is capable of participating in the tests outlined in Annex H of the DES, which are required of a registry prior to being authorized to submit production transactions to the ITL.	89%	95%	93%
1.9	**Operational Plan** Plan ensuring that the Registry has appropriately planned and staffed their operational requirements, so that the initial standards and requirements will be addressed on an ongoing basis.	92%	90%	92%

---

[1] Figures in this column were calculated using weighted averages for quality and evidence.

2   Connectivity Evaluation

This evaluation was carried out by the ITL Operator under the initialization process and the results have been transcribed here in full.

Status	Pass ⦿ Fail ☐ N/A ☐
Comments / recommendations	

Ref.	Test Description	Pass	Fail	N/A
2.1	Establish VPN connectivity between registry and ITL	⦿	○	○
2.2	Establish SSL connection	⦿	○	○
2.3	Establish basic Web service communication	⦿	○	○

3 Interoperability Evaluation

This evaluation was carried out by the ITL Operator under the initialization process and aggregated results have been transcribed here in full. In the below table, Reference 5 applies only to EU ETS member registries, and Reference 6 applies only to the CDM registry.

Status	Pass ◉ Fail ☐ N/A ☐

Independent Assessment Report
of the national registry of Japan

Addendum 2

Glossary

GLOSSARY	
TERM	**DEFINITION**
Annex H of the DES	The annex of the DES defining the initialization tests that a registry must pass as part of the initialization process
CDM Registry	The registry established by the Executive Board of the Clean Development Mechanism and implemented by the UNFCCC secretariat
CITL	Community Independent Transaction Log. The STL operated by the European Commission for the European Union Emissions Trading Scheme
Connectivity Evaluation	Part of the initialization process that tests whether a registry can connect successfully with the ITL
Consolidated Systems	Registry systems which share system infrastructure
DES	Data Exchange Standards
Document Evaluation	Part of the initialization process that assesses the documentation submitted to the ITL Administrator
ERT	Expert Review Team under Article 8 of the Kyoto Protocol
Final Comments	The final comments made by a RSA on the draft IAR after having received responses from the ITL Administrator on earlier comments
IAR	Independent Assessment Report
Initial IAR	The first IAR carried out for a registry when it initialises for the first time. Subsequent initializations are reported in Standard IARs.
Initialization	The process by which a registry is formally tested by the ITL Administrator for conformity with the DES
International Transaction Log (ITL)	The system established under the Kyoto Protocol to monitor the validity of transactions between Parties. It is implemented by the UNFCCC secretariat
ITL Administrator	The Administrator of the ITL. It is a role assigned to the UNFCCC secretariat
ITL Operator	The service provider that operates the ITL on behalf of the ITL Administrator
N/A	Not Applicable
National Registry	A registry established by an Annex I Party
Operational Performance	The performance of a registry during its operation
Reporting Period	The period of time covered by an IAR
RSA	Registry System Administrator
SEF	Standard Electronic Format, defined for the reporting by Annex B Parties to the Kyoto Protocol of their assigned amount holdings and transactions
SSL	Secure Socket Layer. A standard used to establish encrypted communications
Standard IAR	All IARs subsequent to a successful Initial IAR
Supplementary Transaction Log (STL)	An electronic database established for a Supplementary Trading Programme to monitor the validity of transactions between registries under that programme
