P1.5.1	<p>The party has referred to the below recommendation in [NIR] section 13. However the recommendation is not part of the final Inventory Review Report published by UN at 03/03/2015:</p> <p>During the review, in response to questions raised by the ERT regarding the actions taken to resolve the issues identified in the SIAR, Sweden indicated that actions are ongoing to resolve the first issue identified in the SIAR through the development of software that will periodically collect the information required by decision 13/CMP.1, annex, paragraph 44, from the CSEUR platform, store this information and make it available to the public from the servers located in Sweden. The Party also indicated that the new software will be implemented before the end of 2013. The ERT recommends that Sweden implement the necessary above-mentioned actions as soon as possible, in order to resolve this issue prior to its next annual submission. In its comments to the draft review report, Sweden informed the ERT that it has included the public information on a website controlled by the Party. The publicly available information is updated as close to real time as possible, but at least on a monthly basis.</p>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	Sweden has implemented software to make updated information public available
