Independent Assessment Report of the national registry of Slovakia

Addendum 1

Initialization 1

Registry Name	National registry of Slovakia			
Date of report	13/9/07	Pass	9	
Reporting Period	N/A	Fail N/A	-	
Start Date	15/5/07	19/73		
End Date	30/8/07			
Comments / recommendations	While the Documentation Evaluation, as reported in section 1, identified some minor limitations in the state of registry readiness, these limitations are to be rectified prior to the registry commencing live operations.			

1 Documentation Evaluation

This evaluation was carried out by the ITL Operator under the initialization process and aggregated results have been transcribed here in full.

Status	Green Amber GRed N/A
Total Score (max. 100)	74%
Comments / recommendations	 The following limitations were identified during the documentation evaluation: Application logging evidence provided does not contain examples of database and transaction logging. The evidence of usage of the time validation plan referred to in the documentation has not been provided. The documentation provided indicates that the test plan has not yet been completed in full. The description provided to support the test reports is high-level and the evidence supporting the test report is lacking. The documents provided only partially address the questionnaire in relation to the operational plan. The evidence of usage to support the change management explanation is missing.

The scoring approach used to evaluate the registry documentation is to assess the confidence level associated with each document, based on quality (completeness / accuracy / consistency of information supplied) and evidence (actual results supporting information supplied, if appropriate). The approach is set out below (see the ITL Initialization Process documentation for further information).

Status	Description	Score
Green	No significant concerns about the state of registry readiness are identified.	> 80
Amber	Minor limitations in the state of registry readiness are identified.	50 - 80
Red	Significant concerns about the state of registry readiness are identified.	< 50

1.1 Database and Application Backup Detailed plan describing backup procedures for the production database and software. 1.2 Disaster Recovery Plan Plan designed to enable Registry to survive in the event of catastrophic failure or disruption of the host environment and to re-establish normal business operations as quickly as possible. 1.3 Security Plan Plan defined in order to protect the application and data from unrestricted and unsolicited use. 1.4 Application Logging Documentation Documentation describing registry capability to maintain database logs and activity logs, provided to demonstrate conformance with Section 7 of the Data Exchange Standards. 1.5 Time Validation Plan Specific procedures for validating server time on a periodic basis to allow successful data exchange. 1.6 Version Change Management Procedure providing a clear migration path to upgrade from version to version of registry software and database schemas. 1.7 Test Plan Plan ensuring a registry has performed basic testing and is

database schemas. 1.7 Test Plan Plan ensuring a registry has
1.7 Test Plan Plan ensuring a registry has
Plan ensuring a registry has
performed basic testing and is
capable of participating in the tests 81% 67% 77%
outlined in Annex H of the DES, which
are required of a registry prior to
being authorized to submit production
transactions to the ITL. 1.8 Test Report
Report providing evidence that a
registry has performed basic testing
and is canable of participating in the
tests outlined in Annex H of the DES, 56% 62% 60%
which are required of a registry prior
to being authorized to submit
production transactions to the ITL.
1.9 Operational Plan
Plan ensuring that the Registry has
appropriately planned and staffed
their operational requirements, so that 69% 67% 68%
their operational requirements, so that 69% 67% 68%

Figures in this column were calculated using weighted averages for quality and evidence.

2 Connectivity Evaluation

This evaluation was carried out by the ITL Operator under the initialization process and the results have been transcribed here in full.

Status	Pass Fail N/A	0	
Comments / recommendations			

Ref.	Test Description	Pass	Fail	N/A
2.1	Establish VPN connectivity between registry and ITL	9		
2.2	Establish SSL connection	0		
2.3	Establish basic Web service communication	0	C	C

3 Interoperability Evaluation

This evaluation was carried out by the ITL Operator under the initialization process and aggregated results have been transcribed here in full. In the below table, Reference 5 applies only to EU ETS member registries, and Reference 6 applies only to the CDM registry.

Status	Pass Fail N/A	0	
Comments / recommendations			

Ref.	Test Description	Pass	Fail	N/A
3.	Discrete Transaction Tests	٥		
3.1	Issuance	0		
3.2	Conversion	0		
3.3	External Transfer	٥		
3.4	Cancellation	٥		
3.5	Retirement	0

Glossary

GLOSSARY					
TERM	DEFINITION				
Annex H of the DES	The annex of the DES defining the initialization tests that a registry must pass as part of the initialization process				
CDM Registry	The registry established by the Executive Board of the Clean Development Mechanism and implemented by the UNFCCC secretariat				
CITL	Community Independent Transaction Log. The STL operated by the European Commission for the European Union Emissions Trading Scheme				
Connectivity Evaluation	Part of the initialization process that tests whether a registry can connect successfully with the ITL				
Consolidated Systems	Registry systems which share system infrastructure				
DES	Data Exchange Standards				
Document Evaluation	Part of the initialization process that assesses the documentation submitted to the ITL Administrator				
ERT	Expert Review Team under Article 8 of the Kyoto Protocol				
Final Comments	The final comments made by a RSA on the draft IAR after having received responses from the ITL Administrator on earlier comments				
IAR	Independent Assessment Report				
Initial IAR	The first IAR carried out for a registry when it initialises for the first time. Subsequent initializations are reported in Standard IARs.				
Initialization	The process by which a registry is formally tested by the ITL Administrator for conformity with the DES				
International Transaction Log (ITL)	The system established under the Kyoto Protocol to monitor the validity of transactions between Parties. It is implemented by the UNFCCC secretariat				
ITL Administrator	The Administrator of the ITL. It is a role assigned to the UNFCCC secretariat				
ITL Operator	The service provider that operates the ITL on behalf of the ITL Administrator				
N/A	Not Applicable				
National Registry	A registry established by an Annex I Party				
Operational Performance	The performance of a registry during its operation				
Reporting Period	The period of time covered by an IAR				
RSA	Registry System Administrator				
SEF	Standard Electronic Format, defined for the reporting by Annex B Parties to the Kyoto Protocol of their assigned amount holdings and transactions				
SSL	Secure Socket Layer. A standard used to establish encrypted communications				
Standard IAR	All IARs subsequent to a successful Initial IAR				
Supplementary Transaction Log (STL)	An electronic database established for a Supplementary Trading Programme to monitor the validity of transactions between registries under that programme
