

Assumptions and conditions

- Conversion of pledges to QELROs (base year, start year for the commitment period, etc.)
- Modalities for measurement of emissions and removals
- Consideration of LULUCF
- Nature and use of offsets
- Consideration of complementarity (need for clarity on domestic effort)
- Diversity X comparability

Comparability and ambition

- Assumptions and conditions determine comparability and ambition
- For comparability and ambition, rules must be rigorous and defined internationally
- KP is the reference for comparability and ambition
- Pledges are not sufficient for 2° C; enhancement is necessary
- What will be the aggregate midterm mitigation contribution of AI Parties?
- How will compliance be ensured?
