Developing country mitigation: improving understanding and building an effective regime

Mitigation Workshops – April 2011

Mitigation –2011 Agenda

Key priorities for 2011:

- Clarify what targets and actions mean:
 - What is the baseline, and how it is determined?
 - What emissions does the action cover?
 - If an action is conditional, what are the conditions?
 - How much additional mitigation is possible through international support, including international market mechanisms?
- Develop MRV processes to track our efforts

Building a durable and environmentally effective regime

Our goal:

Lock in action, build confidence, increase ambition

■ Actions that *will* happen

- Actions that will be funded domestically
- Actions that have secured international support

ANNEX

■ Actions that *can* happen

- Actions that require international support
