

Item 11.c of the agenda referred to emissions of international aviation and maritime transport. SABSTA 40

Thank you Mr. Chairman,

The Kuwaiti delegation would like to support the statement made by the distinguished delegation of Cuba on the agenda item 11.c regarding the emission of international aviation and maritime transport.

Moreover, we would like to extend our appreciation to the information received from the progress reported by ICAO and IMO.

Mr/ Chairman

Kuwait echoes the deep concern at the proposals for the use of international aviation and maritime transport as a potential source for the mobilization of revenue for climate finance, not only due to their negative potential trade implications, but also due to the possible passing of financial burden from Annex 1 Parties to Developing Countries.

Thank you
