

Speaking notes
Mr Richard Muyungi
COP/CMP informal stocktaking Plenary
6pm to 7pm, Plenary Baobab
Tuesday 6 December

Thank you very much Madame President

The Subsidiary Body for Scientific and Technological Advice, having considered all items referred to it by the Conference of the Parties, completed its work on Saturday 3 December.

Madame President, the SBSTA has recommended three items to be brought to the attention of the COP and CMP President:

- **SBSTA agenda item 9(b):** Methodological issues under the Convention: Revision of the UNFCCC reporting guidelines on annual inventories for Parties included in Annex I to the Convention;
- **SBSTA agenda item 10(a):** Methodological issues under the Kyoto Protocol on carbon dioxide capture and storage;

And, jointly with the SBI:

- **SBSTA agenda item 7:** Forum on the impact of the implementation of response measures.

The SBI Chair and myself are consulting bilaterally and holding informal consultations with interested Parties to further discussions on issues as much as possible.

I thank you very much, Madame President for the support extended to myself and the SBSTA.
