SBI 41 agenda item 5 Work programme to further the understanding of the diversity of nationally appropriate mitigation actions

Version 1 of 2 December 2014 at 19:00

Draft conclusions proposed by the Chair

1. The Subsidiary Body for Implementation (SBI) concluded the work programme to further the understanding of the diversity of nationally appropriate mitigation actions (NAMAs), established pursuant to decision 1/CP.18, paragraph 19 (hereinafter referred to as the work programme).
2. The SBI noted the activities implemented during the work programme:
 - (a) The compilation of information on NAMAs to be implemented by developing country Parties;¹
 - (b) The in-session workshops held at SBI 39 and SBI 40 and the reports thereon;²
 - (c) The first and second reports on the extent of the matching of mitigation actions with financial, technical and capacity-building support under the NAMA registry;³
 - (d) The annual regional capacity-building workshops to facilitate the preparation and implementation of NAMAs.⁴
3. The SBI acknowledged that the work programme provided a platform for sharing information and experiences in relation to NAMAs as well as providing support for them.
4. It noted the importance of having more information on NAMAs, as specified in decision 2/CP.17, paragraph 34, including underlying assumptions and methodologies, sectors and gases covered, global warming potential values used and estimated mitigation outcomes.
5. The SBI noted the need for financial, technology and capacity-building support for the preparation and implementation of specific measurable, reportable and verifiable NAMAs.
6. It acknowledged that the matching of mitigation actions with financial, technology and capacity-building support under the NAMA registry is occurring, and stressed that such matching should continue in order to further facilitate the preparation and implementation of NAMAs.
7. The SBI urged the secretariat to ensure the sound operation of the NAMA registry, with a view to facilitating both the recording of information on NAMAs and support for them, as well as the matching of mitigation actions with support.
