Notes

Emissions are calculated from production and categorised sales using "emission functions".

The emission functions for HCFC-22 remain the same as in previous AFEAS compilations:

Of the sales into "Short Banking Times" (mainly open cell foam), 83% are released in the year of manufacture and the remainder in the year following.

Releases from "Medium Banking Times" (predominantly refrigeration) are distributed normally about a 4.5 year service lifetime following a 30% initial loss.

Material in "Long Banking Times" applications is released at the rate of 2%/year.
