

Plurinational State of Bolivia

JOINT MITIGATION AND ADAPTATION (JMA) APPROACH FOR THE INTEGRAL AND SUSTAINABLE MANAGEMENT OF FORESTS

Non-market based approaches

in the context of policy approaches and positive incentives on issues relating to reducing emissions from deforestation and forest degradation in developing countries; and the role of conservation, sustainable management of forests and enhancement of forest carbon stocks in developing countries

THE BACKGROUND

- The World Conference on the "Rights of People and Mother Earth" held in Bolivia (Tiquipaya, April 2010): **NO REDD+.**
- Bolivia addresses holistic, comprehensive and integrated approaches to achieve sustainable forestry development; therefore: joint mitigation and adaptation approaches in the context of climate change.
- REDD+ must be developed in tune with the general discussion and decisions about sustainable development and forests at United Nations.

PRINCIPAL DECISIONS AT UNITED NATIONS ADDRESSING NON-MARKET BASED APPROACHES

Conference on Sustainable Development of Rio+20 (Rio, June 2012)

56. We affirm that there are different approaches, visions, models and tools available to each country, in accordance with its national circumstances and priorities, to achieve sustainable development in its three dimensions which is our overarching goal.

Paragraphs of the UNFCCC decision 2/CP.17 (Durban, Dec. 2011)

67. Notes that non market based approaches, such as **joint mitigation and adaptation approaches for the integral and sustainable management of forests** as a non-market alternative... could be developed;

SBST 38 (June 2013)

14. The SBSTA noted that non-market-based approaches, such as joint mitigation and adaptation approaches for the integral and sustainable management of forests, as referred to in decision 2/CP.17, paragraph 67, are important to support the implementation of the activities referred to in decision 1/CP.16, paragraph 70.

Decisions adopted by the Governing Council/Global Ministerial Environment Forum at its first universal session (Decision 27/8)

Acknowledges that there are different approaches, visions, models and tools developed by Member States of the United Nations in order to achieve sustainable development, and in this regard takes note of the approach of Living-Well in balance and harmony with Mother Earth (...)

DIFFERENT APPROACHES(**REDD+/Non-carbon benefits/JMA**)

SUSTAINED PUBLIC FINANCING

GCF window: Forest Mitigation and Adaptation

Time period of 20 years (extended)

Performance of results-based actions (JMA Indicators)

EX ANTE PUBLIC FINANCE

Variable tranches

«partial payment for partial performance»

EX POST PUBLIC FINANCE

Fixed tranches
«all or nothing»

Specific conditions about joint mitigation and adaptation (JMA) indicators:

- Reduction of unplanned and ilegal deforestation.
- Livelihoods of local peoples.
- Sustainable productive systems.
- Management of environmental functions (CO2, water regulation, etc.)

General conditions of forestry governance at the national level:

- Legislation about autonomous units of governance (decentralization)
- Land and forest titling (property rights)

EXAMPLE OF A JMA PROGRAMME FOR A PERIOD OF 20 YEARS IN A DEVELOPING COUNTRY

The Joint Mitigation and Adaptation approach in Bolivia

The Bolivian objective is to reduce unplanned and illegal deforestation, maintain environmental functions, reduce land and resource degradation, and facilitate the transition to better land use through the development of more sustainable production system (linking agriculture and forestry in a landscape approach).

LAW No. 300 OF MOTHER EARTH AND INTEGRAL DEVELOPMENT FOR LIVING-WELL

PLURINATIONAL AUTHORITY OF MOTHER EARTH

Joint Mitigation and Adaptation Mechanism for the Integral and Sustainable Management of Forests and Mother Earth

Territorial and landscape approach

Mitigation Mechanism for Living-well

Sectoral approach:

- Energy
- Industry
- Services

Adaptation Mechanism for Living-Well

Programmatic approach:

- Resilience of productive systems
- Water management
- Prevention and reduction of risks

Plurinational Fund of Mother Earth

Financial transfers reimbursable and nonreimbursable

METHODOLOGICAL BASIS

Thanks...
