
Implementation of National mitigation initiatives – scope for capacity building

Capacity Building Workshop on Development of CDM Activities and NAMA for Public And Private Sector In Zimbabwe

Nyanga, Zimbabwe
24 – 25 August 2016

UNFCCC, Regional Collaboration Centre, Kampala

Objectives

- Linkage between various mitigation initiatives
- Scope for capacity building

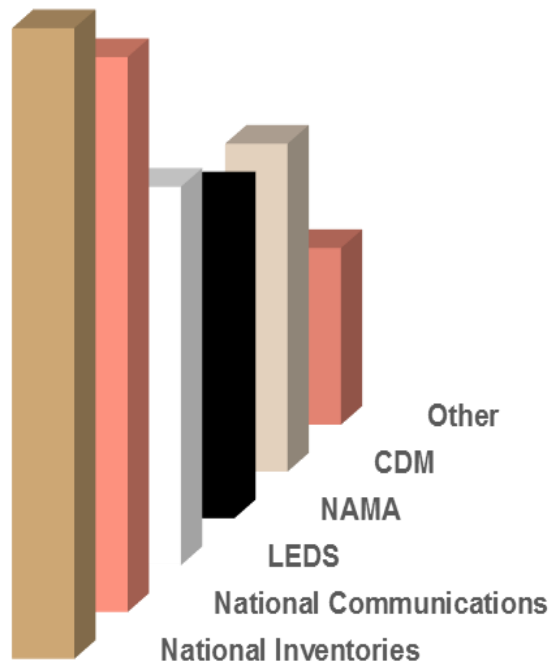

Potential links of INDCs with other national climate change processes

Most countries use existing documents as data sources for their INDC development:

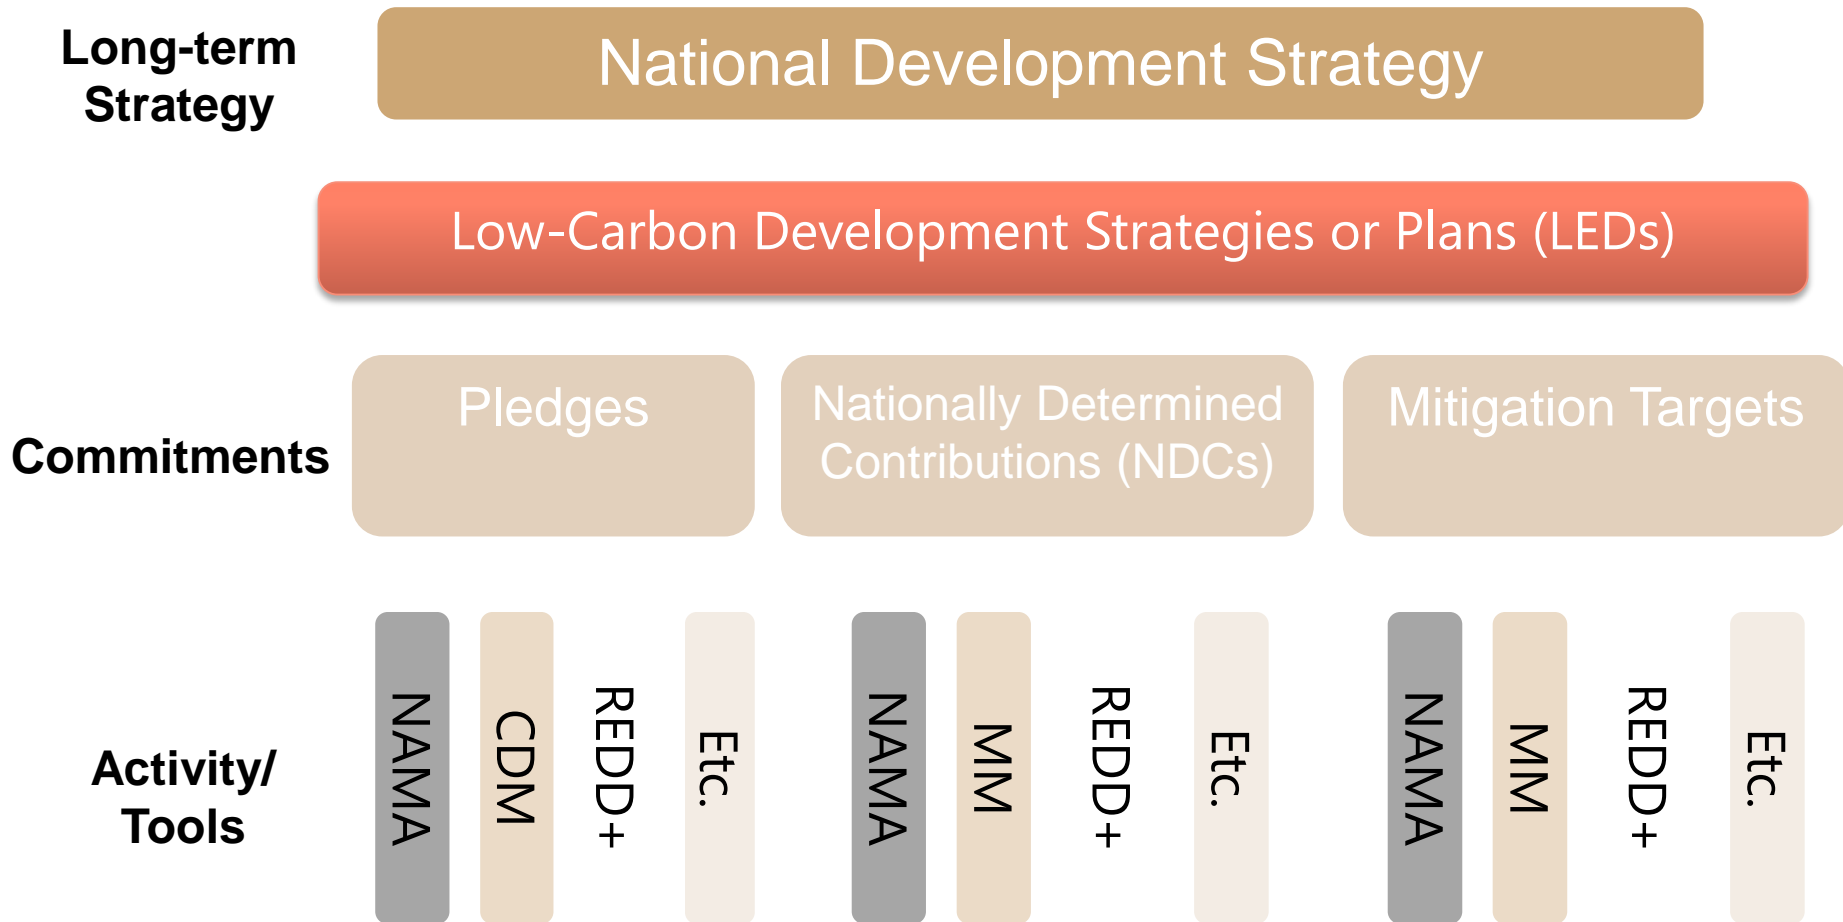

- **National Communications** (e.g. Morocco)
- **National Inventories**

Some countries build upon ongoing national climate change processes to compile and communicate their INDC:

- **Low Emissions Development Strategies - LEDS** (e.g. Colombia)
- **Nationally Appropriate Mitigation Actions - NAMAs** (e.g. Thailand)
- **Clean Development Mechanism - CDM** (e.g. Vietnam)

Linkage between initiatives

Source: Boos et al, July 2015, "How are INDCs and NAMAs Linked?"

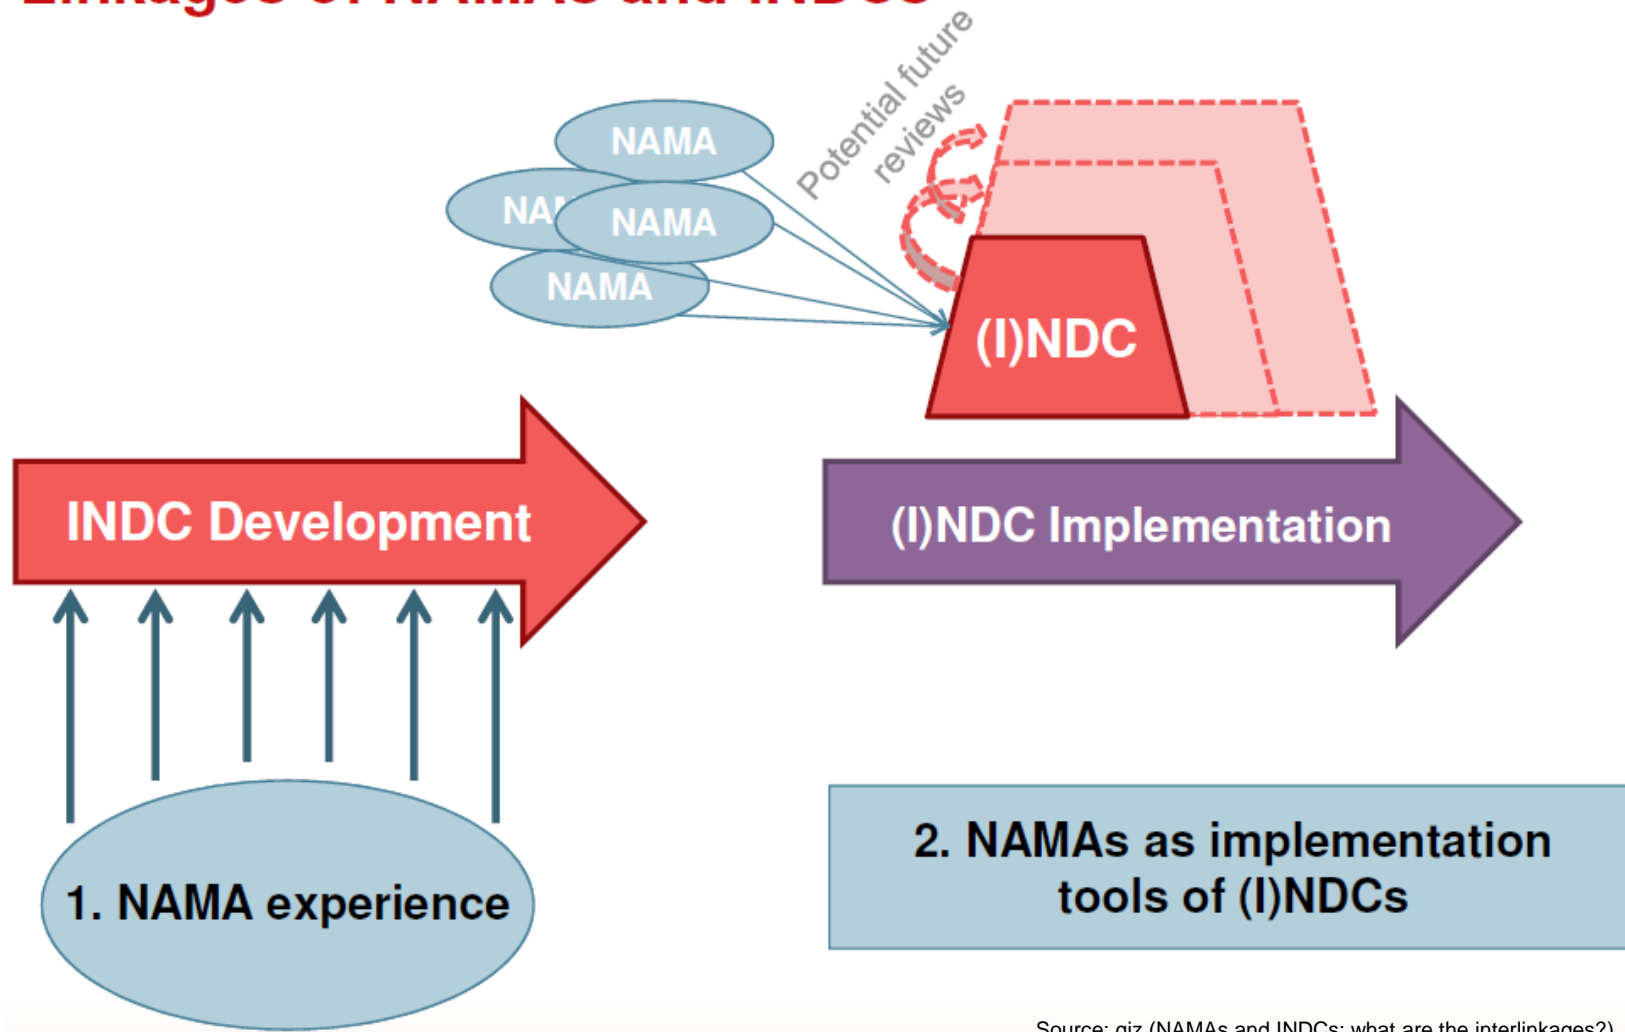

CDM Experience to Develop NAMA

- Governance Structure
- Accounting Structure (centralized system, registry & ITL , DOE etc.)
- Methodological standards – Comparable quality and fungible
- Ensure Environmental Integrity
- MRV provision (Program level assessment / bottom-up and top down approaches)
- Consistency in MRV requirements in most of the programs except verification levels.
- Transparency and Independence.
- Participatory approach (local/global stake holder)
- QA/QC procedures on data quality

NAMAs and INDCs: Inter-linkages

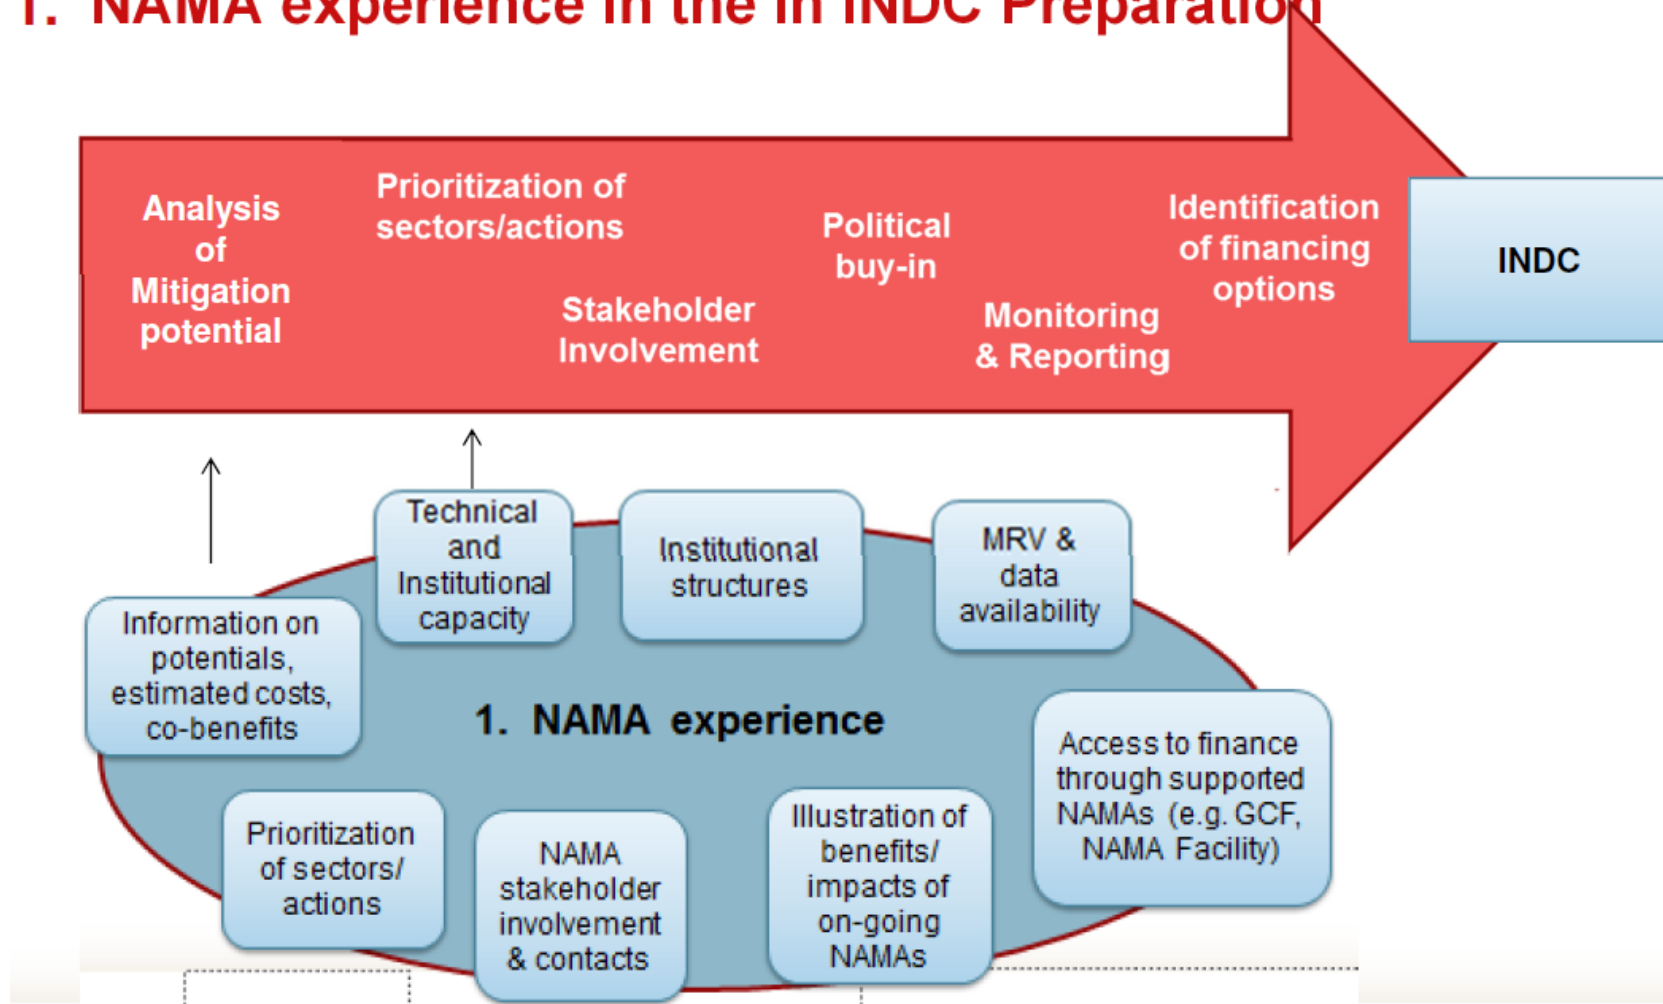

Linkages of NAMAs and INDCs

NAMAs and INDCs: Inter-linkages

1. NAMA experience in the in INDC Preparation

Source: giz (NAMAs and INDCs: what are the interlinkages?)

Role of NAMAs in NDC implementation

Many INDCs already include specific mitigation actions/NAMAs and/or provide important information as a reference/starting point for developing concrete actions:

- **Political priorities**
- **Short term/ long term mitigation goal**
- **Reduction potential of different sectors**
- **Basis for NAMAs' prioritization**
- **Concrete activities**
- **Costs and co-benefits**
- **Stakeholders**

... that can guide the translation of NDCs into concrete actions/NAMA provide opportunity for countries to implement their INDC.

Role of NAMAs in NDC implementation

Next steps in transforming (I)NDCs: Scope for Capacity building

- **Implementation plan**
- **Technical preparation and capacity building**
- **Build information base and monitoring system**
- **Build institutional structures**
- **Mainstream NDC into development planning and sector specific approaches**
- **Mobilize resources and Private sector participation**
- **Build support for climate action**

Source: giz (NAMAs and INDCs: what are the interlinkages?)

Capacity building

Institutional

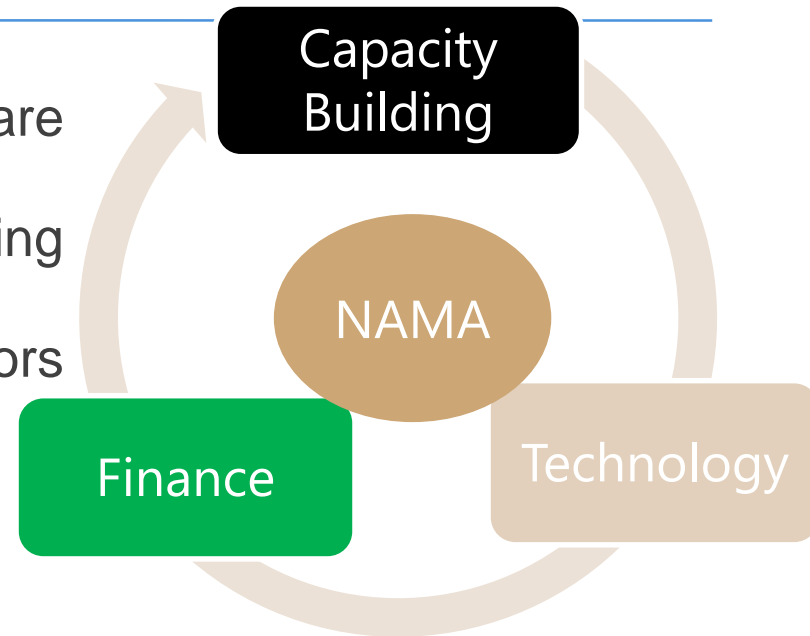

- Guidance and staff capacity to prepare NAMAs
- NAMA coordination and managing authorities
- Outreach activities and liaising with donors & investors
- Public private dialogue
- Promotion of public-private partnerships

Technical

- Support for establishment of MRV system
- Support for preparation of NAMA documents

Financial

- Funding opportunities / interest
- Public finance mechanisms to catalyze private investment flows.

Thank you for your attention!
