

Annex 3:

Status Reports

This annex includes the status reports of the MS submissions under Council Decision 99/296/EC as available by 4 April 2003. The status reports are completed by EEA/ETC-ACC as part of the initial checks in order to summarise the completeness of MS submissions.

For each submission of a MS, a status report is filled in. This means that more than one status report for one MS may be included in this annex according to the number of updates submitted.

In the section “National Inventory Report” the information submitted by a MS is characterised briefly, even if it does not contain all the information required by the UNFCCC reporting guidelines on annual inventories.

In part II of the status reports on recalculations, EEA/ETC-ACC calculated the percentage difference in aggregate GHG base year recalculations for those MS, that submitted the relevant information and that have chosen 1995 as the base year for F-gases. This information cannot be taken from the CRF, as the CRF requires the MS to recalculate for each year separately. (The base year is a combination of the years 1990 and 1995, if 1995 is chosen as base year for the F-gases).

In part III of the status reports on completeness of CRF tables, ETC-ACC marked the column “information gaps related to reporting” for each CRF table if: (1) blank cells have been identified but (2) the reason for blank cells is not obvious. This means that there is no mark in this column, if the reason for blank cells is obvious. Comments have been included only if major data/information gaps within the CRF tables have been identified.

SBDT: Sectoral background data tables

* This column indicates that reporting gaps (blank cells) have been identified in a given table of the CRF. In most cases this was due to lack of use of indicators (NO, NE, NA, IE, C, 0).

** According to the UNFCCC reporting guidelines on annual inventories (FCCC/CP/1999/7), these tables should be filled in only by Parties that use the IPCC default methodology.

SBDT: Sectoral background data tables

* This column indicates that reporting gaps (blank cells) have been identified in a given table of the CRF. In most cases this was due to lack of use of indicators (NO, NE, NA, IE, C, 0).

** According to the UNFCCC reporting guidelines on annual inventories (FCCC/CP/1999/7), these tables should be filled in only by Parties that use the IPCC default methodology.

SBDT: Sectoral background data tables

* This column indicates that reporting gaps (blank cells) have been identified in a given table of the CRF. In most cases this was due to lack of use of indicators (NO, NE, NA, IE, C, 0).

** According to the UNFCCC reporting guidelines on annual inventories (FCCC/CP/1999/7), these tables should be filled in only by Parties that use the IPCC default methodology.

SBDT: Sectoral background data tables

* This column indicates that reporting gaps (blank cells) have been identified in a given table of the CRF. In most cases this was due to lack of use of indicators (NO, NE, NA, IE, C, 0).

** According to the UNFCCC reporting guidelines on annual inventories (FCCC/CP/1999/7), these tables should be filled in only by Parties that use the IPCC default methodology.

SBDT: Sectoral background data tables

* This column indicates that reporting gaps (blank cells) have been identified in a given table of the CRF. In most cases this was due to lack of use of indicators (NO, NE, NA, IE, C, 0).

** According to the UNFCCC reporting guidelines on annual inventories (FCCC/CP/1999/7), these tables should be filled in only by Parties that use the IPCC default methodology.
