

JICA Project of Capacity Development for Climate Change Strategies in Indonesia

SUB-PROJECT1

Formulate NAMAs in a MRV manner and mainstream adaptation into development planning

Implementing Agency: BAPPENAS

Sub-Project Outputs:

- (1) Capacity for formulating NAMAs in a MRV manner
- (2) Capacity for mainstreaming adaptation into development planning
- (3) Background study for RPJMN 2015-2019 on low carbon development policy

- Pilot sectors for NAMAs sector/sub-sectors relating to Energy Efficiency (Fertilizer Manufacturing, Palm-oil Production, Rubber Processing) and Waste Management
- Pilot Areas: North Sumatra, South Sumatra

SUB-PROJECT2

Vulnerability Assessment

Implementing Agency: BMKG

Sub-project Outputs:

- (1) Capacity for climate change projection and verification (assessment of exposure)
- (2) Capacity for assessment of adaptive capacity

- Pilot Area: Bali
- Produce vulnerability assessment report, including vulnerability maps

SUB-PROJECT3

Prepare national GHG Inventories

Implementing Agency: KLH

Sub-project Outputs:

- (1) Capacity to periodically and systematically collect and compile data necessary for national GHG inventories
- (2) Accuracy and reliability of GHG inventories for each sector
- (3) Institutional arrangement for preparing national GHG inventories

- Produce draft national GHG Inventory reports (2008 and 2010)

Stakeholders in Indonesia

- BAPPENAS - Local governments
- Relevant line ministries etc.

Other donors

- GIZ (NAMA/MRV)
- EU (MRV), etc.

Inputs from Japan

- Long-term expert (JICA Senior Advisor) & Expert team
- Long- & short-term training, etc.

- BMKG - KLH - Relevant line ministries
- Local governments, etc.

- GIZ (vulnerability assessment), etc.

- Long-term expert

- KLH - Relevant line ministries
- Local governments, etc.

- UNDP (national communication), etc.

- Long-term expert (National Institute of Environmental Studies GHG Inventory Office) & Expert team, etc.
