Annex 4: Default values .....	49

## 1 Introduction

The Non-Annex I Inventory software (NAIIS) web application is a web-based tool developed for use by Parties not included in Annex I to the Convention (non-Annex I Parties) to estimate and report their national greenhouse gas inventories (GHG inventories). As per Article 4, paragraph 1 (a), and Article 12, paragraph 1 (a) of the Convention, non-Annex I Parties are required to communicate to the Conference of the Parties a national inventory of anthropogenic emissions by sources and removals by sinks of all greenhouse gases (GHGs) not controlled by the Montreal Protocol, to the extent their capacities permit, following the guidelines contained in the annex to decision 17/CP.8.

In order to assist non-Annex I Parties in estimating and reporting their GHG inventories as part of their national communications, the secretariat developed an Excel-based software which incorporated all the elements of a national GHG inventory prescribed by decision 17/CP.8. The software was based on the IPCC inventory software version 1.1, which used the Tier 1 methodologies for estimating GHG emissions and removals for all source categories included in the Revised 1996 IPCC Guidelines, and further complemented by the GPGs.<sup>1</sup>

Since its release in 2005, most non-Annex I Parties have been using that software for the development of their national GHG inventories. In December 2011, Parties requested the secretariat to upgrade the software and make it available to non-Annex I Parties by June 2013. Pursuant to that request, the secretariat converted the current Excel-based version of the software (v.1.3.2)<sup>2</sup> into a web-based application (NAIIS) which provides greater flexibility and security for maintaining data.

## 2 General information

The NAIIS is a web-based application designed to enable non-Annex I Parties estimate their national GHG inventories according to the UNFCCC guidelines and using the IPCC methodologies, and to report the results in their national communications and biennial update reports.

### 2.1 System overview

The NAIIS web application has the following functionalities:

1. User management (only for the user roles NFP and PM)
2. Submission management
3. Data entry
4. Key category analysis
5. Reporting tables
6. Data Export/Import
7. Completeness
8. Consistency

The NAIIS web application allows input of data through three different channels:

1. Manual input into the entry grids
2. Partial or full import of data from Excel
3. Bulk import of data from XML

The GHG emissions totals, by gas and by sector, are automatically calculated and saved based on the values entered for activity data (AD), emission factors and other relevant parameters. In addition, the software facilitates the reporting of other category specific information, for example, the choice of the method for activity data and emission factors.

## 2.2 Pending NAIIS features

List of pending functionalities in NAIIS:

- 
1. Web services integration for help desk
  2. Display of information in 5 remaining UN languages.

## 2.3 Contact

Requests for access to, inquiries on the use of the software, and comments on the design and functionalities of the application should be sent to the dedicated e-mail address **[naiisapp@unfccc.int](mailto:naiisapp@unfccc.int)**.

## 3 Getting started

### 3.1 User Access, Roles and Privileges

The users of the application are the members of the national team(s) of non-Annex I Parties involved in the preparation of their national GHG inventories, and each user is assigned a role.

The table below explains the different levels of the access rights and corresponding explanation for each role. It is important to note that the roles are not necessarily identical to a person's title (e.g. National Focal Point) and that a person can take on several roles (which may be necessary for some countries).

There are three types of access rights (roles) to the NAIIS application:

Type of access rights for specific roles	Process to gain access rights
<p><b>National Focal Point (NFP):</b> Will be responsible for identifying the members of the team and is the only one who has the right to approve the submission of any GHG inventory.</p> <p>NFPs will have the option to create, edit, update or delete all of their country's GHG data entries, and grant access rights to the 'Project Manager' and 'Sectoral Experts' for their country if they choose.</p>	<p>Parties that have not already requested and <b>received access rights</b> can obtain them by having their National Focal Point contact: <a href="mailto:naiisapp@unfccc.int">naiisapp@unfccc.int</a></p> <p><b>(Note: Some Parties may have more than one individual acting as the NFP; however the system can accommodate only one account per Party).</b></p>
<p><b>Project Manager (PM):</b> Will have the right to enter/edit data in all sectors, as well as to generate an official submission to the UNFCCC, and grant access rights to the 'Sectoral Experts' for their country.</p>	<p>Entities will be provided these rights by their NFP. If a Party decides to grant access to a PM, their NFP will be able to create such user account on the NAIIS application.</p>
<p><b>Sectoral Experts (SE):</b> Will have the right to enter/edit data in respective sector(s).</p>	<p>Experts will be provided these rights by their NFP and PM. If a Party decides to grant access to Sectoral Experts, the NFP will be able to create such user accounts and assign them in respective sector(s).</p>

Access for the NFP will be provided by the secretariat, upon request; however, the accounts of the other users within the country shall only be created by the NFP.

### 3.2 How to access/ log out / create a GHG inventory

#### 3.2.1 How to access the NAIIS application

Open any internet browser (i.e. Internet Explorer, Firefox, etc.) and type in the following URL <http://unfccc.int/7627> on the browser's address bar. (figure 1 and figure 2)

**Figure 1. Using Internet Explorer browser**

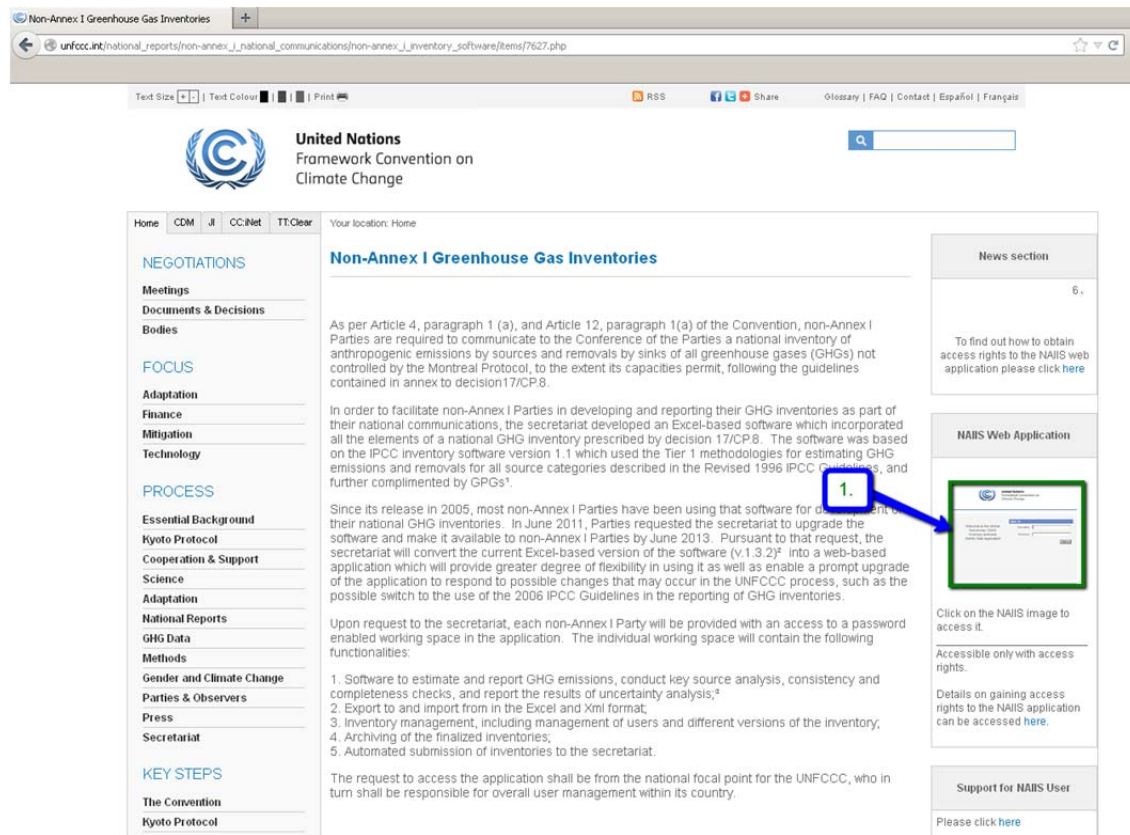

**Figure 2. Using Firefox browser**

Press the 'Enter key' and the non-Annex I Greenhouse Gas Inventories web page appears.

To access the NAIIS application, click on the image NAIIS Web Application, the right hand side of the screen. (figure 3, number 1) and the log-in page will be displayed. (figure 4)

**Figure 3. UNFCCC non-Annex I Greenhouse Gas Inventories web page**

**Figure 4. Log-in page of the NAIIS Web Application**

To **log-in**, enter the username and password and click on the “Sign in” button.

## 3.2.2 Create, Start, Add new and View GHG inventory year

These functions allow the NFP and PM to create or edit a GHG inventory within the NAIS software.

### 3.2.2.1 Create a new GHG inventory or Start a GHG inventory year

#### 3.2.2.1.1 Create a new GHG inventory

**Note:** This step can ONLY be undertaken by the NFP or PM !

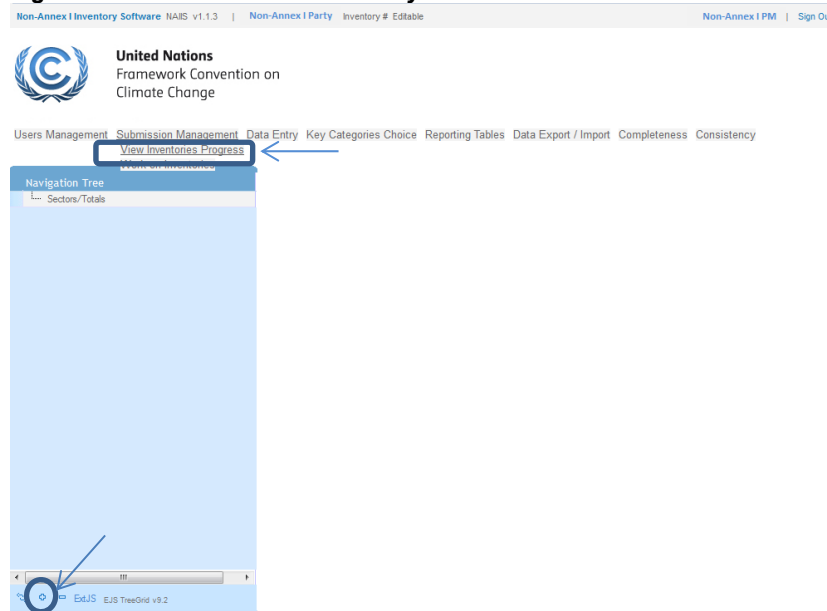

In order to create one or several GHG inventories, the following steps can be done by the NFP or PM:

- Log in as NFP or PM
- Hover the cursor on “Submission Management” menu and click on the “View Inventories Progress” button. (see Figure 5). Left click on the “+” sign will create a new GHG inventory. (see Figure 6)

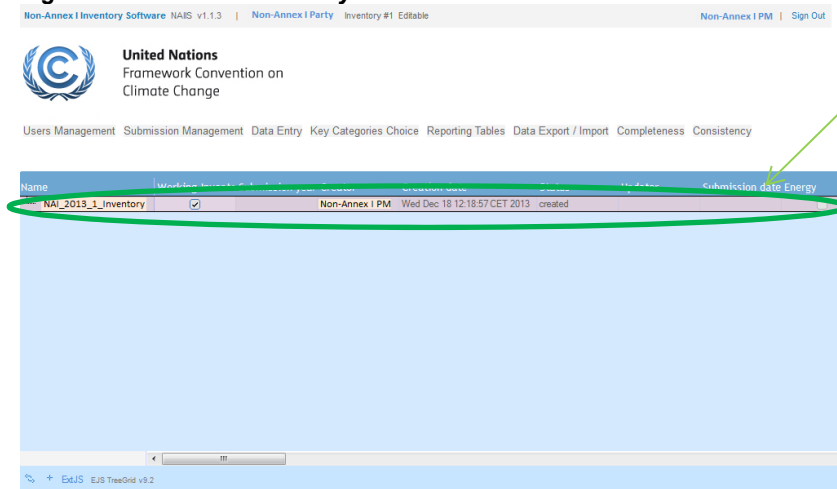

The new GHG Inventory name will be automatically generated by the NAIS system, as follows:  
<Name of the Non-Annex I Party>\_<Year in 4 digits>\_<version number>\_Inventory

For example: Paraguay\_2013\_1\_Inventory or Bhutan\_2014\_2\_Inventory

**Figure 5. Create new GHG inventory screen**

**Figure 6. New GHG inventory created screen**

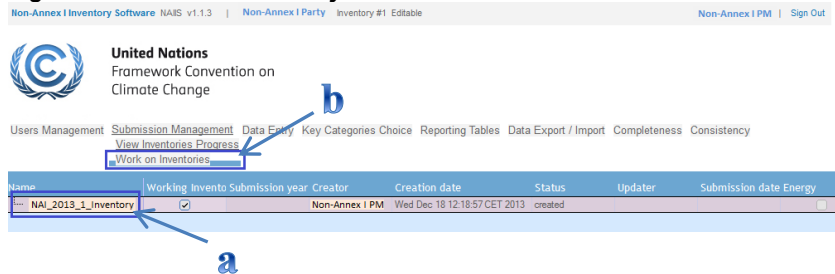

### 3.2.2.1.2 Start a GHG inventory

In order to START a GHG inventory, please follow the steps below:

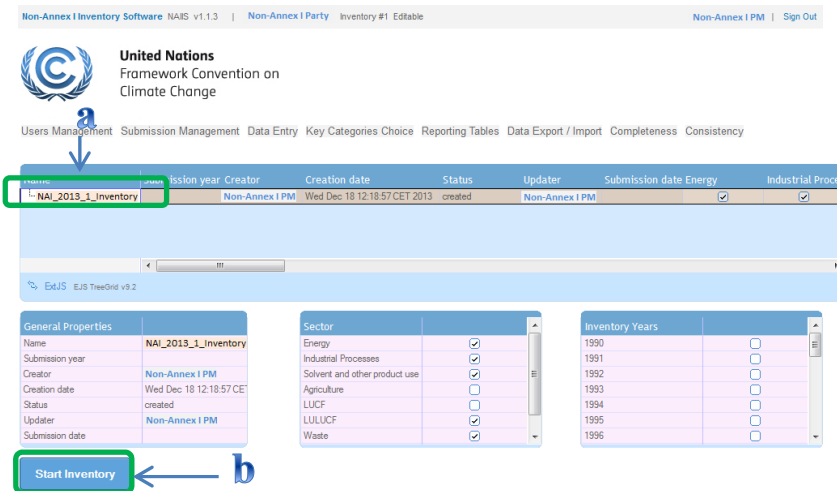

- Log in as PM.
- Hover the cursor on the “Submission Management” and click on the “View Inventories Progress” button.
- Click/select the appropriate GHG Inventory in Status = “created” (see figure 7a).
- Click on “Work on Inventories” under Submission Management (see figure 7b).

**Figure 7: Select an Inventory screen**

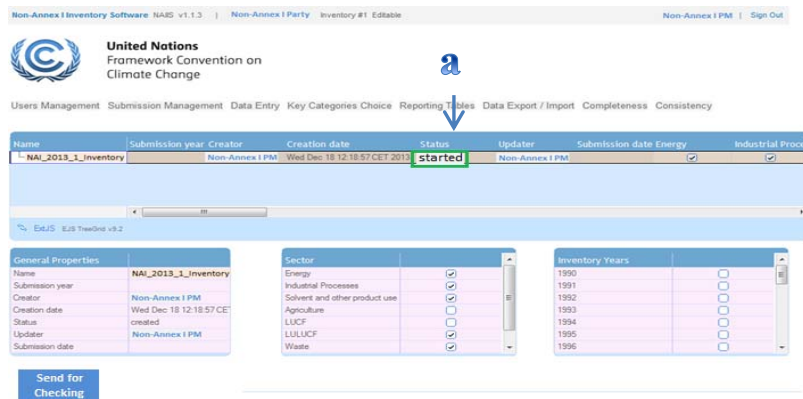

- Left click to select the appropriate Inventory (figure 8a)
- Press the “Start Inventory” button (figure 8b)

**Figure 8: Start an Inventory screen**

Once the “Start Inventory” button is pressed, the status of the selected Inventory change to “started”. (see Figure 9)

**Figure 9: “Started” status of an Inventory**

### 3.2.2.2 Add a new GHG inventory year or edit general properties/sectors (only NFP and PM's)

- Log in as NFP or PM.
- Click on “Work on Inventories” under Submission Management (figure 10).

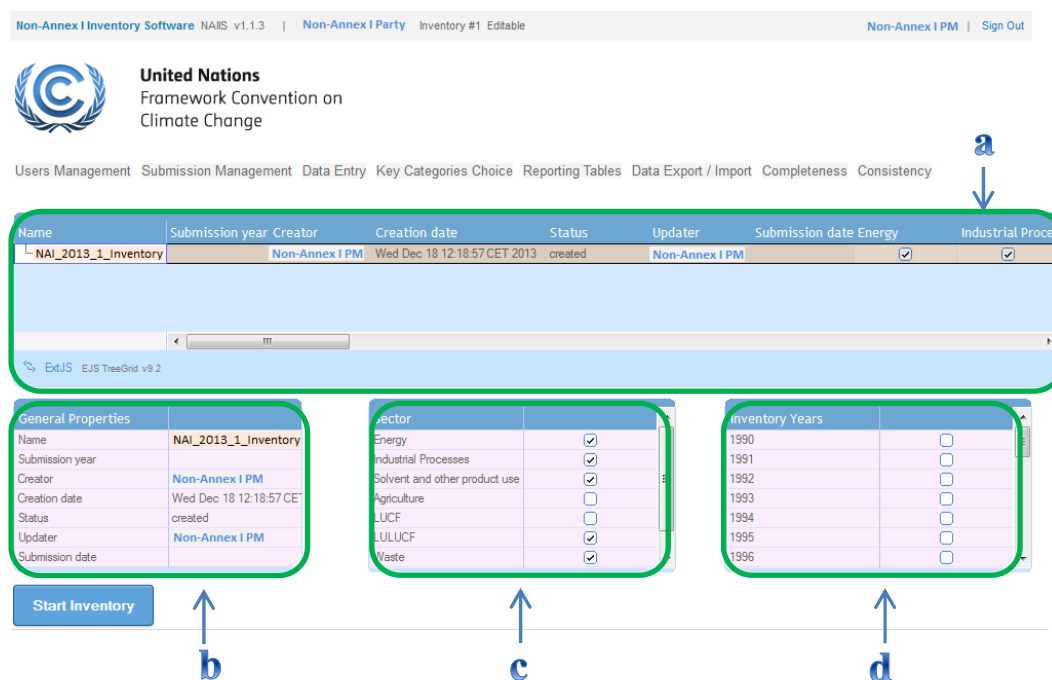

**Figure 10: Sub menu “Work on Inventories”**

Once “Work on Inventories” has been clicked, the initial screen will be displayed, which shows the following boxes (figure 11):

- Existing Inventory (with all options)
- General properties – include the name, submission year, creator, creation date, status, updater and submission date
- Sectors
- Inventory years

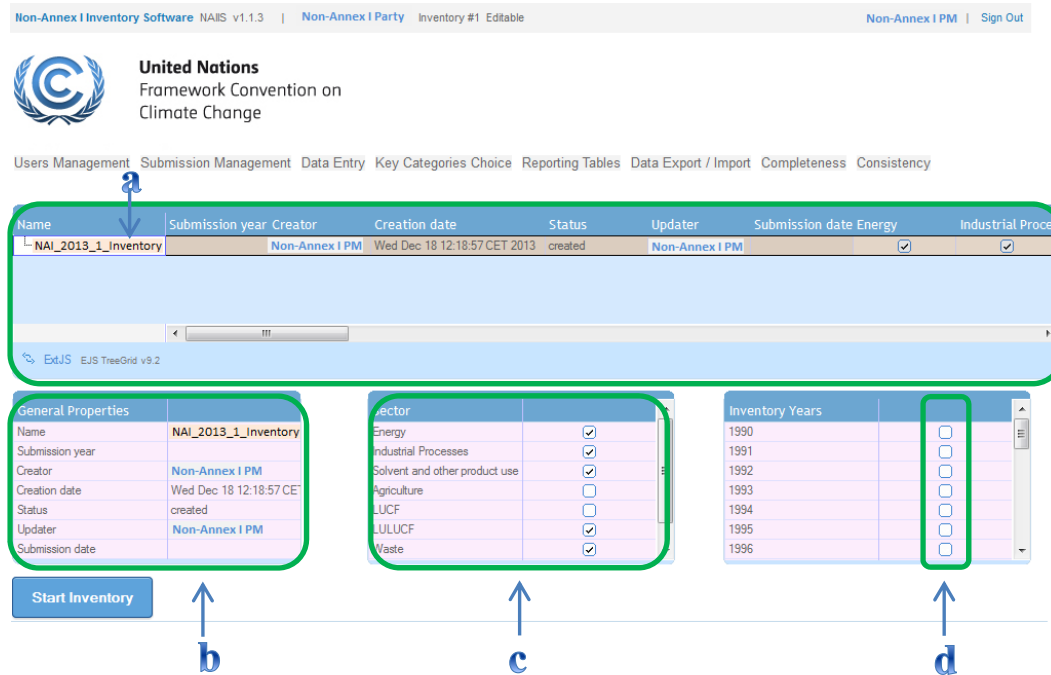

**Figure 11. Initial screen of “Work on Inventories”**

Follow the steps to add/remove an inventory year:

- Click on the inventory year (figure 12a)
- Select the inventory year under General properties (figure 12b)
- Select or deselect the appropriate Sectors (figure 12c)
- To **add** or **remove** an inventory year, select or deselect the relevant year under Inventory Years box (figure 12d)

**Figure 12. Screen of “Work on Inventories”**

### 3.2.2.3 View Inventory Progress

- The NFP or PM should log into the system.
- Click on “View Inventories Progress” under Submission Management (figure 13)

**Figure 13. View Inventories Progress**

Click on “View Inventories Progress” button will display the initial screen with the following columns (figure 14a, 14b and 14c):

- **Name** - automatically given by the system, once created
- **Working Inventory** – active box shows the current working inventory
- **Submission year** – year when the submission process was initiated
- **Creator** – user who created the inventory
- **Creation date** – date when the inventory was created
- **Status** – created, started, check, submitted, approved, awaiting approval, awaiting rejection check
- **Updater** – user name who updated the inventory
- **Submission date** – date of submission
- **Sectors** – Energy, Industrial processes, Solvent and other product use, Agriculture, LUCF, LULUCF, Waste, Other
- **Inventory year**

Note: Once a user logs in, the initial screen is the Submission Management screen of the non-Annex I Party

### 3.2.4 How to log out

To **log out**, click on the link to **“Sign out”** located at the upper right corner of the page. (Figure 15)

Figure 15. Sign out screen

When you have successfully logged-out of the system, the screen below (figure 16) will be displayed.

Figure 16. Sign out screen

Note that **after 20 minutes of inactivity**, the session is automatically timed out and an error message will be displayed (figure 17). In such cases, either click on “Sign out” and log in again, or click on any of the links to be redirected to the log in page.

Figure 17. Fatal error

## 3.3 User management

### 3.3.1 Add User

**Note:** This function is **ONLY** available for NFP's and PM's!

- Log in as NFP or PM
- Hover the cursor on the “Users Management” tab and click on the “Users Administration” button. (see figure 18); this opens the Users Administration screen (figure 19).

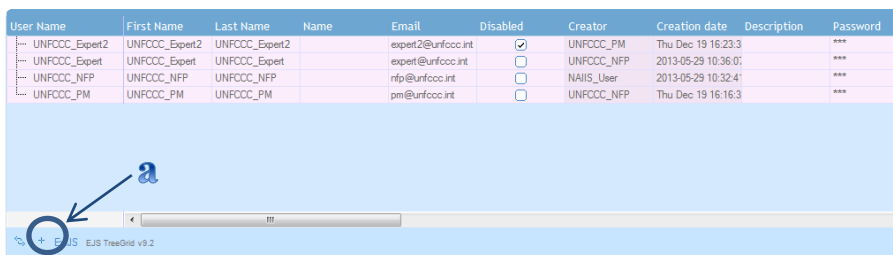

**Figure 18. Users Administration**

Expert	

- Click the “+” sign (figure 19a) creates a new user (figure 20 new User).
- Double click on the cell of the newly created user name and enter a new user name (must be unique and contain at least 3 characters).  
Once done, press the enter key and the new user name will be saved in the respective table of the NAIIS database.

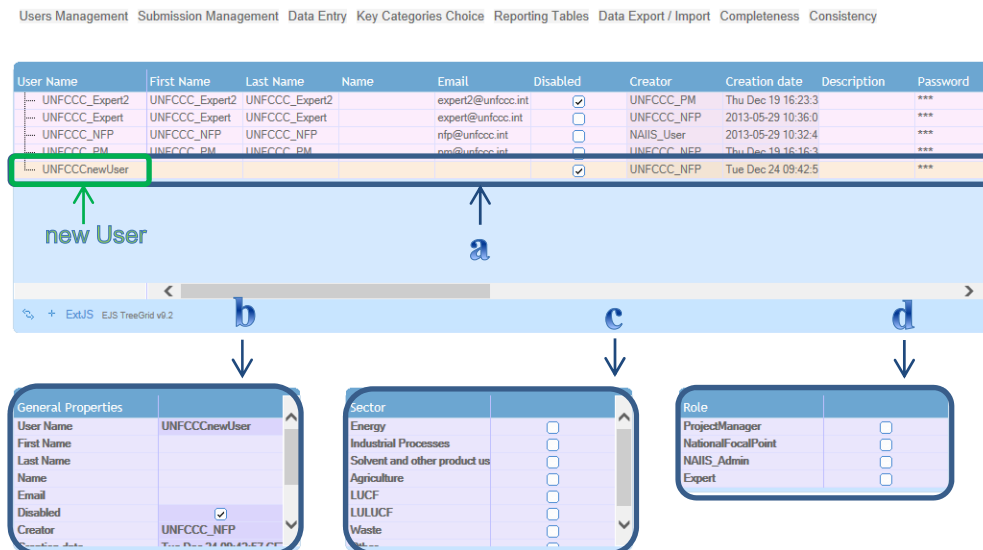

**Note:** New user name(s) will be generated by the system as default [Non-Annex I Party name] + “newUser” (e.g. UgandanewUser, PhilippinesnewUser, ArgentinanewUser)

## Fill-in User Information

There are two options to fill in the information of a new user

- (a) by entering the data on the same row of the new user (figure 20a) or;
- (b) by entering the data in the **General Properties**, **Sector** and **Role** boxes (figure 20b, 20c and 20d).

**Figure 20. New user created screen**

Fill in the following fields:

- First Name
- Last Name
- Name (optional)
- Email address
- Password (must have 1 capital letter, 1 numeric and 8 characters long)
- User Role
- Sectors
- Change password (tick the box prompts the user to change his/her password)

The functionality to change password is not fully implemented in this release. Please do **not** tick the "Change password" box under General Properties! (See figure 20 b).

- Enable user (Proceed to section 3.3.2 Disable/Enable User)

### 3.3.2 Disable/Enable User

This function allows the NFP and PM to activate and/or de-activate users of their country.

- Log in as NFP or PM
- Hover the cursor on the "Users Management" tab and click on the "Users Administration" button. (see figure 21); this opens the Disable/Enable User screen (figure 22).

**Figure 21. Users Administration**

Users Management Submission Management Data Entry Key Categories Choice Reporting Tables Data Export / Import Completeness Consistency

**Users Administration**

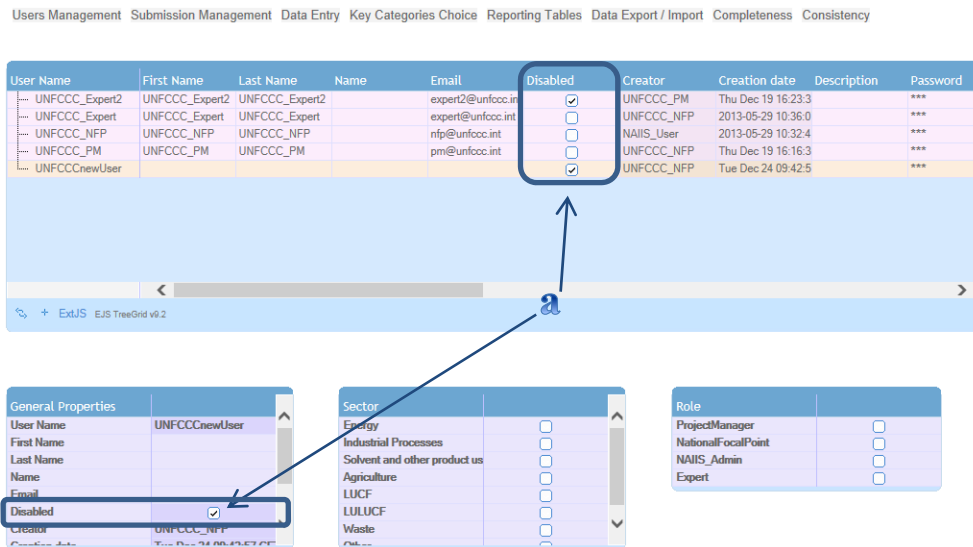

#### 3.3.2.1 Enable User

On the Disable/Enable screen, search for the user whose account should be activated and un-tick the 'Disabled' box. (figure 22a).

#### 3.3.2.2 Disable User

On the Disable/Enable screen, search for the user whose account should be de-activated and tick the 'Disabled' box (figure 22a).

**Figure 22. Disable/Enable User screen**

### 3.3.3 View User

This function enables NFP and PM to view all users of their country.

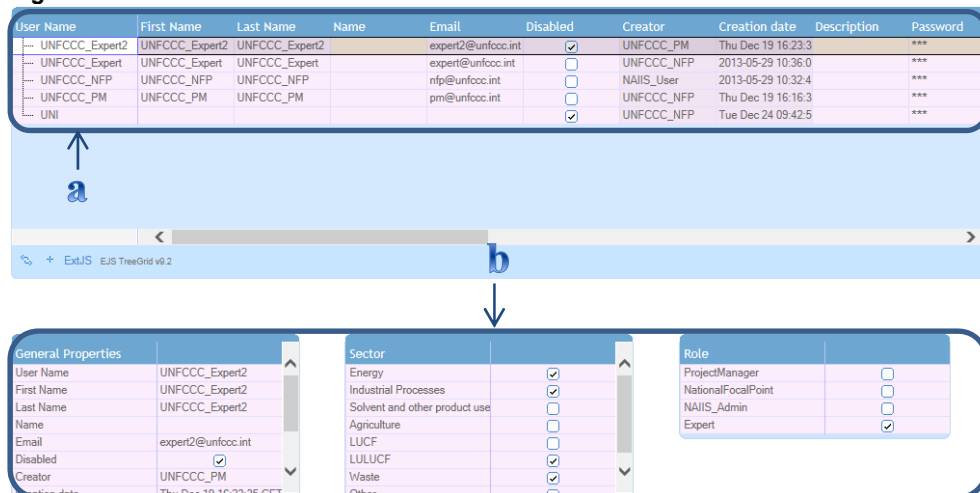

- Log in as NFP or PM
- Hover the cursor on the “Users Management” tab and click on the “Users Administration” button. (see figure 21); this opens the Users Administration screen (figure 22).

**Figure 21. Users Administration**

- Click on the row of the respective user to be viewed (figure 22a). All information of the selected user will be displayed on the **General Properties**, **Sector** and **Role** boxes (figure 22b).

**Figure 22. Users Administration**

## 4 Using the system

This section provides a description of the various functions of the system represented by each tab indicated in section 3.2.3 above.

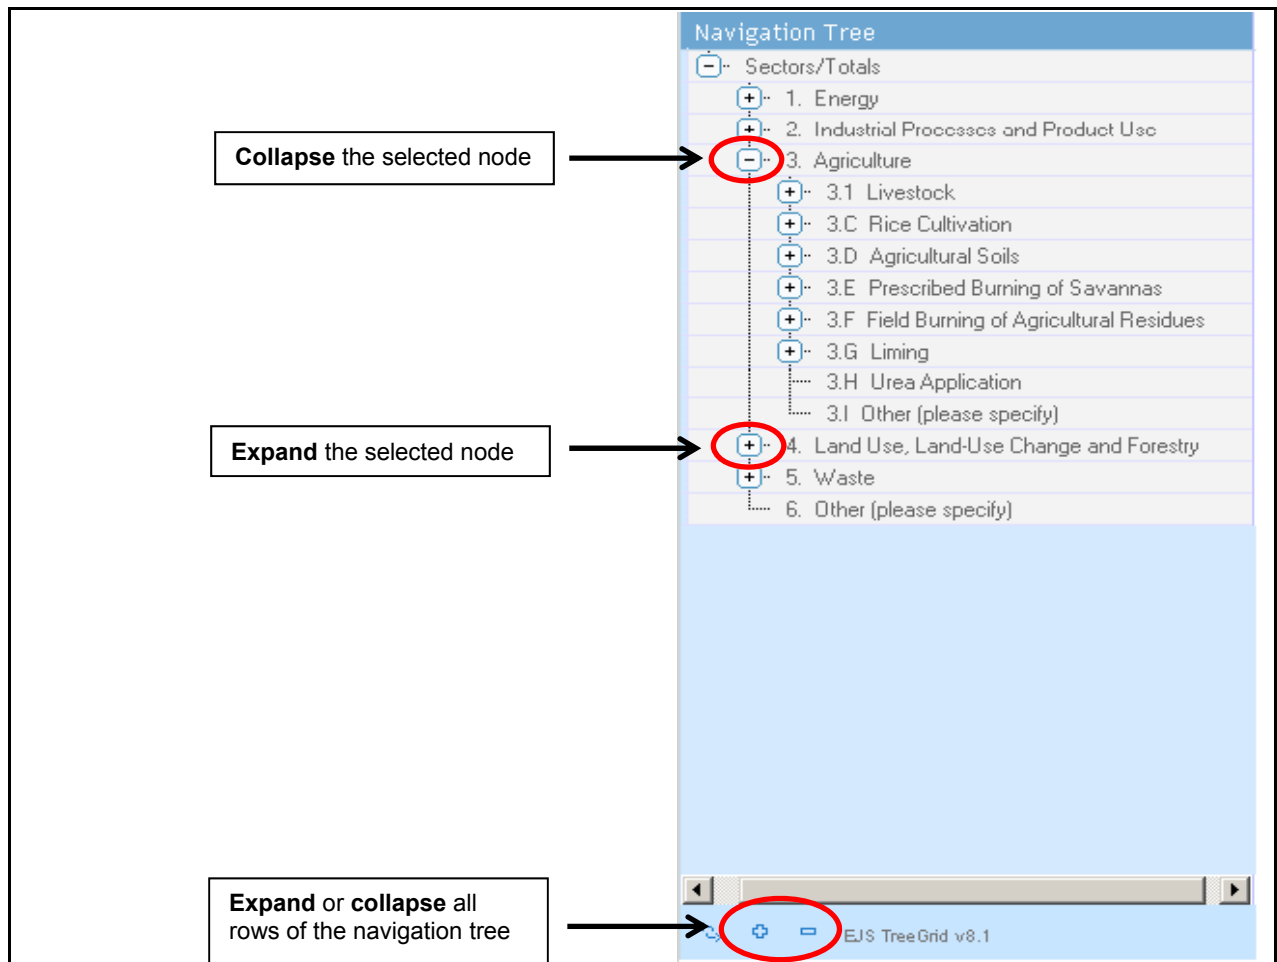

### 4.1 Data Entry

The data entry tab provides the function to **input data** into the system through the use of **grids**. To display the grid, a node has to be selected from the **navigation tree**. (Figure 23)

### 4.2 Navigation tree

To expand or collapse the tree, click on the **+** or **-** signs in front of the nodes, respectively. You can also expand or collapse the entire tree by clicking the plus and minus signs at the bottom of the tree.

**Figure 23. Functions of the navigation tree**

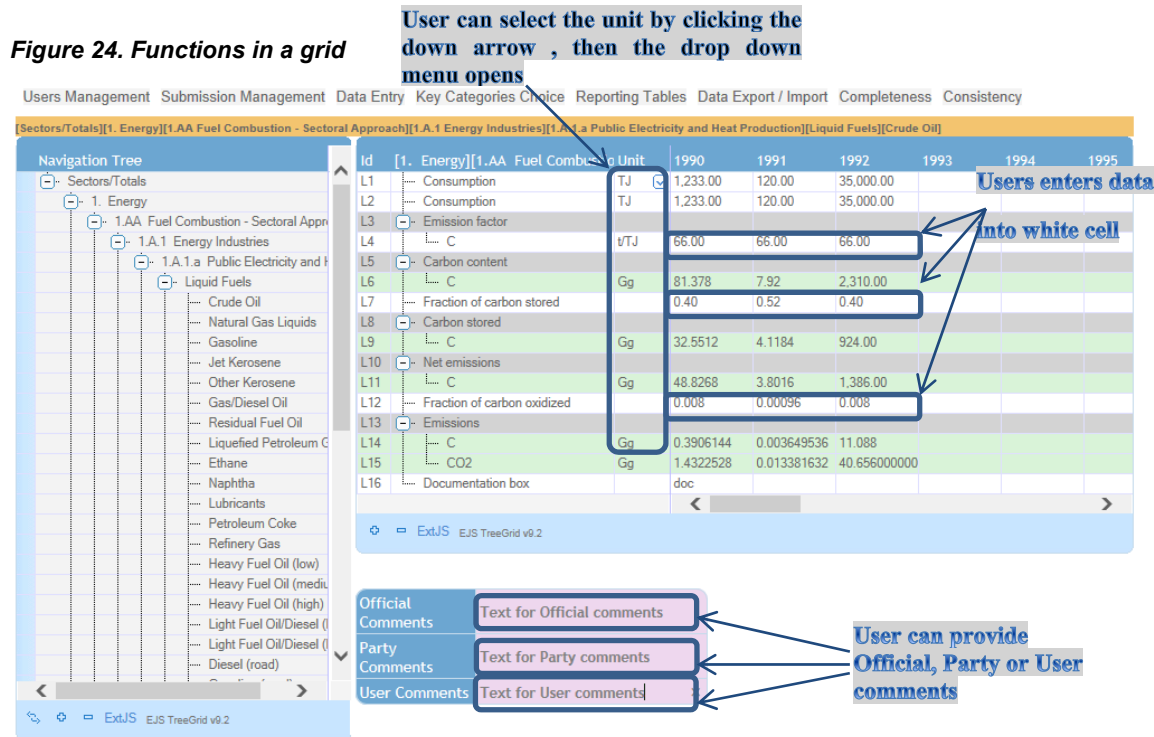

### 4.3 Grids

Each node on the navigation tree has a corresponding **grid**.

A grid includes elements required for reporting information such as activity data, other relevant information, and emissions/removals data.

The cells in the grid have different colors. **White** grid cells denote that the user can enter data, **green** cells mean that the data is automatically calculated by the NAIIS application, **light blue** cells signify that data are automatically copied from a different node (for example in 1.B.1.a.1.i), and **yellow** cells mean that a default value (for example, fraction of carbon stored in reference approach) is provided. Where the cell is **grey**, no input is necessary. (figure 24)

In the energy sector, users are provided a dropdown list to select a unit in reporting the consumption and production of fuels. This is marked with .

## 4.4 Data input

Data can be **entered** into the **white** grid cells only. It is also possible to **copy** and **paste** data from one cell to another by using the shortcut keys 'Ctrl + c' to copy and 'Ctrl + v' to paste. **Each value entered is automatically saved.** When the data is entered, it is first shown in bold, and then changes to normal font indicating that the value has been saved. **Saving occurs immediately** (usually within 1 second), but in case the system becomes slower, **the user should wait until data are shown in regular font before exiting the grid.** Otherwise, the data entered will not be saved.

As mentioned in the previous section, default values are provided for some parameters (yellow cells in the grid). These values can be overwritten if the Party has more accurate data.

Note: Data that has been entered will be automatically saved.

## 4.5 Add/delete new nodes – user defined source categories

### 4.5.1 Add new nodes

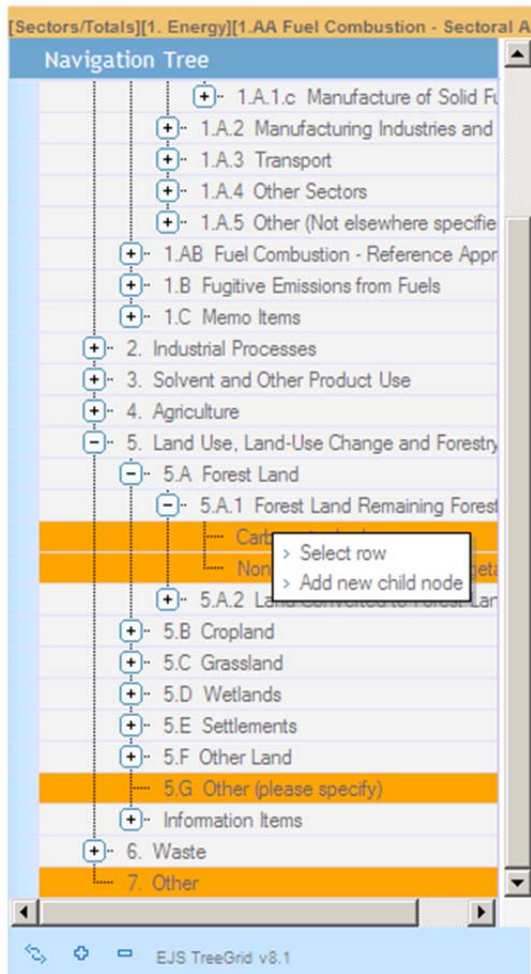

New nodes, for example, can be added to the navigation tree in order to add either a category, a fluorinated gas (F-gas), a fuel, a livestock type, or a subdivision in the LULUCF sector.

User-defined items can be added for:

- Categories indicated as “Other (please specify)”
- LULUCF subdivision
- User-defined fuels

To **add a new child node**, either a pre-defined or a user-defined item, click on the right mouse button on the parent node and select **"Add new child node"**. For ease of use, the parent nodes, where a child node can be added, are highlighted in orange (figure 25).

**Figure 25. Add new child node**

## 4.5.2 Delete nodes – user defined nodes

Only user-added nodes can be deleted. To **delete** a node, right-click on the node and select “**Delete child node**” (figure 26). When deleting user-defined nodes, **each of the child nodes has to be deleted first before deleting the parent node** that was added. If a user accidentally deletes the parent node before deleting child nodes, an error message is displayed, and the nodes will disappear from the tree. However, the nodes are not removed from the database, therefore the user has to click on the “**Reload grid**” icon (🔄) located at the bottom of the navigation tree. After doing so, the child nodes will re-appear on the tree. It should be noted that any data entered in the grid corresponding to the user-added nodes are also deleted from the database once the nodes are removed.

**Figure 26. Delete node**

## 4.6 Backup of data files

To create a backup of your data, you can export the data files and save them as Excel files. Please use the Excel Export function. (Section 7.1)

## 5 Key Category Analysis

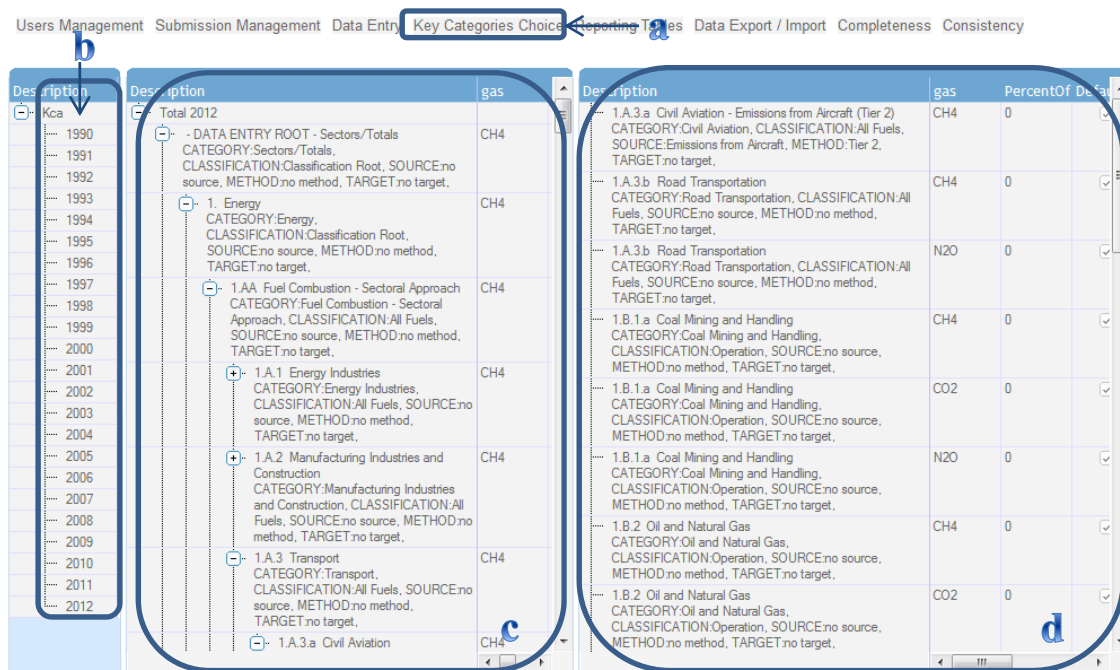

This functionality allows the user to identify and select one of the categories to be used for performing the Key Category Analysis (KCA). Upon selection of the category, the system will perform both **level assessment** and **trend assessment** for which the data are available. The corresponding results of the assessments are available in the reporting tables.

The selection of one or several categories is undertaken as follows. When pressing the 'Key Categories Choice' on the top main menu bar, on the left hand side, select the KCA Year to be used, the navigation tree displays all sector nodes with the following columns (figure 27):

- Description
- Gas
- Percent of Total
- Default List
- Top 95
- Important

The user will have the option to use the default list or customize it. (see figure 27)

**Figure 27. Key Categories Choice main screen**

## 5.1 Using the default list

If the NFP, PM or SE decides to use the default list, they can proceed to the Reporting tables directly. (Section 6 Reporting Tables).

## 5.2 Customizing the list

To add a key category, click on the specific node (see parent node, figure 28, number 2) or line (figure 28, number.1), then reload the list.

**Figure 28. Key Categories Choice screen**

The screenshot shows the 'Key Categories Choice' screen with two panels. The top navigation bar includes: Users, Submission Management, Data Entry, Key Categories Choice, Reporting Tables, Data Export / Import, Completeness, Consistency.

**Left Panel:** A tree view of categories. A green box highlights a node (1) under '1.A.3.a Civil Aviation - Emissions from Aircraft (Tier 2)'. A blue box highlights its parent node (2) '1.A.3 Transport'. The 'KeyCategc' column has checkboxes, and the 'Percent' column has values of 0.

Description	gas	KeyCategc	Percent
1. Energy	CH4	<input type="checkbox"/>	0
1.AA Fuel Combustion - Sectoral Approach	CH4	<input type="checkbox"/>	0
1.A.1 Energy Industries	CH4	<input type="checkbox"/>	0
1.A.2 Manufacturing Industries and Construction	CH4	<input type="checkbox"/>	0
1.A.3 Transport	CH4	<input type="checkbox"/>	0
1.A.3.a Civil Aviation	CH4	<input type="checkbox"/>	0
1.A.3.a Civil Aviation - Emissions from Aircraft (Tier 2)	CH4	<input checked="" type="checkbox"/>	0
1.A.3.a Civil Aviation - Emissions from Source Category (Tier 1)	CH4	<input type="checkbox"/>	0

**Right Panel:** A list of categories with checkboxes for selection. The 'PercentOf Defaul' column has values of 0 or 1.

Description	gas	PercentOf Defaul
1.A.3.a Civil Aviation - Emissions from Aircraft (Tier 2)	CH4	0
1.A.3.a Civil Aviation - Emissions from Aircraft (Tier 2)	CO2	0
1.A.3.a Civil Aviation - Emissions from Aircraft (Tier 2)	N2O	0
1.A.3.b Road Transportation	CH4	0
1.A.3.b Road Transportation	CO2	0
1.A.3.b Road Transportation	N2O	0
1.A.4.c.2 Stationary	CO2	0
1.B.1.a Coal Mining and Handling	CH4	0
1.B.1.a Coal Mining and Handling	CO2	0
1.B.1.a Coal Mining and Handling	N2O	0

Once the list has been reloaded or refreshed, as per example below, the node 1.A.3.a Civil aviation – Emissions from Aircraft has been selected (figure 29, number 1), and the parent node 1.A.3.a Civil Aviation has been unselected. (figure 29, number 2).

**Figure 29. Key Categories Choice screen**

Description	gas	KeyCategc	Percent
Total		<input type="checkbox"/>	100
- DATA ENTRY ROOT - Sectors/Totals CATEGORY:Sectors/Totals, CLASSIFICATION:Classification Root,	CH4	<input type="checkbox"/>	0
1. Energy CATEGORY:Energy, CLASSIFICATION:Classification Root,	CH4	<input type="checkbox"/>	0
1.AA Fuel Combustion - Sectoral Approach CATEGORY:Fuel Combustion - Sectoral Approach, CLASSIFICATION:All Fuels,	CH4	<input type="checkbox"/>	0
1.A.1 Energy Industries CATEGORY:Energy Industries, CLASSIFICATION:All Fuels,	CH4	<input type="checkbox"/>	0
1.A.2 Manufacturing Industries and Construction CATEGORY:Manufacturing Industries and Construction, CLASSIFICATION:All Fuels,	CH4	<input type="checkbox"/>	0
1.A.3 Transport CATEGORY:Transport, CLASSIFICATION:All Fuels,	CH4	<input type="checkbox"/>	0
1.A.3.a Civil Aviation CATEGORY:Civil Aviation, CLASSIFICATION:All Fuels,	CH4	<input type="checkbox"/>	0
1.A.3.a Civil Aviation - Emissions from Aircraft (Tier 2) CATEGORY:Civil Aviation, CLASSIFICATION:All Fuels, SOURCE:Emissions from Aircraft, METHOD:Tier 2.	CH4	<input checked="" type="checkbox"/>	0
1.A.3.a Civil Aviation - Emissions from Source Category	CH4	<input type="checkbox"/>	0

### 5.3 Delete subnodes

To delete subnodes, double click on the specific subnode or line (figure 30a), a pop-up window warning message opens. (See figure 31).

Press the “Ok” button to delete the sub node or the “Cancel” button not to delete. (see figure 31 a)

**Figure 30. Key Categories screen – delete subnodes**

Description	Description	gas	PercentOf Defa

**Figure 31. Key Categories – Delete confirmation screen**

## 6 Reporting Tables

The Reporting Tables enable the user to view the data entered in the grids under the Data Entry section of the web application. Note, however, that the column headings are not always fully displayed in the tables because column widths are fixed. The full heading can be seen by scrolling the mouse over the column title.

The navigation tree here is organized **by year** (figure 32). It functions similarly as the navigation tree for data entry. Data in reporting tables cannot be modified; modifications to data should be done through the data entry grids.

**Figure 32: Reporting tables organized by year**

The screenshot displays a web application interface for reporting tables. On the left is a 'Navigation Tree' with a list of years from 1996 to 2012. Below the years, there are expandable sections for 'Energy', 'Reference approach', and 'Emissions from aircraft (Tier 2)'. The 'Reference approach' section is expanded to show sub-items: '1-1s1-3', '1-1s4-5', and '1-1a'. The main area on the right contains two data grids. The top grid is titled '[1-1s1-3][1-1s1-3(a)]' and has columns for 'Production', 'Imports', 'Exports', and 'International Stock Change'. It contains data for 'Liquid Fossil', 'Primary Fuels' (with sub-items 'Crude Oil' and 'Otimulsion'), 'Natural Gas Liquids', and 'Secondary Fuels'. The bottom grid is titled '[1-1s1-3][1-1s1-3(b)]' and has a column for 'Documentat' with a 'Documentation box' below it. Both grids include a blue bar at the bottom with the text 'ExtJS EJS TreeGrid v9.2'.

## 7 Data Export/Import

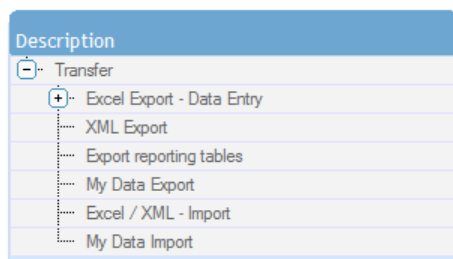

This function enables users to export data from the system in either Excel or XML format.

### 7.1 Excel Export - Data Entry

Click on the “Data Export / Import” tab and the navigation tree will appear on the left-hand side (figure 33).

Users Management Submission Management Data Entry Key Categories Choice Reporting Tables **Data Export / Import** Completeness Consistency

**Figure 33: Data Export / Import initial navigation tree**

There are **three options** available to export files:

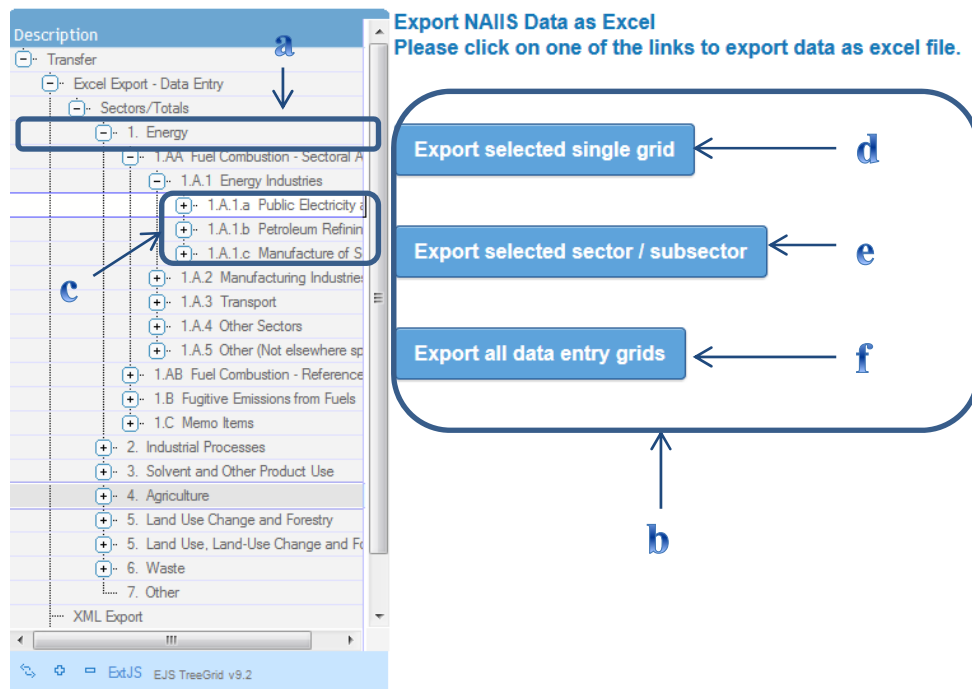

1. **Export selected single grid** – only the data of the current selected grid will be exported. (figure 34, d)
2. **Export selected sector / subsector**– all data of the current selected grid and the sub sectors will be exported. (figure 34, e)
3. **Export all data entry grids** – all data entry grids will be exported. (figure 34, f)

Clicking on one of the Sector's or sub sectors' (figure 34, a) or c)) on the left-hand side navigation tree, three Export buttons will appear on the middle of the screen. (figure 34, b)

Click on one of the “Export” button. The system will then generate an excel export file. The file that has been exported can be seen under “My Data Export” (figure 35).

**Figure 34: Excel export**

Users Management Submission Management Data Entry Key Categories Choice Reporting Tables Data Export / Import Completeness Consistency

**Figure 35: My Data Export**

Sectors/Totals	UNFCCC_NFP	[ Sectors/Totals][ 1. Energy]	2013-08-06T12:18:1	SUCCESS	File

## 7.2 Excel/XML Data import

The data import tab allows the user to import data into the system with the use of an XML or Excel file.

To **import** data (figure 37, a), click on the "Browse..." button (or "Choose file" for Chrome users), select the file to be imported, and then click on the "Submit" button (figure 37). A message will be displayed to confirm successful completion of import (figure 38). If the type of the file selected for import is incorrect, an error message is displayed (only \*.xml and \*.xlsx files are allowed).

**Figure 37. Data import**

Pressing the "Submit Query" button will start the data import process.

On the left-hand side navigation tree, click on 'My Data Import' which opens a list of imported data. The status of the import process can be seen under "My Data import" (figure 38, b).

Click on the "File" at column FileLink to open or save the file imported (figure 38, c).

### 7.3 Export reporting tables

This Export report tables function allows the user to export reporting tables in excel format.

Clicking on the “Export report tables” button triggers the system to generate an excel file (figure 39, c) and the following message appears on the screen:

*‘We have received your request for reporting tables export. Please be patient, this may take a few minutes. You can check progress of export in ‘My Data Export’.* (figure 40, a)

**Figure 39. Export reporting tables screen**

Users Submission Management Data Entry Key Categories Choice Reporting Tables Data Export / Import Completeness Consistency

**c)**

Export NAIS Data as reporting grids (excel)  
Please click on the link if you wish to export all data to excel file.

Export reporting tables

**Figure 40. Export reporting tables screen**

**Export NAIS Data as reporting grids (excel)**  
Please click on the link if you wish to export all data to excel file.

**a)**

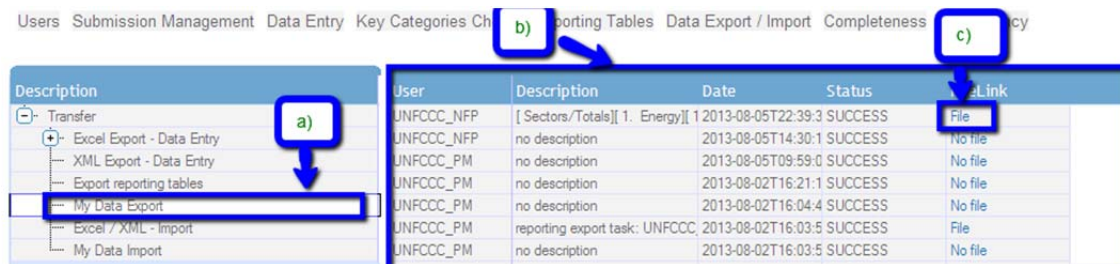

Export reporting tables

We have received your request for reporting tables export. Please be patient, this may take a few minutes. You can check progress of export in My Data Export

On the left-hand side navigation tree, click on ‘My Data Import’ which opens a list of imported data. The status of the import process can be seen under “My Data import” (figure 41,b).

Click on the “File” at column FileLink (figure 41, c) to open or save the file exported.

**Figure 41. My Data Export screen**

## 7.4 XML Export

This XML export function allows the user to export files in XML format.

Clicking on the “XML Export – Data Entry” button triggers the system to generate an XML file (figure 42) and the following message appears on the screen:

*‘We have received your request for xml file export. Please be patient, this may take a few minutes. You can check progress of export in ‘My Data Export’.* (figure 43, a)

## 8 Completeness

This function allows the user to check whether all the grids of an inventory year have been completed.

When pressing the 'Completeness' tab on the top main menu bar, a navigation tree is displayed on the left-hand side, sorted by inventory years and then by sectors (nodes and sub-nodes).

Clicking on the specific nodes (figure 45, number 3) on the tree opens on the right-hand side the data entry grid for that node.

**Figure 45 . Completeness screen**

The screenshot shows the 'Completeness' tab selected in the top menu. On the left, a navigation tree is displayed, sorted by years and sectors. A blue box labeled '2.' highlights the tree structure. A blue box labeled '3.' highlights a specific node under '2010' - '1. Energy' - '1.AA Fuel Combustion - Sectoral Approach'. On the right, a data grid is shown with columns for years (2005-2009) and a 'Complete' column. A blue box labeled '4.' highlights the 'Complete' column. A blue box labeled '1.' highlights the 'Completeness' tab in the top menu.

Description	Unit	2005	2006	2007	2008	2009	Complete
L1 Emissions/removals	Gg	8.8249996666	9.1666666666	5.9583333333	12.4666666666	13.2916666666	13.5666

## 9 Consistency

Consistency is the function enabling the user to recalculate all the values of a given year, i.e. when the formulas have changed.

When pressing the 'Consistency' tab on the top main menu bar, the left-hand side navigation tree displays the inventory years in ascending order.

Clicking on the appropriate inventory year (figure 47, number 3) displays the recalculated data on the right hand side, if any.

**Figure 47. Consistency initial screen**

1. select 'Consistency' tab  
2. left hand side navigation tree (sorted by years) appears  
3. left click on specific years under column Description opens up the right hand side box (see 4.)  
4. right hand side box appears with populated with data, if any.

Description	Check
Consistency	check year Consistency
2005	check year 2005
2006	check year 2006
2007	check year 2007
2008	check year 2008
2009	check year 2009
2010	check year 2010
2011	check year 2011
2012	check year 2012

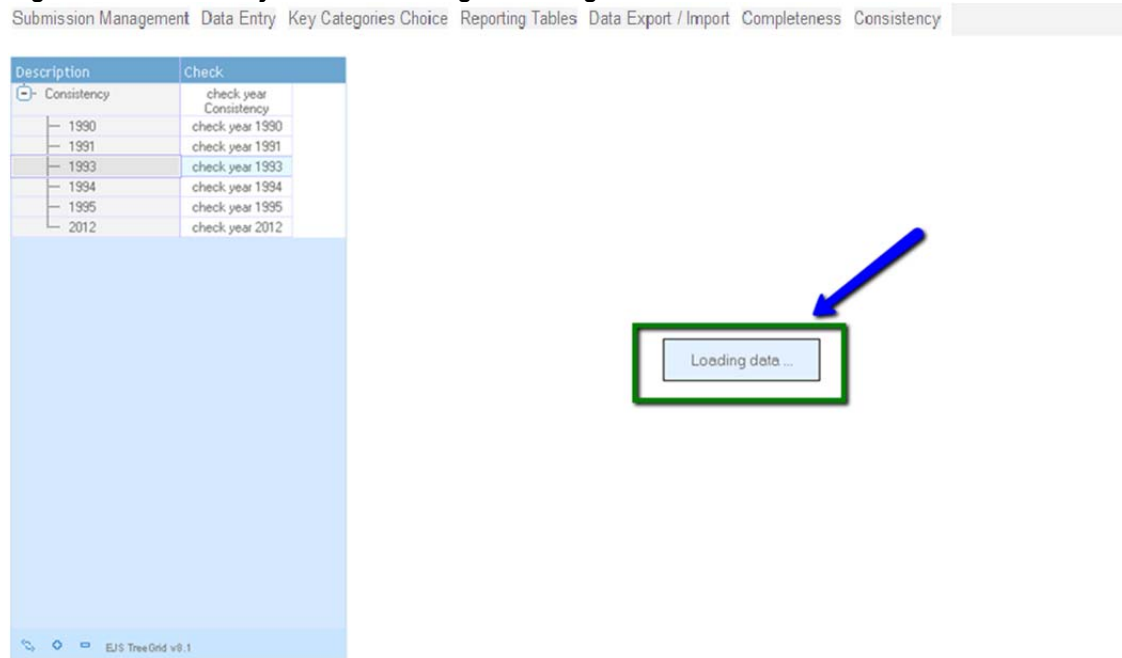

Description	value	CATEGORY	CLASSIFICATION MEASURE
No data found			

Press the corresponding year button to be checked (figure 48, number 1). However, please note that **the system is recalculating all the values for the selected year** and a pop-up window with the message "Loading data" appears in the middle of the screen (figure 49).

**Figure 48. Consistency - example**

1.

**Figure 49. Consistency screen – message “Loading data”**

If no data has changed after the recalculation, the message “No data found” will appear on the screen (figure 50), otherwise a list of calculated data sorted by order of calculation will be displayed on the right hand side box (figure 51).

**Figure 50. Consistency screen – message “No data found”**

**Figure 51. Consistency screen – list of calculated data**

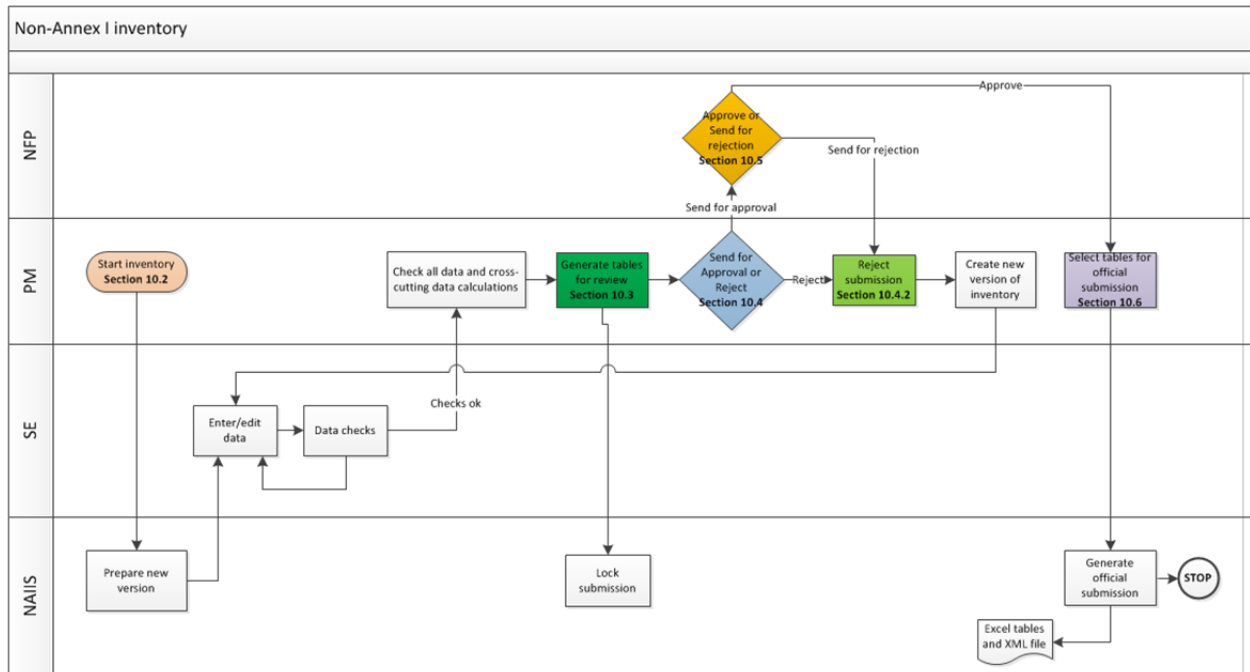

# 10 Submission management

## 10.1 Workflow

Creating and preparing an inventory, generating tables for checking by the NFP and approving and/or rejecting submission, follows a number of steps known collectively as a workflow. This chapter describes the workflow relating to the submission of the GHG inventory/(ies), which users should follow to create, prepare, and send GHG inventories for internal checking, and approval/rejection of the submission by the NFP, within the NAIIS web application (figure 52).

**Figure 52: Non-Annex I Inventory Software workflow**

## 10.2 Start of inventory/submission (NFP or PM)

This procedure allows the NFP or PM to start a new (created) inventory. The existing data for the inventory year identified will be made available in the new inventory/submission.

These are the steps to start a new inventory:

1. Click on “View Inventories Progress” under sub menu “Submission Management” (figure 53).

**Figure 53. View Inventories Progress sub menu**

2. The “View Inventories Progress” screen appears (figure 54).
3. Select the appropriate inventory by clicking the box under column “Working Inventory” (figure 54, a).

\*\*\* Note: The selected appropriate inventory should be in status “created” (figure 54, b)

**Figure 54. View Inventories Progress screen**

UNFCCC_2013_15_Inventory	<input checked="" type="checkbox"/>		UNFCCC_PM	Mon Aug 05 23:27:04 CEST 2013	created	UNFCCC_PM		

4. Click on “Work on Inventories” under “Submission” (figure 55).

**Figure 55. Work on Inventories sub menu**

- Click the appropriate Inventory year on “Work on Inventories” under “Submission” (figure 56, a).
- Press the “Start Inventory” button to start the inventory (figure 56, b). Once pressed, the status changes to “started” (figure 57).

\*\*\* Once the “Start Inventory” button has been pressed by the NFP or PM, a notification email will be sent to all SE’s with the information that a new inventory was created. SE’s and PM’s can start entering their data into the NAIIS software. More details on how to do the data entry please see section 4.1 above.

### 10.3 Send for checking (PM)

Once the SE's/or PM's have prepared the national GHG inventory, by entering data into the sectoral grids and the PM of the Party has checked the complete GHG inventory for consistency and correctness, the following steps allows the PM to send the inventory for checking:

1. Log in as PM.
2. Click on "View Inventories Progress" under sub menu "Submission Management".
3. The "View Inventories Progress" screen appears.
4. Select the appropriate inventory by clicking the Inventory name under column "Name" (figure 58, a).
5. Press the "Send for Checking by NFP" button to send it to the NFP for his review and approval (figure 58, b).  
 \*\*\* Note: A notification email will be sent to the NFP email address, and the status changed to "check" (figure 59).

**Figure 58. Work on Inventories screen – Status = Started**

**Figure 59. Work on Inventories screen – Status = check**

## 10.4 Send for approval/rejection of an Inventory (PM)

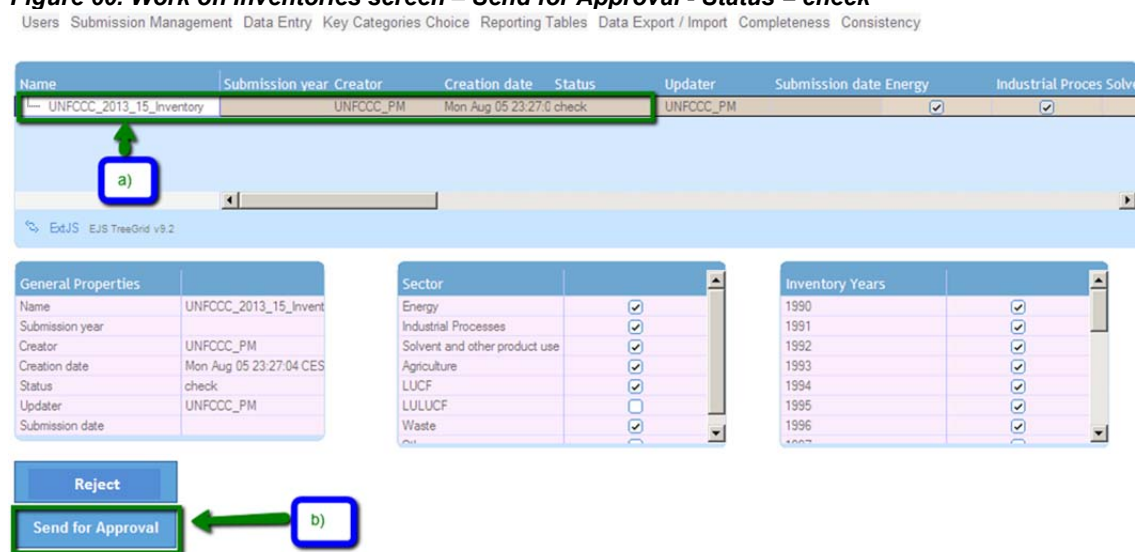

This section describes on how the PM approves or rejects an inventory after being checked by the PM.

### 10.4.1 Send for approval of an Inventory

1. Log in as PM.
2. Click on “View Inventories Progress” under sub menu “Submission Management”.
3. The “View Inventories Progress” screen appears.
4. Select the appropriate inventory by clicking the Inventory name under column “Name” (figure 60, a).
5. Press the “Send for Approval” button to send it to NFP for his/her review and approval of the inventory (figure 60, b).

\*\*\* Note: A notification email will be sent to the PM, once the “Send for Approval” has been pressed. And the status changed to “Awaiting\_approval” (figure 61).

**Figure 60. Work on Inventories screen – Send for Approval - Status = check**

**Figure 61. Work on Inventories screen – Status = awaiting\_approval**

### 10.4.2 Rejection of an Inventory

1. Log in as PM.
2. Click on “View Inventories Progress” under sub menu “Submission Management”.
3. The “View Inventories Progress” screen appears.
4. Select the appropriate inventory by clicking the Inventory name under column “Name” (figure 62, a).
5. Press the “Reject” button (figure 62, b).

\*\*\* Note: A notification email will be sent to the PM, once the “Reject” button has been pressed. And the status changed to “Awaiting\_rejection\_check” (figure 63).

**Figure 62. Work on Inventories screen –Reject - Status = check**

## 10.5 Approval or Rejection of an inventory (NFP)

This section describes how the NFP approves or rejects an inventory after being sent for approval by the PM (See section 10.4).

### 10.5.1 Approval of an inventory

1. Log in as NFP.
2. Click on "View Inventories Progress" under sub menu "Submission Management".
3. The "View Inventories Progress" screen appears.
4. Select the appropriate inventory by clicking the Inventory name under column "Name" (figure 64).
5. Press the "Approve" button (figure 64, b).

Once the "Approve" button was pressed, the status of the selected inventory changes to "approved" (figure 65, b).

\*\*\* Note: A notification email will be sent to the PM that the inventory has been approved. Therefore, the PM may proceed to selecting the tables for preparing the official submission (See section 10.6).

**Figure 64. Work on Inventories screen – Approve an inventory - Status = awaiting\_approval**

The screenshot shows the 'Work on Inventories' screen. At the top, there is a navigation menu with options: Users, Submission Management, Data Entry, Key Categories Choice, Reporting Tables, Data Export / Import, Completeness, and Consistency. Below this is a table with columns: Name, Submission year, Creator, Creation date, Status, Updater, Submission date, Energy, and Industrial Processes. The first row shows 'UNFCCC\_2013\_15\_Inventory' with status 'awaiting\_approval'. A green box labeled 'a)' points to the 'Status' column. Below the table are three panels: 'General Properties', 'Sector', and 'Inventory Years'. The 'Approve' button is highlighted with a green box labeled 'b)', and a 'Send for Rejection' button is visible below it.

**Figure 65. Work on Inventories screen – Approve an inventory - Status = approved**

The screenshot shows the 'Work on Inventories' screen after approval. The navigation menu is the same. The table now shows the 'UNFCCC\_2013\_15\_Inventory' with status 'approved'. A green box labeled 'a)' points to the 'Name' column, and another green box labeled 'b)' points to the 'Status' column. The 'General Properties', 'Sector', and 'Inventory Years' panels are also visible, with the 'Status' field in the 'General Properties' panel now showing 'approved'.

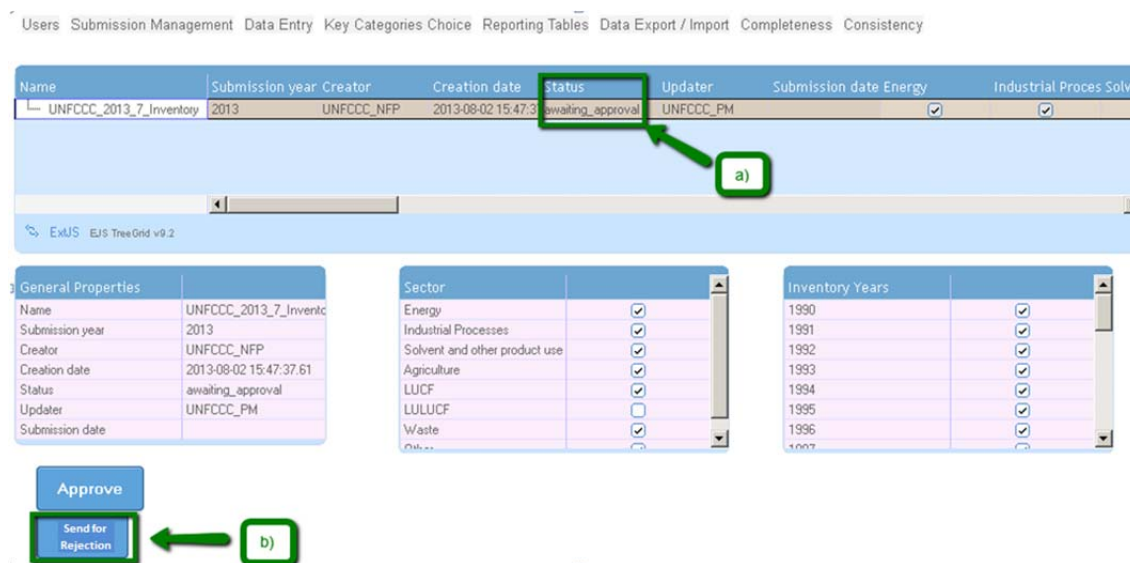

## 10.5.2 Rejection of an inventory

1. Log in as NFP.
2. Click on “View Inventories Progress” under sub menu “Submission Management”.
3. The “View Inventories Progress” screen appears.
4. Select the appropriate inventory by clicking the Inventory name under column “Name” (figure 66).
5. Press the “Send for Rejection” button (figure 66, b).

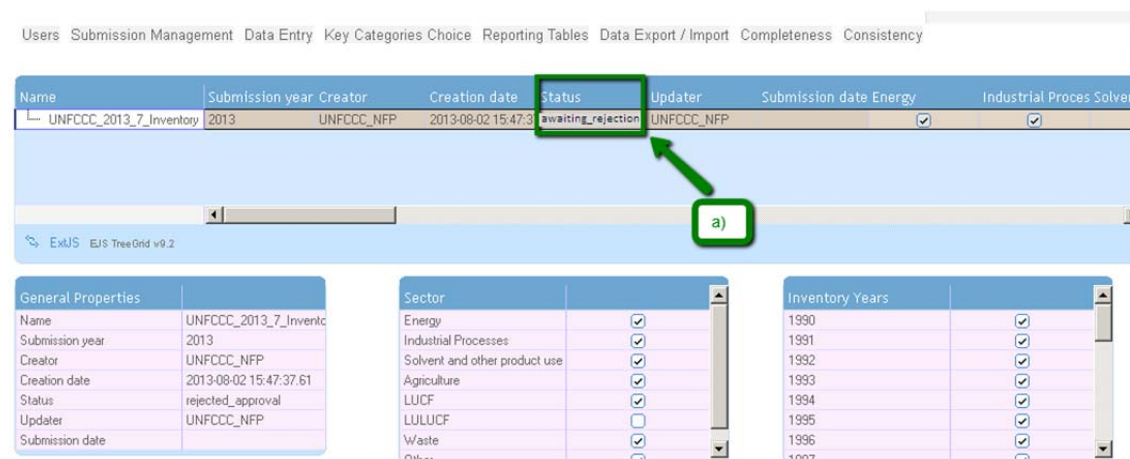

Once the “Send for Rejection” button was pressed, the status of the selected inventory changes to “awaiting\_rejection” (figure 67, a).

\*\*\* Note: A notification email will be sent to the PM that the inventory has been rejected. Therefore, the PM will be able to reject the submission. Proceed to section 10.4.2.

**Figure 66. Work on Inventories screen – Rejection of an inventory - Status = awaiting\_approval**

**Figure 67. Work on Inventories screen – Rejection of an inventory - Status = rejected\_approval**

## 10.6 Submit inventory (PM)

This section describes on how the PM submits the inventory by selecting tables for the general submission after being approved by the NFP (See section 10.5).

### 10.6.1 Submit select tables for preparing the general submission

1. Log in as PM.
2. Click on “View Inventories Progress” under sub menu “Submission Management”.
3. The “View Inventories Progress” screen appears.
4. Select the appropriate inventory by clicking the box under column “Working inventory” (figure 68, a).  
\*\*\* Note: The selected inventory year to be submitted should be in status “approved” (figure 68, b).
5. Click on “Work on Inventories” under Submission Management (figure 68, c).  
This opens the Submit Inventory initial screen (figure 69).
6. Click the inventory year to be submitted (figure 69, a).
7. Press the “Generate Official Submission” button (figure 69, c).

**Figure 68. View Inventories Progress screen – select inventory for the preparation for the general submission**

Generate Official Submission

Once the “Generate Official Submission” button has been pressed the “Submit Inventory” initial screen for selecting the tables appears (figure 70).

8. Select or deselect by clicking the appropriate year(s) under “Inventory Years” box (figure 70, c) or the sector grids under the “Table” box (figure 70, d) to generate the official submission.
9. Press the “Submit” button (figure 70, e). An official submission will be generated in the NAIIS system.

**Figure 70. Submit – select tables and grids for the general submission**

## Glossary of terms and abbreviations

AD – Activity Data  
AWMS – Animal Waste Management System  
BOD – Biochemical Oxygen Demand  
C – Carbon  
C<sub>2</sub>F<sub>6</sub> – Hexafluoroethane  
CF<sub>4</sub> – Tetrafluoromethane  
CH<sub>4</sub> – Methane  
CO – Carbon Monoxide  
CO<sub>2</sub> – Carbon dioxide  
COD – Chemical Oxygen Demand  
dm – dry matter  
Gg – Gigagram  
ha – hectare  
HFC – Hydrofluorocarbon  
hl – hectolitre  
k – kilo  
kg – kilogram  
kha – kilo hectare  
kt – kilotonne  
LTO – Landing/Take Off  
LUCF – Land-Use Change and Forestry  
LULUCF – Land Use, Land-Use Change and Forestry  
m<sup>3</sup> – cubic meter  
MCF – Methane Correction Factor  
Mg – Megagram  
Mha – Megahectare  
MSW – Municipal Solid Waste  
N – Nitrogen  
N<sub>2</sub>O – Nitrous Oxide  
NFP – National Focal Point  
NH<sub>3</sub> – Ammonia  
NMVOC – Non-Methane Volatile Organic Compound  
NO<sub>x</sub> – Nitrogen Dioxide  
PFC – Perfluorocarbon  
RA - Reference Approach  
SE – Sectoral Expert  
SF<sub>6</sub> – Sulphur Hexafluoride  
SO<sub>2</sub> – Sulphur Dioxide  
SWDS – Solid Waste Disposal Site  
t – tonne  
Tg – Teragram  
TJ – Terajoules  
XML – Extensible Markup Language  
year t – inventory year

## Annex 2: Fuel categories

### **Liquid Fuels** (Crude oil and petroleum products)

Crude oil  
Orimulsion  
Natural gas liquids  
Gasoline  
Motor Gasoline  
Aviation Gasoline  
Jet Gasoline  
Jet kerosene  
Other kerosene  
Shale oil  
Gas/Diesel oil  
Residual fuel oil  
Liquefied petroleum gas  
Ethane  
Naphtha  
Bitumen  
Lubricants  
Petroleum coke  
Refinery Feedstock  
Other oil  
Refinery gas  
Paraffin waxes  
White spirit  
Heavy fuel - low  
Heavy fuel - medium  
Heavy fuel - high  
Light fuel oil/diesel - low  
Light fuel oil/diesel - medium  
Light fuel oil/diesel - high  
Diesel (road)  
Gasoline (road)

### **Solid Fuels** (Coal and coal products)

Anthracite  
Coking coal  
Other bituminous coal  
Sub-bituminous coal  
Other sub-bituminous coal  
Lignite/brown coal  
Oil shale

Peat  
Coke  
Coke oven coke  
Gas coke  
Patent fuel  
Coke  
Coke oven coke  
Gas coke  
BKB/Patent Fuel  
Patent Fuel  
Brown coal briquettes  
Gas works gas  
Coke oven gas  
Blast furnace gas  
Other gases and mixtures from coal-derived carbon  
Coal - low  
Coal - medium  
Coal - high

### **Gaseous Fuels**

Natural gas

### **Other Fuels**

Municipal solid waste  
Industrial waste  
Fuel mixtures (fossil and biomass)  
Waste gas  
Other wastes  
Hydrogen

### **Biomass**

**Solid**  
Wood/Wood waste  
Agricultural waste  
Charcoal  
Other solid biomass

### **Liquid**

Bio-alcohol  
Sulphur lies (Black liquor)  
Sewage sludge  
Other liquid biomass

### **Gas**

Landfill gas  
Sludge gas (sewage gas)  
Other biogas

### Annex 3: Global Warming Potentials (GWPs)

Greenhouse gas	Chemical formula	1995 IPCC GWP
Carbon dioxide	CO <sub>2</sub>	1
Methane	CH <sub>4</sub>	21
Nitrous oxide	N <sub>2</sub> O	310

## Annex 4: Default values

### 1. Fraction of carbon stored for reference approach

Bitumen – 1  
 Coal oils and tars (from coking coal – 0.75  
 Ethane – 0.8  
 Gas/Diesel oil – 0.5  
 LPG – 0.8  
 Lubricants – 0.5  
 Naphtha – 0.8  
 Natural gas – 0.33

### 2. Conversion factors

a. CH<sub>4</sub> volume → CH<sub>4</sub> Gg = 0.67

b. *Conversion factors for energy*

**3. Emission factors**

**a. Ozone precursors and SO<sub>2</sub> from oil refining – Crude oil throughput**

NO<sub>x</sub> = 0.06

CO = 0.09

NMVOC = 0.62

SO<sub>2</sub> = 0.93

**b. Ozone precursors and SO<sub>2</sub> from oil refining – Catalytic cracker throughput**

NO<sub>x</sub> = 0.2

CO = 42.6

NMVOC = 0.6

SO<sub>2</sub> = 1.5

**c. NMVOC emissions from storage and handling – Crude oil throughput**

Secondary seals = 0.2

Primary seals = 0.7

Fixed Roof = 4.9

**d. SO<sub>2</sub> from Sulphur Recovery Plants – 139 kg/t**

**4. CKD correction factor = 1.02**

**5. Methane Correction Factor (MCF)**

Managed — 1.0

Unmanaged – deep (>= 5m) — 0.8

Unmanaged – shallow (< 5m) — 0.4

Methane Correction Factor — 0.6

**6. Inventory time period (for Cropland remaining Cropland – Carbon stock change – Mineral soils) = 20 years**
