

UNFCCC Climate Action and Support Transparency Training (UNFCCC-CASTT)

- Promote effective and universal participation and exchange of countries in the MRV arrangements under the Convention and the transparency framework under the Parties Agreement through a targeted, professional and comprehensive capacity-building.
- Contribute towards realizing the Sustainable Development Goal 4 defined in “Transforming our world: the 2030 Agenda for Sustainable Development” by enhancing the technical capacity and/or resulting in improved and robust information and data that form as a sound basis to formulate and implement the sustainable development agenda.

Offerings

	Package 1: Policymakers	Package 2: Policy implementers	Package 3: Technicians and developing experts
Target	High level officials (policymakers) from mostly developing countries, as well as non-State actors. Moreover, a limited number of officials from developed countries	Mid- to senior-level officials (policy implementers); who are instrumental in translating the policy decisions into concrete actions on the ground.	Professionals and developing experts who are involved in providing technical and substantive input to their country's MRV arrangements and the transparency framework
