

**Friends World Committee for Consultation (FWCC)**

<http://fwcc.world/>

For suggestions “to further enhance the effective engagement of non-Party stakeholders with a view to strengthening the implementation of the provisions of decision 1/CP.21”, we would offer the following:

- As an observer, we have found the UNFCCC Secretariat support professional and application approaches relatively straight forward. We thank you for this.
- We would encourage the UNFCCC Secretariat to identify conflicts of interest with observer organizations which have a financial interest related to practices at the root cause of anthropogenic climate change, including fossil fuel extraction and combustion.
- We are concerned by an experienced increased in meetings closed to observers during the SB and COP sessions.
