

COP23 Side Event

Integrated observations for mitigation and adaptation & Practical support to Parties

WEDNESDAY

8 NOVEMBER 2017

13:15-14:45

Theme

Building partnerships for promoting integrated observations is key in implementing a global observing system for climate. Practical support to Parties is provided through cooperation mechanisms, which support continued operation of key climate stations. Focus will be on Pacific Island nations.

Topics

- Integrated observations for mitigation and adaptation;
- Supporting National Greenhouse Gas Inventories;
- Practical support for Parties to improve observations.
