Low-Carbon City Development Symposium

December 5 , 2015 (Saturday)

To explore the low-carbon development in urbanization and industrialization, China's government has initiated several pilot projects in industrial parks, communities, towns and cities since 2013. By conducting the low-carbon endeavors, the pilot areas have gained sufficient experiences and innovative measures to further stimulate low-carbon development.

The event aims to review and analyze the low-carbon development efforts undertaken by policy makers and domestic practitioners and further discuss the regional low-carbon development roadmap by communicating with different stakeholders from China and abroad.

12月6日 第二届应对气候变化南南合作高级别研讨会“从政治声明到落实行动”

会议背景：南南合作已成为全球应对气候变化行动的有效路径之一。作为对传统南北合作的重要补充，其国际影响力不断增强。这一点在 2014 年 12 月 8 日气候变化利马大会（COP20）期间举办的“第一届应对气候变化南南合作高级别研讨会”上得到了广泛认可。

近年来，中国展示了推动南南合作的强大意愿。2015 年 9 月，习近平主席宣布中国将拿出 200 亿元人民币建立气候变化南南合作基金，以帮助发展中国家应对气候变化。

当前，各方高度期待气候变化巴黎大会（COP21）能达成一个有效应对气候变化的全球协议，包括提供充足的资金支持。此时，进一步探讨南南合作在未来气候行动中的作用、位置和战略方向尤其重要。为此，中国国家发展改革委与联合国环境署联合举办本次研讨会。

2nd South-South Cooperation on Climate Change Forum (SSCCC Forum)

Theme: from political commitment to action

December 6, 2015 (Sunday)

Background

South-South cooperation is widely recognized as a new important dimension of the global response to climate change, complementing the traditional North-South cooperation. This was the key message emerging from the first South-South Cooperation on Climate Change (SSCCC) Forum, held in Lima last year at the margins of COP20.

In recent years, China has demonstrated a strong political will to promote SSCCC. In September 2015, Chinese President Xi Jinping announced that China will make available 3.1 billion US dollars for setting up a new ‘China South-South Climate Fund’, to support low carbon and resilient development in the global South.

Whilst the world is highly expecting at COP21 a universal agreement capable of responding to climate change, it is fundamental to reflect on the role of South-South cooperation in its implementation. To this end, the National Development and Reform Commission (NDRC) of China and the United Nations Environment Programme (UNEP) will co-sponsor the second edition of the SSCCC Forum at COP21 in Paris.

China-California Low Carbon and Climate Change Cooperation

December 7, 2015 (Monday)

China and California's low carbon and climate change collaboration has been a model of sub national engagement, through which both sides have benefited from information and personnel exchange, sharing of lessons learned, and opportunities for related trade and investment. The China-California joint side-event at COP21 in Paris will present the collaboration efforts from both sides across various areas including air pollution mitigation, emissions trading, zero-emission vehicles, clean-tech and trade. The event will include what has been achieved by both sides through collaboration and exchange, and shed light on next steps for the implementation of the MOU.
